Safety Precautions

Refer to Warranty and Limitations of Liability.

WARNING

This product is not designed or rated for ensuring safety of persons either directly or indirectly. Do not use it for such purposes.

Precautions for Correct Use

Do not use this product under ambient conditions that exceed the ratings.

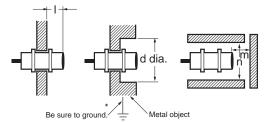

Design

Ambient Environment

The Sensor may malfunction if subjected to water, oil, chemicals, or condensation by falsely detecting these as sensing objects. The E2K-X15M is highly sensitive to inductive objects and can thus be affected even by small quantities of water drops.

Influence of Surrounding Objects

If the Sensor is embedded in metal, maintain at least the following distances between the Sensor and the metal. The Sensor is also affected by other materials, such as resins. Separate the Sensor from other materials by the same distance as for metal.

* Be sure to ground the metal object, otherwise Sensor operation will not be stable

Influence of Surrounding Metal (Unit: mm)

Model Dimension	I	d	m	n
E2K-X4M	20	50	8	60
E2K-X8M			12	
E2K-X15M	10		25	

If a mounting bracket is used, be sure that at least the following distances are maintained.

Influence of Surrounding Metal

(Unit:	mm)
--------	-----

Model Dimension	G	Н
E2K-X4M	20	
E2K-X8M	20	30
E2K-X15M	10	

Mutual Interference

When installing Sensors face-to-face or side-by-side, ensure that the minimum distances given in the following table are maintained.

Н

Mutual Interference

	(
Model Dimension	Α	В	
E2K-X4M	80	70	
E2K-X8M	150	110	
F2K-X15M	300	200	

Sensing Objects

The maximum sensing distance will decrease if the sensing object is a non-grounded metal object or dielectric object.

- Sensing Object Material
- The E2K-X can detect almost any type of object. The sensing distance of the E2K-X, however, will vary with the electrical characteristics of the object, such as the conductance and inductance of the object, and the water content and capacity of the object. The maximum sensing distance of the E2K-X will be obtained if the object is made of grounded metal.
- There are objects that cannot be detected indirectly. Therefore, be sure to test the E2K-X in a trial operation with the objects before using the E2K-X in actual applications.

Effects of a High-frequency Electromagnetic Field

The E2K-X may malfunction if there is an ultrasonic washer, highfrequency generator, transceiver, or inverter nearby. For major measures, refer to Noise of Warranty and Limitations of Liability for Photoelectric Sensors.

Mounting

Do not tighten the nut with excessive force. Always use washers when tightening the nuts and do not exceed the torque in the following table.

Model	Torque	
E2K-X4M	0.78 N⋅m	
E2K-X8M	2 N⋅m	
E2K-X15M		

Miscellaneous

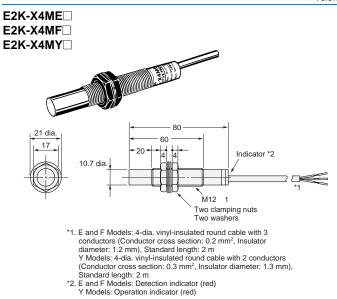

Organic Solvents

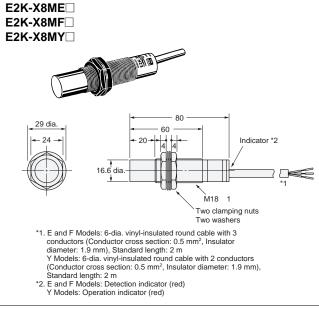

The Sensor has a case made of heat-resistant ABS resin. Be sure that the case is free from organic solvents or solutions containing organic solvents.
