RZ/G LINUX PLATFORM WITH
INDUSTRIAL-GRADE CIP LINUX REDUCES RISK AND COST OF OWNERSHIP

The Renesas RZ/G Linux Platform makes it easy to implement and maintain Industrial-Grade Linux in electronic equipment thanks to a unique software-design framework with Renesas' Verified Linux Package, advanced code verification and analysis tools, and cloud-build from within Renesas' e² studio development environment. The Verified Linux Package is built with Civil Infrastructure Platform (CIP) Linux with super long-term (10+ year) support for a given Linux kernel, which eliminates the need for costly upgrades.

The RZ/G Linux Platform enables users of all types to excel with Linux – from those upgrading from microcontrollers to MPUs who don't want to deal with setting up a Linux server of their own, to experts who are already accustomed to a manual Yocto build process.   https://**www.cip-project.org/**
