HAND TOOLS

Fact Finder on: MECHANICS VICES

RECORD MECHANICS VICES ARE THE MOST WIDELY USED OF ALL METALWORKING VICES AND WILL BE FOUND IN SCHOOLS, COLLEGES AND ENGINEERING WORKSHOPS, NOT ONLY IN BRITAIN, BUT ALL OVER THE WORLD.

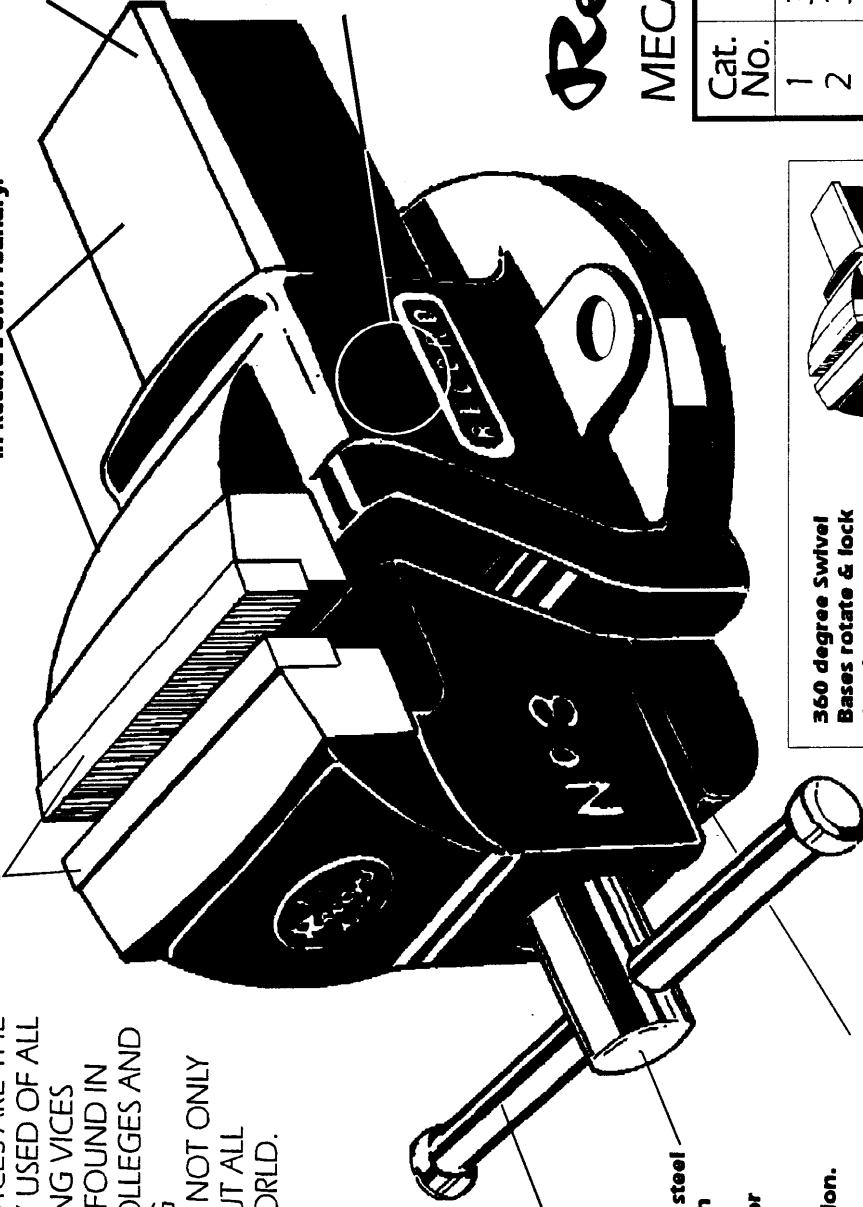

Batch Tested body & slide castings produced in Record's own foundry.

Replaceable Hardened Steel jaws.

Safety stop prevents the slide from being accidentally separated from the body

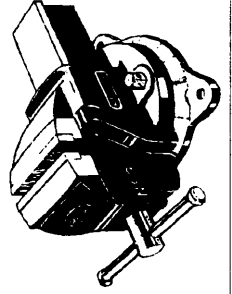

Internal, Unbreakable Nut takes the load, secures & aligns the mainscrew and can be replaced when worn - saving the cost of replacing the whole vice body.

'Fused' steel handle will bend before the vice can be overstressed.

CNC machined steel mainscrew with rolled, 2-Start, Acme thread for strength, wear resistance, & smooth operation.

Fully machined on all load bearing surfaces.

360 degree Swivel Bases rotate & lock the vice at the best working angle. They are available on all but the No. 0 & 2 as standard fittings or optional extras.
