

112A Probe-Type N Cable

The 112A cable is designed to connect the 100 series probes to spectrum analyzers or other instruments with Type N connectors. This double-shielded cable has good RF performance from DC to 6 GHz. Its narrow diameter gives the 112A cable high flexibility, making it convenient and kink-free when using the probes manually.

One end of the cable has a female SMB connector to connect to the probes, and the other end is a male Type N connector. This allows it to connect to spectrum analyzers or other equipment with female Type N connectors.
