Vida Flex Monofil PET FR Sleeving

Description

Vidaflex Monofil PET FR is an expandable sleeving produced from braided flame retardant polyester monofilaments. The yarn is treated with a non-burning agent. The special braid construction permits the sleeving bore to be expanded up to 300% and a particular feature is the retention of roundness.

The product is flame retardant and will operate at temperatures within the range -50°C to +150°C. It has excellent resistance to damage by mechanical abrasion and repeated flexing. The monofilaments will resist attack by salt water, oils and most common fuels and solvents.

Applications

- · Cable management (audio/video)
- · Automotivel Hydraulic hoses, tubing and wiring harnesses.

Features

- · Flame retardant
- · Flexible and expandable
- · Easy installation

Part Number Table

| Description | Internal Dia. (mm) | Min. Bundle Dia. (mm) | Max. Bundle Dia. (mm) | Length | Part Number |
|-----------------------------|-----------------------|--------------------------|--------------------------|--------|-------------------------|
