## Power Bridge Rectifiers

## SKD 83

## Features

- Glass passivated silicon chips
- Low thermal impedance through use of direct copper bonded aluminum substrate (DCB) base plate
- Blocking voltage up to 1800 V
- Suitable for PCB mounting and wave soldering
- For applications with high vibrations we recommend to fasten the bridge to the pcb with 4 selftapping screw

## Typical Applications*

- Three phase rectifiers for power supplies
- Input rectifiers for variable frequency drives
- Rectifiers for DC motor field supplies
- Battery charger rectifiers

1) Freely suspended or mounted on an insulator
2) Mounted on a painted metal sheet of min. $250 \times 250 \times 1 \mathrm{~mm}$
3) $\mathrm{T}_{\text {solder }}=250 \pm 10^{\circ} \mathrm{C}(10 \mathrm{~s})$
