SM99 and SR99

Compact Single Pole Terminal Blocks - Quick, Safe, Reliable.

safe & convenient

6.6 mm

Members of METZ CONNECT

SM99|SR99

The SM99 and SR99 single pole Terminal Blocks are compact in design with a height of 6.6 mm and accept wire cross sections up to 1.5 sqmm. The finger push button facilitates quick and easy conductor insertion and release. An in-built inspection window allows users to visually ensure the conductor is inserted in to the connector correctly. The continuity test point allows the users to make an electrical check to confirm the correct connections are made. Packaged in Tape on Reel and suitable for reflow solder processes, the single pole Terminal blocks offer maximum flexibility in PCB design due to the different orientation and placement possibilities. This means that SM99 and SR99 are ideally suited for many applications within industrial and building automation.

- Single spring clamp terminal block, SMT and THR designs
- Connection direction 90°
- Reflow-capable according to JEDEC 20 MSL 1
- Automation-compliant packaging (Tape & Reel)
- Compact design (SM99: 5.8 x 6.6 x 14.5 mm (w x h x d))
- Finger push-button
- Visual Inspection Window
- Continuity Test Point
- Single-wire cable range 0.2–1.5 mm²
- Nominal current 9 A
- Colour coded finger actuators
