

FE3000 is an electrically driven filter unit with very low noise level and high suction capacity. The filter unit has inlets for two soldering irons. The unit cleans the process air through a pre filter and a main filter system.

The high effective and reliable filter system guarantees a high separation degree of both particles and gases.

TECHNICAL DATA Max connected soldering irons Height/ Width Weight Sound level, at 1 meter

2 pcs 33,5/28 mm 6,7 kg 42 dB(A)

Suction capacity>50 l/mMicro filter, separation degree>99,99 %Gas filter, separation degree>99 %Voltage115/240 V

Filtronic AB is striving to create a better workbench environment by developing and producing particle and gas filter systems of very high quality. The filter systems have a long filter lifetime and low energy costs, are easy install, have a low noise level and a guaranteed function of both gases and particles.
