INDUCTORS

⊗TDK

Inductors for power circuits Wound metal VLS-HBX series

VLS4012HBX type

FEATURES

O Magnetic shield type wound inductor for power circuits using a metallic magnetic material.

O High magnetic shield construction and compatible with high-density mounting.

O Larger current was achieved by the metallic magnetic material.

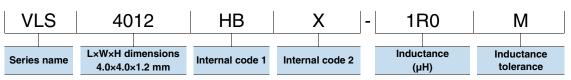

○ Operating temperature range: -40 to +105°C (including self-temperature rise)

APPLICATION

O HDD, SSD, DVC, DSC, mobile display panels, smart phones, tablet terminal, portable game devices, compact power supply modules, other

O Application guides: Smart phones/tablets

CHARACTERISTICS SPECIFICATION TABLE

L		Measuring frequency	DC resistance		Rated current*			Part No.	
					Isat		Itemp		
(µH)	Tolerance	(MHz)	(Ω)max.	(Ω)typ.	(A)max.	(A)typ.	(A)max.	(A)typ.	
1.0	±20%	1	0.053	0.044	6.80	7.55	5.27	5.86	VLS4012HBX-1R0M
2.2	±20%	1	0.094	0.078	4.68	5.20	3.35	3.72	VLS4012HBX-2R2M
4.7	±20%	1	0.159	0.138	3.24	3.60	2.49	2.77	VLS4012HBX-4R7M
10	±20%	1	0.338	0.294	2.12	2.36	1.64	1.82	VLS4012HBX-100M
22	±20%	1	0.684	0.595	1.41	1.57	1.15	1.28	VLS4012HBX-220M

* Rated current: smaller value of either Isat or Itemp.

Isat: When based on the inductance change rate (30% below the initial L value)

Itemp: When based on the temperature increase (temperature increase of 40°C by self heating)

REMINDERS FOR USING THESE PRODUCTS

Before using these products, be sure to request the delivery specifications.

SAFETY REMINDERS

Please pay sufficient attention to the warnings for safe designing when using this products.

The storage period is less than 12 months. Be sure to follow the storage conditions (temperature: 5 to 30°C, humidity: 10 to 75% RH or less). If the storage period elapses, the soldering of the terminal electrodes may deteriorate.					
\bigcirc Do not use or store in locations where there are conditions such as	gas corrosion (salt, acid, alkali, etc.).				
Before soldering, be sure to preheat components. The preheating temperature should be set so that the temperature difference between the solder temperature and chip temperature does not exceed 150°C.					
Soldering corrections after mounting should be within the range of the conditions determined in the specifications. If overheated, a short circuit, performance deterioration, or lifespan shortening may occur.					
When embedding a printed circuit board where a chip is mounted to a set, be sure that residual stress is not given to the chip due to the overall distortion of the printed circuit board and partial distortion such as at screw tightening portions.					
 Self heating (temperature increase) occurs when the power is turn design. 	ned ON, so the tolerance should be sufficient for the set thermal				
 Carefully lay out the coil for the circuit board design of the non-magr A malfunction may occur due to magnetic interference. 	netic shield type.				
\bigcirc Use a wrist band to discharge static electricity in your body through	the grounding wire.				
O Do not expose the products to magnets or magnetic fields.					
\bigcirc Do not use for a purpose outside of the contents regulated in the de	livery specifications.				
 The products listed on this catalog are intended for use in general electronic equipment (AV equipment, telecommunications equipment, home appliances, amusement equipment, computer equipment, personal equipment, office equipment, measurement equipment, industrial robots) under a normal operation and use condition. The products are not designed or warranted to meet the requirements of the applications listed below, whose performance and/or quality require a more stringent level of safety or reliability, or whose failure, malfunction or trouble could cause serious damage to society, person or property. If you intend to use the products in the applications listed below or if you have special requirements exceeding the range or conditions set forth in the each catalog, please contact us.
