

SR 3 Switch Rockers were developed to provide the reliability required in demanding environmental conditions such as multifunction grips, dashboards or armrest controls for heavy duty industrial applications.

The switching system is distinguished by its high reliability with a life expectation of at least one million operations. The rocker modules have been designed for the typical switching function in 'off-road' machinery and other rough environments.

## Main Features

- Life greater than 1 million cycles
- Precise tactile feedback of switches
- Protection Class IP65
- K12 switch technology for high reliability
