

Contrast scanner with dynamic Teach-in

The KT 5G-2P/N___3 provides a high degree of user-friendly operation and detection reliability. This is the result of the dynamic Teach-in procedure in connection with the automatic light transmitter selection.

You can set the optimum switching threshold without stopping the machine, either using the push button on the equipment or an external impulse via the control wire. The equipment selects the light source between the red, blue and green transmission LED automatically, which achieves the respectively best contrast and consequently the highest possible detection reliability.

Especially in applications with a high throughput performance, e.g., packaging machines and fill lines, these features contribute to economical system operation because they are interruption-free. The same applies to highly flexible production processes where it is necessary to adapt contrast scanners fast and inexpensively.

Teach-in: setting switching threshold

Status

- The switching threshold is set automatically in the middle between the reception signals from the background and mark.
- The optimum transmission light was selected automatically.

Notes

- At least one repetition length must pass through the light spot with the material to be scanned.
- The material speed during Teach-in procedures is min. 25 mm/s and max. 300 mm/s.
- The Teach-in button can be locked against unintentional activation with "Run".
A Teach-in procedure can be triggered when the switch setting is not defined.

Scanning distance
10/20 mm

Contrast scanners

- Dynamic Teach-in
- Automatic light transmission selector, red, blue and green
- Teach-in: button on unit or via control cable
- L/D adjustable on unit or via control cable
- Switching frequency 10 000/s

Adjustments possible

All types

- 1 Lens (light transmission), can be replaced by item 4
- 2 M5 mounting holes, 5.5 mm deep
- 3 See dimensional drawing of lens
- 4 Blind screw, can be replaced by item 1
- 5 5-pin, M12 x 1 plug (rotatable through 90°)
- 6 Function signal indicator (yellow)
- 7 L/D pre-selection switch
- 8 Teach-in button

Connection type

All types

5-pin, M12 x 1
