

Key Features

- Compact size
- Flexible connector and cable options
- Wide frequency range
- Ground plane independent
- RoHS compliant

General Description

Siretta multipurpose PCB antennas are based on an efficiently tuned element, matched with a wide variety of RF & M2M modules operating on Cellular, 868 and 2.4GHz ISM band frequencies. It is designed for embedded applications.

Proven in many applications where space is at a premium, Echo 2 is ground plane independent and compact making it a popular choice where a small size combined with efficient performance is critical. Wide ranging connector and cable options also makes it a viable antenna where a quick design in and fast time to market is important.

Additional Considerations

- Allows minimum flexibility of ease of integration into small devices.
- Easy selection makes antenna suitable for many modules.
- Operates on worldwide GSM / GPRS networks.
- As 3G and ISM telemetry equipment does not require ground plane making it suitable for space restricted applications.
- Meets all EU compliance criteria for electronic goods.
