

# DATA SHEET

# **GENERAL PURPOSE CHIP RESISTORS** RC0402

5%, 1% RoHS compliant

# YAGEO Phícomp

Chip Resistor Surface Mount | RC | SERIES | 0402 (RoHS Compliant)

8

# <u>SCOPE</u>

This specification describes RC0402 series chip resistors with lead-free terminations made by thick film process.

# APPLICATIONS

• All general purpose application

# **FEATURES**

- RoHS compliant
  - Products with lead free terminations meet RoHS requirements
  - Pb-glass contained in electrodes
  - Resistor element and glass are exempted by RoHS
- Reducing environmentally hazardous wastes
- High component and equipment reliability
- Saving of PCB space
- None forbidden-materials used in products/production
- Halogen Free Epoxy

# ORDERING INFORMATION - GLOBAL PART NUMBER & 12NC

Both part numbers are identified by the series, size, tolerance, packing type, temperature coefficient, taping reel and resistance value.

# YAGEO BRAND ordering code

## **GLOBAL PART NUMBER (PREFERRED)**

| RC0402 | <u>X</u> | <u>R</u> | =   | <u>XX</u> | <u>XXXX</u> | L   |  |
|--------|----------|----------|-----|-----------|-------------|-----|--|
|        | (I)      | (2)      | (3) | (4)       | (5)         | (6) |  |

#### (I) TOLERANCE

 $F = \pm 1\%$ 

 $J = \pm 5\%$  (for Jumper ordering, use code of J)

## (2) PACKAGING TYPE

R = Paper / PE taping reel

## (3) TEMPERATURE COEFFICIENT OF RESISTANCE

- = Base on spec

#### (4) TAPING REEL

- 07 = 7 inch dia. Reel
- 10 = 10 inch dia. Reel
- 13 = 13 inch dia. Reel

# (5) RESISTANCE VALUE

There are  $2\sim4$  digits indicated the resistor value. Letter R/K/M is decimal point, no need to mention the last zero after R/K/M, e.g. IK2, not IK20.

Detailed resistance rules show in table of "Resistance rule of global part number".

#### (6) OPTIONAL CODE

L = optional symbol <sup>(Note)</sup>

| Resistance rule                | e of global part                        |
|--------------------------------|---|
| Resistance code ru             | ule Example                             |
| DI                             | DI = Dummy                              |
| 0R                             | 0R = Jumper                             |
| XRXX<br>(1 to 9.76 Ω)          | R =   Ω<br> R5 =  .5 Ω<br>9R76 = 9.76 Ω |
| XXRX<br>(10 to 97.6 Ω)         | IOR = IO Ω<br>97R6 = 97.6 Ω             |
| XXXR<br>(100 to 976 <b>Ω)</b>  | 100R = 100 Ω                            |
| XKXX<br>(1 to 9.76 K <b>Ω)</b> | IK = 1,000 Ω<br>9K76 = 9760 Ω           |
| XMXX<br>(1 to 9.76 M <b>Ω)</b> | IM = 1,000,000 Ω<br>9M76= 9,760,000 Ω   |

## **ORDERING EXAMPLE**

The ordering code of a RC0402 chip resistor, value 56  $\Omega$  with ±1% tolerance, supplied in 7-inch tape reel is: RC0402FR-0756R(L).

#### NOTE

- All our RSMD products meet RoHS compliant. "LFP" of the internal 2D reel label mentions "Lead Free Process"
- On customized label, "LFP" or specific symbol printed and the optional "L" at the end of GLOBAL PART NUMBER / 12NC can be added (both are on customer request)

| (2) The subsequent 4 or 5 digits indicate the resistor tolerance and<br>packaging.   |   |  |     |           | e and                    | 100 to 976  | δ ΚΩ     |                                      | 4           |             |
|  |   |  |     |           | with the                 | l to 9.76 l | MΩ       |                                      | 5           |             |
| (3) The remaining 4 or 3 digits represent the resistance value with the<br>last digit indicating the multiplier as shown in the table of |   |  |     |           | with the                 | 10 to 97.6  | MΩ       |                                      | 6           |             |
|  | ast digit   |  | • · |           |                          |             | Example: | 0.02 Ω                               | =           | 0200 or 200 |
| (4) "L" is optional symbol <sup>(Note)</sup> .   |   |  |     |           |                          |             | 0.3 Ω    | =                                    | 3007 or 307 |             |
|  |   |  |     |           |                          |             | IΩ       | =                                    | 1008 or 108 |             |
|  |   |  |     |           | lerance.                 |             | 33 KΩ    | =                                    | 3303 or 333 |             |
| suppli   | The ordering code of a RC32 resistor, value 56 $\Omega$ with ±1% tolerance, supplied in tape of 10,000 units per reel is: 232270675609(L) or RC0402FR-0756R(L). |  |     |           |                          |             |          | 10 MΩ                                | =           | 1006 or 106 |

## NOTE

- I. All our RSMD products are RoHS compliant. "LFP" of the internal 2D reel label mentions "Lead Free Process"
- 2. On customized label, "LFP" or specific symbol printed and the optional "L" at the end of GLOBAL PART NUMBER / 12NC can be added (both are on customer request)

For further marking information, please see special data sheet "Chip resistors marking".

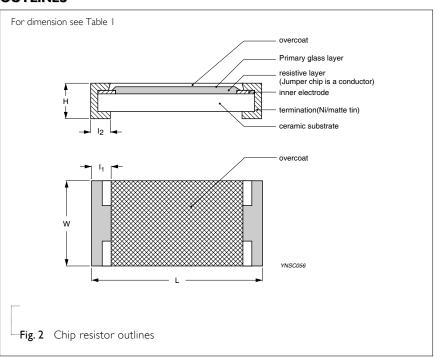

# CONSTRUCTION

The resistor is constructed on top of a high-grade ceramic body. Internal metal electrodes are added on each end to make the contacts to the thick film resistive element. The composition of the resistive element is a noble metal imbedded into a glass and covered by a second glass to prevent environment influences. The resistor is laser trimmed to the rated resistance value. The resistor is covered with a protective epoxy coat, finally the two external terminations (matte tin on Nibarrier) are added. See fig.2

|              |                       | 10" (254 mm)          | 20,000 units      |
|              |                       | 13" (330 mm)          | 50,000 units      |

# NOTE

1. For paper tape and reel specification/dimensions, please see the special data sheet "Packing" document.

## FUNCTIONAL DESCRIPTION

#### **POWER RATING**

RC0402 rated power at 70°C is 1/16 W

## **R**ATED VOLTAGE

The DC or AC (rms) continuous working voltage corresponding to the rated power is determined by the following formula:

 $V=\sqrt{(P \times R)}$  or max. working voltage whichever is less

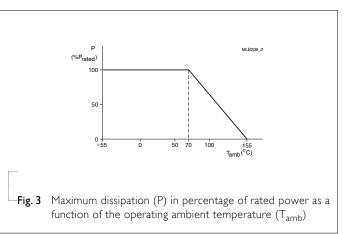

# Where

Jul 15, 2008 V.3

V=Continuous rated DC or AC (rms) working voltage (V)

P=Rated power (W)

R=Resistance value ( $\Omega$ )

| TEST TEST METHOD |                            | PROCEDURE   | REQUIREMENTS               |  |  |  |
|------------------|----------------------------|---|----------------------------|--|--|--|
| Solderability    |                            |   |                            |  |  |  |
| - Wetting        | IPC/JEDECJ-STD-002B test B | Electrical Test not required  | Well tinned (≥95% covered) |  |  |  |
|                  | IEC 60068-2-58             | Magnification 50X   | No visible damage          |  |  |  |
|                  |                            | SMD conditions:   |                            |  |  |  |
|                  |                            | I <sup>st</sup> step: method B, aging 4 hours at 155 °C<br>dry heat |                            |  |  |  |
|                  |                            | $2^{nd}$ step: leadfree solder bath at 245±3 °C                     |                            |  |  |  |
|                  |                            | Dipping time: 3±0.5 seconds   |                            |  |  |  |
|                  |                            |   |                            |  |  |  |
| - Leaching       | IPC/JEDECJ-STD-002B test D | Leadfree solder, 260 °C, 30 seconds                                 | No visible damage          |  |  |  |
| -                | IEC 60068-2-58             | immersion time  | U U                        |  |  |  |
|                  |                            |   |                            |  |  |  |
| - Resistance to  | MIL-STD-202G-method 210F   | Condition B, no pre-heat of samples                                 | ±(1%+0.05 Ω)               |  |  |  |
| Soldering Heat   | IEC 60068-2-58             | Leadfree solder, 270 °C, 10 seconds                                 | <50 m $\Omega$ for Jumper  |  |  |  |
|                  |                            | immersion time  | No visible damage          |  |  |  |
|                  |                            | Procedure 2 for SMD: devices fluxed and<br>cleaned with isopropanol |                            |  |  |  |
|                  |                            |   |                            |  |  |  |

Chip Resistor Surface Mount RC SERIES 0402 (RoHS Compliant)

REVISION HISTORY

| REVISION  | DATE         | CHANGE NOTIFICATION | DESCRIPTION   |
|-----------|--------------|---------------------|---|
| Version 3 | Jul 15, 2008 | -                   | - Change to dual brand datasheet that describe RC0402 with RoHS compliant |
|           |              |                     | - Description of "Halogen Free Epoxy" added                               |
|           |              |                     | - Define global part number   |
| Version 2 | Sep 03, 2004 | -                   | - New datasheet for 0402 thick film 1% and 5% with lead-free terminations |
|           |              |                     | - Replace the 0402 part of pdf files: RC01_11_21_31_5, RC02_12_22_32_10   |
|           |              |                     | - Test method and procedure updated                                       |
|           |              |                     | - PE tape added (paper tape will be replaced by PE tape)                  |
| -         |              |                     |   |
