EAN 4016032371618

Automatic HDMI Video Switch 2x1 25-225Mhz, resolution up to 1080p W/o USB power cable

You can connect two HDMI devices (for example, a Blu-ray player and a video game console) as a signal source to one HDMI port on your television set using the DIGITUS HDMI Switch. The device automatically detects which signal source is active and then automatically switches to it. The device in question can also be selected manually at the click of a button. The switch is cable powered via HDMI, meaning that a separate power supply unit and tangled wires are therefore no longer a concern.

Enables automatic switching between two HDMI signal sources on one television set
