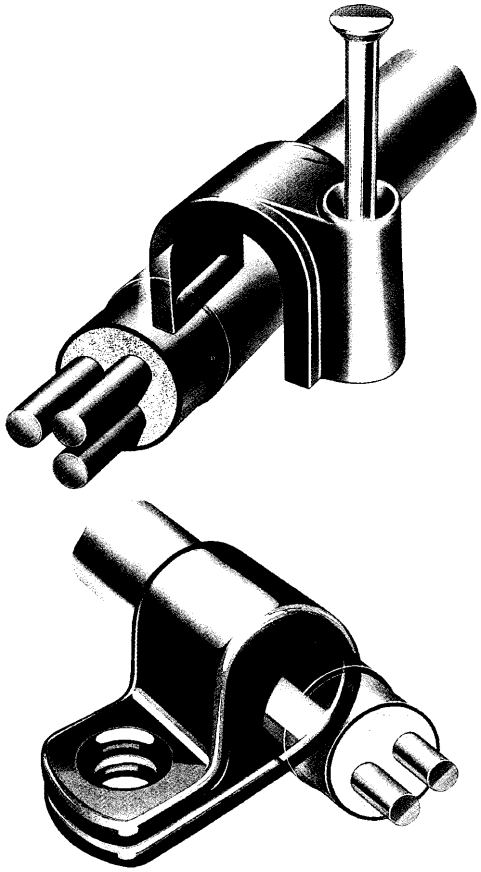
M.I. CLIPS



Tower's all embracing range of mineral-insulated clips, designed to secure single cables, covers all popular sizes.

Two types are available: round plastic (in orange), and PVC-coated copper (in red, white or orange).

2L1	64HJ30/...	Red, orange, white
2L1.5	64HJ32/...	Red, orange, white
2L2.5	64HJ34/...	Red, orange, white
3L1	64HJ32/...	Red, orange, white
3L1.5	64HJ34/...	Red, orange, white
3L2.5	64HJ37/...	Red, orange, white
4L1	64HJ34/...	Red, orange, white
4L1.5	64HJ37/...	Red, orange, white
64HJ30	6.4mm	Cable Diameter Covered
64HJ32	7.0mm - 7.1mm	Cable Diameter Covered
64HJ34	7.6mm - 7.9mm	Cable Diameter Covered
64HJ37	8.3mm - 8.8mm	Cable Diameter Covered

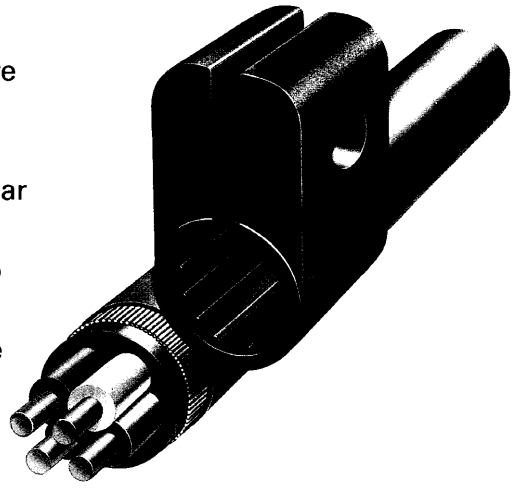
For selection of correct PVC coated copper clip, note size of cable and select either 30, 32, 34 or 37 and colour option Red, White, Orange ie. 2L1.5 red = 64HJ32/R.

CABLE CLEATS

Tower's non-corrosive cleats offer a strong and cost-effective single hole screw fixing for all steel wire armoured cables up to 25mm² three-core PVC/SWA/PVC.

Available in black polyethylene and seven popular sizes, Tower cleats have a high resistance to impact and are stable in temperatures ranging from -35°C to +85°C.

Full details of Tower cable cleats are given in the selection chart.



For selection of correct cleat, look for last digit on the chart
ie. 16mm 4 core = Tower 63SWA11.

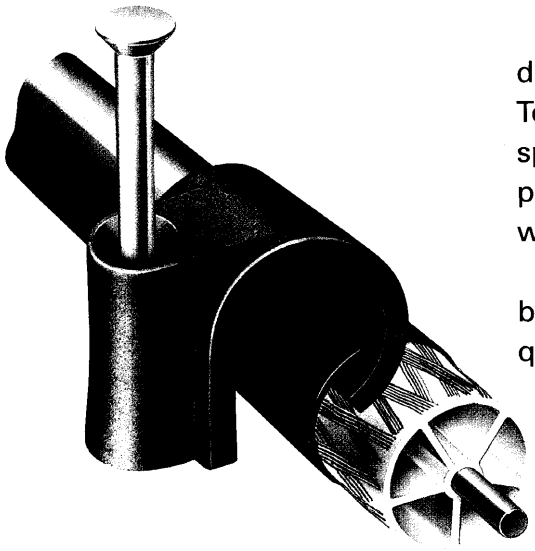
TV CLIPS



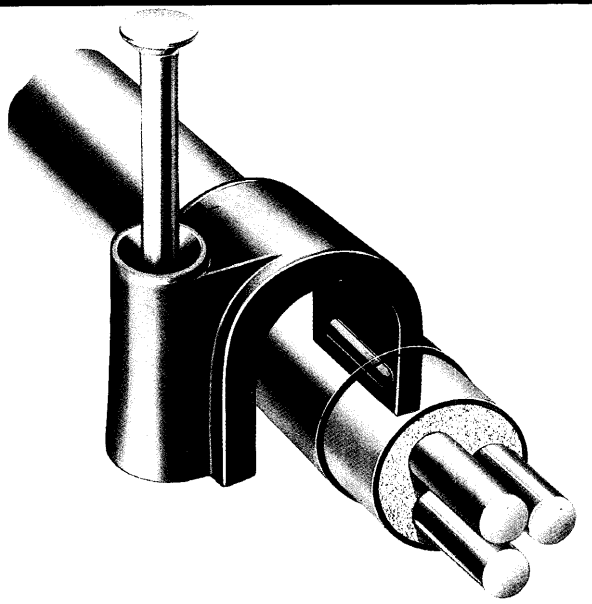
Designed to accommodate the wider dimensions of the latest coaxial cables, Tower TV clips are manufactured from a specially-selected grade of UV stabilised polypropylene which combines strength with elasticity.

The rounded body enables the clips to be attached to the cable prior to fixing, for quicker and easier installation.

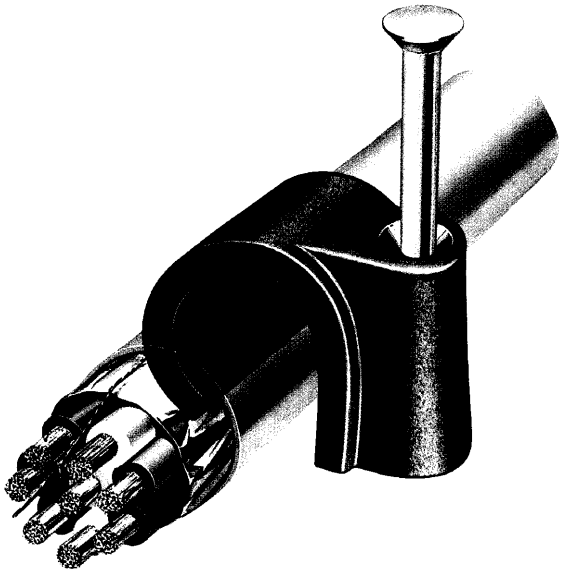
Available in brown, black, white and four sizes, Tower TV clips are the ideal way to secure all antennae cables of 5mm to 12mm inclusive.

R.R. CLIPS

The Tower R.R. range of distinctive red clips has been developed exclusively for use in fire alarm installations, and offers a choice of round (6mm-10mm) or flat (1mm and 2.5mm).



COMMUNICATION CLIPS



In anticipation of the growing need for more and more buildings to incorporate computer, communications and other sophisticated electronic installations, Tower have introduced a comprehensive range of clips dedicated for use with video, computer, multicore, multipair, data and signal cables.

Available in a range of sizes from 4mm to 24mm and a choice of white or black, Tower communication clips are pre-assembled with hardened steel pins.

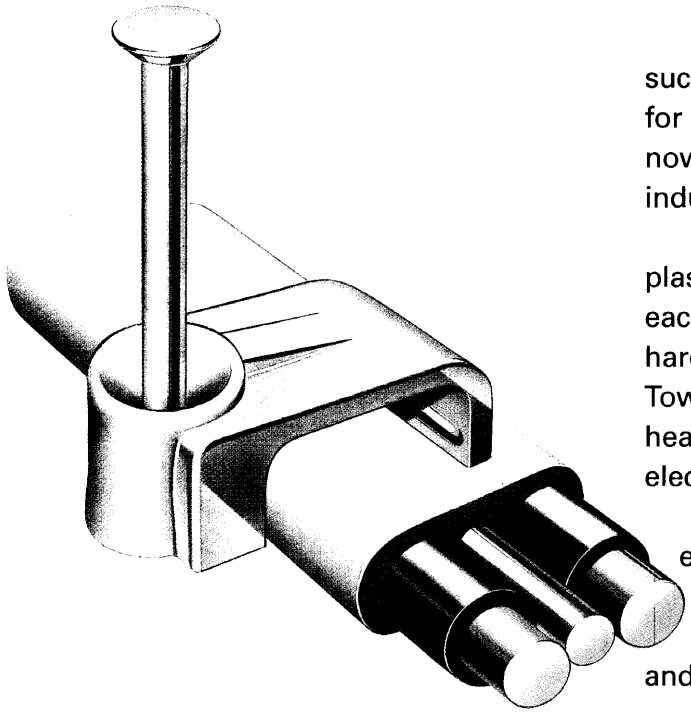
This brochure describes and illustrates the very latest range of Tower cable fixing products.

It's a range which represents nearly one hundred years of continuous research, improvement and development, and is manufactured to the most stringent quality control standards using advanced production techniques. This is why Tower products still stand head and shoulders above the rest for innovative design, quality and sheer value for money.

Today's Tower range of cable fixing products is also the most comprehensive in the UK. Virtually every type of application is catered for – including installation of even the most specialised cables, such as mineral-insulated, communication and steel-wire armoured.

So whatever the job, Tower won't let you down. Such is the strength of Tower.

FLAT CLIPS



The flat clip is one of Tower's many successful innovations. Designed originally for use with twin and earth cables, it has now become the standard clip for the industry.

Made from specially-selected tough plastic to suit application, style and size – each clip includes a pre-assembled hardened steel pin. These pins are made by Tower from high-carbon steel wire that is heat treated prior to bright zinc electroplating.

The Tower range of flat clips encompasses just about every need – from the small, bell-wire P.T. clip to the much larger KF16 clip for 16.0mm^2 twin and earth cables.

ROUND CLIPS

This robust R.C. clip accommodates all manner of flexible cables which have a nominal size of between 2.75mm and 22mm inclusive. It is available in white, grey, black or brown.

Pack quantities vary, as shown in the selection chart.
