

The following information satisfies the requirement for providing users with information about articles containing SVHC per Article 33 of the REACH Regulation (EC) No. 1907/2006

Company	Amphenol Ltd		
Contact	info@amphenol.co.uk		
Substance(s)	<u>Name</u> Cadmium	<u>CAS number</u> 7440-43-9	<u>SVHC Decision Number</u> ED/69/2013
Risk Assessment	<p>The use of cadmium as a plating finish has been much reduced over the years, but it still has an important role in safety critical applications.</p> <p>As a plated surface on a component, cadmium does not represent a risk to health - cadmium is not easily absorbed through the skin, so handling cadmium plated items poses no risk to the user.</p> <p>The main risk to health is cadmium dust or vapour, which can be generated by, for example machining cadmium, or welding it. The main route of entry into the body is via inhalation, followed by ingestion. If it corrodes, cadmium forms a white crystalline cadmium salt deposit on the surface of the plating, and this can represent a health risk if not handled properly. The deposit may enter the body through inhalation if it becomes airborne (eg when the packaging around the part is opened) or ingestion (if a person eats or smokes without washing their hands after touching the deposit).</p> <p>Cadmium, and the compounds formed when it corrodes, are toxic by ingestion, acutely toxic if inhaled, may cause cancer, and are suspected of being able to cause genetic defects, damage fertility and be harmful to the unborn child.</p>		
Handling Instructions	<p>No precautions are required for handling cadmium plated items in the as-supplied condition.</p> <p>It is recommended that cadmium plated articles should not be heated (eg welded) or machined by the end user.</p> <p>If it is necessary to handle products with corroded cadmium plating then suitable gloves and respiratory protection should be worn and care taken to minimise the corrosion products becoming airborne.</p>		
Disposal Instructions	The article should be disposed of in accordance with all applicable governmental regulations relevant to the geographical location.		

X-ON Electronics

Largest Supplier of Electrical and Electronic Components
