Loop Powered!

The OMEGA® 2-wire connector-transmitters are high-performance, low-cost, industrial RTD and thermocouple transmitters. Both feature an encapsulated micro miniature signal conditioner built into the connector housing. The SPRTX signal conditioner converts the resistive change of a 100 Ω, 0.00385 RTD sensor or probe across a dedicated temperature range into an industry-standard 2-wire, 4 to 20 mA analog output. The STCTX signal conditioner amplifies the non-linear millivolt output of a thermocouple sensor

or probe across a dedicated temperature range, providing an amplified, industry-standard, 2-wire 4 to 20 mA output.
