

# Ti400, Ti300 and Ti200 Advanced Performance Infrared Cameras

## **Technical Data**

A new generation of tools with next generation performance.

This trio of new Fluke infrared cameras is equipped with LaserSharp™ Auto Focus. Yes, there are other auto focus systems on the market but Fluke took it one step further so you get in-focused images, Every. Single. Time. Every infrared camera user knows that focus is the single most important thing to ensure when conducting an infrared inspection. Without an in-focus image temperature measurements may not be accurate and it's much easier to miss a problem. LaserSharp auto focus tells you exactly where you are focusing. It uses a laser to calculate the distance to your target before it focuses. Place the red laser dot on the object you are inspecting, then pull and release the trigger for a perfect in-focus image.

- Capture up to five additional measurements with CNX™ Wireless System for more complete analysis and reporting\*
- Detect and communicate issues faster with patented Fluke IR-Fusion<sup>®</sup> technology with AutoBlend<sup>™</sup> mode
- Faster communication with wireless image transfer directly to your PC, Apple\* iPhone\* or iPad\*
- · One-handed, easy-to-use user interface
- Ruggedized high resolution 640x480 capacitive touch screen for quick menu navigation
- Capture additional digital images to show location or additional site details with IR-PhotoNotes™ Annotation System
- · Standard and radiometric video recording\*
- Streaming video (USB and HDMI)
- Text\* and voice recording and annotation gets additional details saved with the image file
- Optional interchangeable lenses for greater flexibility in additional applications
- High-temperature measurement (up to 1200 °C on the Ti400)
- Included SmartView\* and SmartView Mobile App Analysis and Reporting Software
- \*Coming soon via firmware update.

Announcing the new SmartView<sup>®</sup> Mobile App

Bring your office to your inspection site with the SmartView Mobile App. Create an inspection report on site and communicate directly to your client or manager via your Apple<sup>®</sup> iPhone<sup>®</sup> or iPad<sup>®</sup>.

 $\mbox{\sc Optimize:}$  Adjust the image to present problems in the most effective way.

**Analyze:** Use markers and other tools to quantify the severity of problems.

**Communicate:** Share inspection results by emailing images or reports to:

- Plan next steps or gain approval for work done before you even leave the job site
- If needed, get assistance analyzing the problem

  Fluke SmartView Mobile will increase the return on your infrared camera investment.
