Features

- Easy front (M18 nut) and side (M3 bolt/nut) installation
- NPN open collector / PNP open collector simultaneous output
- Sensing distance: Through-beam type 20m / Retroreflective type 4m / Diffuse reflective type 1m, 300mm
- Small size: W14×H34.5×L28mm
- M.S.R. (Mirror Surface Rejection) function prevents malfunction from reflective objects such as metals or mirrors (retroreflective type)
- Sensitivity adjuster
- Light ON/Dark ON selectable by switch
- Operation indicator (red LED) and stability indicator (green LED)
- · Power reverse polarity protection circuit, Output short over current protection circuit
- Interference prevention function (except through-beam type)
- IP67 protection structure (IEC standard)

Reflective tape (MST Series)

Specifications

Model		BH20M-TDT	BH4M-PDT	BH1M-DDT	BH300-DDT	
Sensing type		Through-beam	Retroreflective (built-in polarized filter)	Diffuse reflective		
Sensing distance		20m	4m ^{*1}	1m ^{×2}	300mm ^{*3}	
Sensing targe	et	Opaque material over Ø20mm	Opaque material over Ø75mm	_		
Hysteresis		_		Max. 20% at sensing distance		
Response tim	ne	Max. 1ms				
Power supply	y	12-24VDC== ±10% (ripple P-P: max. 10%)				
Current cons	umption	Emitter/Receiver : max. 20mA	Max. 30mA	Max. 35mA	Max. 30mA	
Light source		Red LED (660nm)	Red LED (660nm)	Infrared LED (850nm)	Red LED (660nm)	
Sensitivity ad	ljustment	Sensitivity adjuster				
Operation mo	ode	Light ON / Dark ON selectable by switch				
Control output		NPN / PNP open collector simultaneous 2 output Load voltage: max. 26.4VDC Load current: max. 100mA Residual voltage - NPN: max. 1VDC, PNP: max. 2.5VDC				
Protection circuit		Interference prevention function (except through-beam type), power reverse polarity protection circuit, output short over current protection circuit				
Indicator		Operation indicator: red LED Stability indicator: green LED (emitter of through-beam type's power indicator: green)				
Connection		Cable type				
Insulation resistance		Over 20MΩ (at 500VDC megger)				
Dielectric strength		1,000VAC 50/60Hz for 1 minute				
Vibration		1.5mm amplitude at frequency of 10 to 55Hz (for 1 min) in each X, Y, Z direction for 2 hours				
Shock		500m/s² (approx. 50G) in X, Y, Z direction for 3 times				
	Ambient illu.	Sunlight: max. 11,000lx, incandescent lamp: max. 3,000lx (receiver illumination)				
Environment	Ambient temp.	-25 to 55°C, storage: -40 to 70°C				
	Ambient humi.	35 to 85%RH, storage: 35 to 85%RH				
Protection str	ructure	IP67 (IEC standard)				
Material		Case: polycarbonates, LED indicator: polycarbonates, sensing part: polymethyl methacrylate acrylic				
Cable		Ø4mm, 4-wire, 2.1m (emitter of through-beam type: Ø4mm, 2-wire, 2.1m) (AWG24, core diameter: 0.08mm, number of cores: 40, insulator out diameter: Ø1.03mm)				
Accessory	Common	Adjustment screwdriver, fix	ing bracket, M18 fixing nut,	fixing cap, M3 bolt, M3 nut	<u> </u>	
Accessory	Individual	_	Reflector (MS-2A)	<u> </u>		
Approval		C € c(M) or mains				
Weight ^{×4}		Approx. 190g (approx. 120g)	Approx. 140g (approx. 60g)	Approx. 130g (approx. 60g	1)

lpha1: The sensing distance is specified with using the MS-2A reflector. The distance between the sensor and the reflector should be set over 0.1m. When using reflective tapes, the reflectivity will vary by the size of the tape. Please refer to the 🔳 Reflectivity By Reflective Tape Model' table before using the tape.

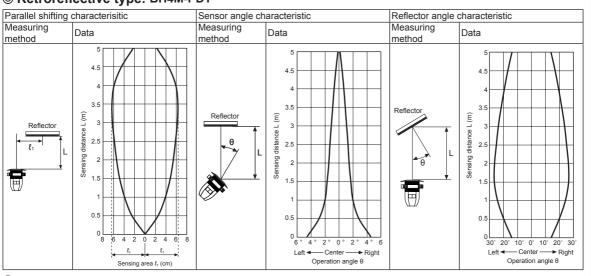

- X2: Non-glossy white paper 300×300mm.
- X3: Non-glossy white paper 100×100mm.
- X4: The weight includes packaging. The weight in parenthesis is for unit only.
- *The temperature or humidity mentioned in Environment indicates a non freezing or condensation.

**The waveforms of "Operation indicator" and "Transistor output" are for Light ON, The waveforms are reversed for Dark ON.

A-16

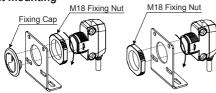

Installation and Sensitivity Adjustment

For mounting

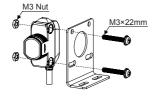

Please use M18 fixing nut or M3 bolt and nut to mount the sensor, and make sure that the tightening torque is under 0.5N·m.

**Exercise caution. Do not apply excessive impact to the unit or bend the cable section. The inside unit may be wet.

<Front mounting>

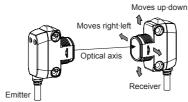

<Side mounting>

Optical axis adjustment

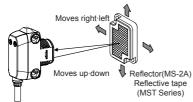

•Through-beam type

Set the emitter and the receiver facing each other and adjust these up-down, right-left after to check the point operating the stability indicator. Fix the emitter and the receiver at the center of the point.

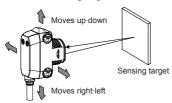

•Retroreflective type

Set the photoelectric sensor and the reflector(MS-2A) or reflective tape facing each other and adjust the reflector up-down, right-left after to check the point operating the stability indicator. Make sure that the sensing side of the sensor is parallel with the reflector

•Diffuse reflective type

After place a sensing target, fix it in the middle of position where the stability indicator operates adjusting the sensor to up-down, right-left. Make sure that the sensing side of the sensor is parallel with the surface of each sensing target.

Operation mode switching

Light ON	Pio Pio	Turn the operation mode selection switch to L/O direction (the end of right).	
Dark ON	No.	Turn the operation mode selection switch to D/O direction (the end of left).	
NET CONTROL OF FRANCISCO CONTROL OF CONTROL			

Sensitivity adjustment

Order	Sensitivity setting	Descriptions
1	(A) ÷	From Light ON status, turn the sensitivity setting adjuster slowly to the right from min. sensitivity (-) and check the position where operation indicator turns on (A).
2	(A) (C) (B)	From Dark ON status, turn the sensitivity setting adjuster further right and check the position where the operation indicator turns on (B). Turn the adjuster left and check the position where the operation indicator turns off (C). If the operation indicator does not turn on at max. sensitivity (+), the maximum sensitivity setting is set at position (C).
3	Optimum sensitivity (A) (C)	Set the adjuster at the center position between (A) and (C) for optimal sensitivity. Also, check if the stability indicator turns off with or without the sensing target. If it does not turn off, please review the operation mode again, as sensitivity may be unstable.

		sensitivity may	be unstable.

Autonics A-17

BH Series

Reflectivity by Reflective Tape Model

MST-50-10 (50×50mm)	60%
MST-100-5 (100×100mm)	80%
MST-200-2 (200×200mm)	140%

- XThis reflectivity is based on the reflector (MS-2A).
- ※Reflectivity may vary depending on usage environment and installation conditions.

The sensing distance and minimum sensing target size increase as the size of the tape increases.

- Please check the reflectivity before using reflective tapes.
- ※For using reflective tape, installation distance should be min. 20mm.
