Complete pre-cabled beacons and indicator banks and separate components for customer assembly

Complete pre-cabled beacon XVD fitted with "flash" discharge tube

Complete pre-cabled indicator bank XVD fitted with 2 illuminated units and 1 audible unit

Presentation

Ø 70 mm beacons and indicator banks type XVD are available in 2 forms:

■ **Complete pre-cabled products**

Depending on the model, they are "ready to use":

- with 1, 2, 3 or 4 illuminated signalling units (light source included),
- with or without "flash" unit,
- with or without audible signalling unit (buzzer),
- with fixing base.

The complete pre-cabled indicator banks cannot be modified due to the wiring.

■ **Customer assembled products**, using separate components for customised configuration.

Light signalling

■ 6 catalogued illuminated unit lens colours (green, red, orange, blue, clear and yellow) are available as separate components. These illuminated units can be fitted with steady or flashing light signalling LEDs which provide a long service life by considerably reducing heating and power consumption. However, incandescent bulbs can also be used.

■ A light diffuser, pre-fitted in illuminated units with a base mounted LED (1), distributes the light evenly over the lens surface. When using the indicator banks in bright ambient light conditions, remove the diffuser to improve contrast.

■ Some complete pre-cabled beacon and indicator bank models are available with a 5 Joule orange or red "flash" unit, but other colours (green, blue, yellow and clear) can be ordered as separate components.

Audible signalling

Complete pre-cabled indicator banks are supplied with or without an audible unit (buzzer), depending on the model selected.

- The volume of the audible signal is adjustable up to a value of 90 decibels at a distance of 1 m.
- Microswitches located in the audible unit enable selection of the signal frequency: continuous or intermittent tone.

Cabling and mounting

■ Complete pre-cabled Ø 70 mm beacons and indicator banks XVD have 300 mm long connecting wires protruding from the fixing base.

□ The wires have bared ends to enable direct connection, without the need for wire stripping etc. A label attached to the common (black wire) details the wire colour and associated unit in the bank, from bottom to top:

- brown: 1st unit,
- grey: 2nd unit,
- violet: 3rd unit,
- blue: 4th unit.

□ The connections to customer assembled products are made to a removable terminal block incorporated in the base unit.

■ The fixing of the combined units is assured by a single screw, the length of which depends on the number of units in the bank.

(1) Diffuser not compatible with units fitted with an incandescent bulb or "flash" discharge tube.

Description

Complete pre-cabled Ø 70 mm beacons and indicator banks XVD

The assembled beacons comprise:

- 1 an illuminated unit with "flash" discharge tube (included) and orange or red lens,
- 2 a base unit,
- 3 a 100 mm high plastic fixing base (support tube with integral fixing plate), for raising the beacon 80 mm,
- 4 different coloured connecting wires with bared ends, length protruding from support tube: 300 mm.

The assembled indicator banks comprise:

- 5 a cover,
- 6 two, three or four illuminated units with red, green, orange or clear lens (depending on model) and light source (included),
- 7 an audible unit (buzzer), depending on model,
- 8 a base unit,
- 9 a 100 mm high plastic fixing base (support tube with integral fixing plate), for raising the indicator bank 80 mm,
- 10 different coloured connecting wires with bared ends, length protruding from support tube: 300 mm.

XVD B2SGR = indicator bank for \approx 24 V supply voltage comprising a buzzer, one green lens illuminated unit and one red lens illuminated unit, both fitted with an LED.

Customer assembled Ø 70 mm indicator banks XVD

A **customised** indicator bank can be obtained by assembling:

- 1 a cover and a base unit incorporating a removable terminal block (3) with bottom cable entry,
- 2 a fixing screw for the combined units (4),
- 3 5 illuminated units maximum (5) with red, orange, green, blue or clear lens, light source not included (6),
- 4 a light diffuser (accessory that is only compatible with illuminated units fitted with an LED),
- 5 an illuminated unit with integral "flash" discharge tube (always mounted at the top of the bank),
- 6 an audible unit (buzzer),
- 7 a fixing base comprising an aluminium support tube glued into a plastic fixing plate, for raising the indicator bank by 80, 380 or 780 mm,
- 8 a plastic fixing base (support tube with integral fixing plate), height 100 mm,
- 9 a zamak fixing plate for use on a vertical support,
- 10 Base mounted LED,
- 11 Incandescent bulb.

(1) This table is purely for information and must not be used to create references.

(2) Not indicated, default value.

(3) Electrical connections to removable terminal block to be made by user.

(4) Variable length screw depending on the number of units to be combined. To be ordered separately, see page 35096-EN_Ver3.0/6.

(5) Maximum configuration possibilities:

- 5 illuminated units mounted on base unit.
- 4 illuminated units + 1 "buzzer" mounted on base unit.

(6) Incandescent bulbs or LEDs to be ordered separately, see page 35096-EN_Ver3.0/7.
