Industrial LED Lighting Specialists

Professional Lighting Guide

**2017 WINTER EDITION**

Established in 1981 as a lighting supplier, Unilite has grown into one of the world's leading flashlight manufacturers in the global illumination market.

[www.unilite.co.uk](http://www.unilite.co.uk)

With over 36 years of experience in the lighting market... we deal with a wide spectrum of businesses in a variety of professional industries.

**Unilite was first established back in 1981 in the UK and has rapidly grown year upon year to become one of the world's leading flashlight manufacturers and developers. We boast over 4000 clients around the globe and in the last 5 years particularly, growth has been so dramatic that we have had to move premises. January 2018 will see the move to our brand new purpose built offices and warehouse space in the West Midlands, more than trebling our capacity.**

It is often said that not all torches are created equal. Some are constructed with high quality materials such as die cast aluminium or industrial strength copolymer. Some feature the highest quality LED chips available and others feature the ergonomic user-friendly portability and comfort. We at Unilite believe that all lights should have these important facets built into their very makeup and it is for that reason why we make sure all of our units are constructed in this way. To guarantee the quality of these units, we endeavour through a rigorous testing and comprehensive manufacturing process. Here we scrutinise each and every aspect of our entire product range in order to iron out any problems and achieve our aim of creating the best possible torches that we can.

From our large scale manufacturing complex and in-house laboratories, Unilite have been investing considerably in new areas such as dual power technology, remote control activation, electronic dimming configuration and thermal cooling systems. Through ongoing investment and research, we are able to continually improve upon everything from lenses to reflectors, beam distance, run time, impact resistance, water resistance, light output and more.

Advancements in LED technology has helped Unilite to raise the bar as we endeavour for greater power and portability.

We are excited to introduce our new range of lighting products...

# INTRODUCING OUR NEW ALUMINIUM FOCUS FLASHLIGHTS

Introducing our new range of three aluminium focus flashlights. All three are constructed from aircraft grade die cast aluminium and have Unilite's new easy slide push/pull speed focus technology allowing you to change from a smooth flood of light to spot beam in seconds with ease. Durable, and powerful, with all the usual safety aspects, Unilite doesn't do anything by half. Our range of 3 flashlights are great for a vast array of situations, such as policemen and security guards to electricians and plumbers, as well as many other professions and leisure activities.

Our smallest flashlight is by no means weak. The USB rechargeable UK-P2R penlight produces 210 lumens from its white LG LED with a 35 metre beam range, and at 52g you have power in a pint size form. Comprising of a 3.7v 320 mAh Li-ion battery, it has multiple lighting modes, including a two staged dimming function. IPX4 the penlight is fully weatherproof for all conditions. USB rechargeable with a pocket clip attachment also make the UK-P2R easy to store and charge on the move.

The middleweight flashlight is the UK-F2, and produces 375 lumen output from its high power white CREE LED.

It has multiple lighting modes, including two dim settings, and an 8hz flash for emergency use. IP66 rated the flashlight is tough and suitable for all conditions, and at 150g once the 2 x AA Alkaline batteries are installed, it's the perfect hand held flashlight.

The UK-F4 is a high powered flashlight with 450 lumen output from its high power white CREE LED. A powerful in built convex lens helps to power the focused beam to an impressive distance of 285m, making it ideal for close up or distance work. Comprising 4 x AAA Alkaline batteries, it's small and compact and weighs only 172g. Die cast aluminium the flashlight is also super robust, and will withstand impacts up to 1m.

## PROSAFE<sup>®</sup>

# STRENGTH AND ENDURANCE

Unilite Prosafe LED torches, head torches, inspection lights, lanterns, site lights and batteries are built to last. Industrial strength materials ensure that products can endure the harshest of working environments. Products in the Prosafe range are ideal for electricians, plumbers, builders, emergency services and rail engineers. All our LED torches use high quality Samsung LED chips from leading manufacturers CREE, Luxeon, LG & Seoul. Hi visibility yellow in colour, all torches are easily identifiable and made with the users' safety as its priority. Partnerships with 3M also add extra safety features to Prosafe items such as reflective materials.

# HIVIS<sup>®</sup>

## EXTREME POWER

Unilite Hi-Vis is the first name for industrial LED torches, head torches, lanterns and batteries. Made from aircraft grade aluminium, synthetic grade rubber and industrial copolymer the Hi-Vis range are robust portable LED lights for industry professionals. All LED torches feature great weatherproof abilities and are super bright using high end LED chips from CREE, LG, Luxeon and Seoul. The high power torches in this range are hi-vis aiding use in poorly lit areas. This allows users to complete tasks safe and effectively.
