

## Key Features \& Benefits

- RoHS lead free solder and lead solder exempted products are available
- High density front-ends 10.5 to $16.1 \mathrm{~W} / \mathrm{in}^{3}$
- Universal input voltage range (90-264 VAC) with PFC
- 1 U or 2 U height configurations
- Droop current share with ORing FETs
- $\mathrm{I}^{2} \mathrm{C}$ interface status and control
- Standby voltage of 12 VDC @ 0.5 A
- Overtemperature, overload, and overvoltage protection
- Status LEDs: AC OK, DC OK, Overtemperature
- FNP850-12 model has airflow direction from front-to-rear or from rear-to-front (-12R model)
- ON/OFF Enable switch - shuts OFF Vo1; Vaux and fan are operational.

## FNP600/850/1000 AC-DC Power Supply FNR-5-12G/FNR-5-48G Power Shelves

The FNP600/850/1000 power factor corrected (PFC) front ends provide (depending on model) either a 12 VDC or a 48 VDC output for telecom, datacom, and other distributed power applications. Their small 1U by 2 U size allows for configurations of either height in hotswap redundant systems while their internal fan and cooling design permits wide use with reliable operation.

Status is provided with front panel LEDs, logic signals, and via the $\mathrm{I}^{2} \mathrm{C}$ management interface bus. In addition, the $I^{2} \mathrm{C}$ bus can enable the power supply, control fan speed, and on the 12 VDC models it allows for adjusting the output voltage from 7 to 12 VDC. This powerful feature allows the same power supply to be used in various applications where bus voltages driving isolated dc-dc converters and POL regulators may be different.

Also, the FNP850-12R is uniquely designed with airflow from the rear of the power supply to the front. This airflow direction supports those critical applications where space limitations and/or higher ambient temperatures near the rear of the rack system, prohibit the discharge of higher temperature airflow from regular front-to-rear cooled power supplies.

The FNP600/850/1000's meet international safety requirements and are CE marked to the Low Voltage Directive (LVD).

## Applications

- Telecom
- Datacom
- Distributed Power Systems

Short-Circuit Protection

Overtemperature/ Fan Failure Warning

Power supply recovers when short is removed.
FNP 12 V or 48 V Vo1 supply output will shut down in the event of an overtemperature condition or blocked fan rotor. Supply's fan and Vaux are active. Power supply will recover when OT condition is removed. Amber OT LED will turn ON to indicate fault condition.

OT/Fan Fail is an open-collector signal with 20-mA pull-down. High signal indicates a normal operating condition. Output will go low at least 100 ms before OT condition shuts down the power supply. Internally pulled up to 5 V with a $5.1 \mathrm{k} \Omega$ resistor. Note. ${ }^{2}$
${ }^{1}$ FNP1000-48 overvoltage protection range is 56 V minimum and 60 V maximum.
${ }^{2} \mathrm{~A}$ pull-up to 3.3 V can be achieved by terminating the logic signal with a $10 \mathrm{k} \Omega$ resistor to logic ground.

## FNR-5-12G and FNR-5-48G Power Shelves

Each rack (power shelf) is 1 U high with backplane and designed for up to five front-end models in parallel or in $\mathrm{n}+1$ operation. Each power shelf has:

- Output terminals with two M4-screws on each power tab.
- Two fast-on contacts for system earthing.
- Address coding over five pole DIP switch on each unit, 37-pin D-Sub connector with $I^{2} \mathrm{C}$-lines, monitoring signals and support functions.
- Provides a start-up synchronization circuit and EMV filters.

Overall Mechanical Dimensions (W x H x D): 17.68" (449 mm) x 1.72 " ( 43.6 mm ) $\times 13.05$ " $(331.5 \mathrm{~mm})$

## SUB-D Output Connector Pinout and Signal Specification (continued)

| OUTPUT CONNECTOR DESCRIPTION | $\begin{gathered} \text { PIN } \\ \text { LOCATION } \end{gathered}$ | TYPE | LOW LEVEL HIGH LEVEL | $\begin{aligned} & \text { V max } \\ & I \text { max } \end{aligned}$ |
| :---: | :---: | :---: | :---: | :---: |
| AC Fail/ <br> Power-down warning PSU 2 | 22 | OC-output, protected by 16 V Zener diode and a $10 \Omega$ resistor in series, referenced to logic GND | $\begin{gathered} <0.4 \mathrm{~V} @ 20 \mathrm{~mA} \\ \text { Pull up } \end{gathered}$ | $\begin{gathered} 15 \mathrm{~V} \\ 20 \mathrm{~mA} \end{gathered}$ |
| DC Fail/ <br> Output voltage fault PSU 2 | 23 | OC-output, protected by 16 V Zener diode and a $10 \Omega$ resistor in series, referenced to logic GND | $\begin{gathered} <0.4 \mathrm{~V} @ 20 \mathrm{~mA} \\ \text { Pull up } \end{gathered}$ | $\begin{gathered} 15 \mathrm{~V} \\ 20 \mathrm{~mA} \end{gathered}$ |
| DATA, I2C data line | 24 | I2C compatible signal referenced to logic GND | 5 V or 3.3 V logic | - |
| CLOCK, I2C clock line | 25 | I2C compatible signal referenced to logic GND | 5 V or 3.3 V logic | - |
| Auxiliary power +12 V (Output 2) | 26 | Vo2+ Aux output, insulated from main output | - | - |
| Auxiliary power ground (Output 2) | 27 | Vo2- Aux output, insulated from main output | - | - |
| Logic Gnd | 28 | Auxiliary GND, Need to be external connected Vo2-,. Wire separately from auxiliary and main output GND to minimize noise and avoid voltage drops on signaland I 2 C return. Leave open if not used. | - | - |
| Output margin PSU 1 | 29 | Open or connected to $V$ sense- <br> V sense- (+8 \% Vo1) or V sense+ (-8 \% Vo1) | - | 60V |
| Output margin PSU 2 | 30 | Open or connected to $V$ sense- <br> V sense- (+8 \% Vo1) or V sense+ (-8 \% Vo1) | - | $60 \mathrm{~V}$ |
| Output margin PSU 3 | 31 | Open or connected to $V$ sense- <br> V sense- (+8 \% Vo1) or V sense+ (-8 \% Vo1) | - | 60 V |
| Output margin PSU 4 | 32 | Open or connected to $V$ sense- <br> V sense- (+8 \% Vo1) or V sense+ (-8 \% Vo1) | - | 60 V |
| Output margin PSU 5 | 33 | Open or connected to $V$ sense- <br> V sense- (+8 \% Vo1) or V sense+ (-8 \% Vo1) | - | 60 V |
| Overtemperature / Fan Fail PSU 4 | 34 | OC-output, protected by 16 V Zener diode and a $10 \Omega$ resistor in series, referenced to logic GND | $\begin{gathered} <0.4 \mathrm{~V} \text { @ } 20 \mathrm{~mA} \\ \text { Pull up } \end{gathered}$ | $\begin{gathered} 15 \mathrm{~V} \\ 20 \mathrm{~mA} \end{gathered}$ |
| Power Supply Present PSU 4 | 35 | Resistor $10 \Omega$ connected to logic GND | Open <br> Pull up | $\begin{gathered} 10 \mathrm{~V} \\ 10 \mathrm{~mA} \end{gathered}$ |
| Overtemperature / Fan Fail PSU 5 | 36 | OC-output, protected by 16 V Zener diode and a $10 \Omega$ resistor in series, referenced to logic GND | $\begin{gathered} <0.4 \mathrm{~V} @ 20 \mathrm{~mA} \\ \text { Pull up } \end{gathered}$ | $\begin{gathered} 15 \mathrm{~V} \\ 20 \mathrm{~mA} \end{gathered}$ |
| Power Supply Present PSU 5 | 37 | Resistor $10 \Omega$ connected to logic GND | Open <br> Pull up | $\begin{gathered} 10 \mathrm{~V} \\ 10 \mathrm{~mA} \end{gathered}$ |

## Accessories

Center Angular Brackets are set in the middle for shelf mounting:

866.513.2839

Center Angular Bracket sets can be ordered from Bel Power Solutions part no.: HZZ01222
Note: Each Center Angular Bracket set contains 2 brackets and 8 screws.

## $I^{2}$ C to USB Interface Demonstration Kit HZZ02002G

An $I^{2} \mathrm{C}$ to USB Interface Demonstration Kit can be ordered from Bel Power Solution part no.: HZZ02002G.

## For more information on these products consult: tech.support@psbel.com

NUCLEAR AND MEDICAL APPLICATIONS - Products are not designed or intended for use as critical components in life support systems, equipment used in hazardous environments, or nuclear control systems.
TECHNICAL REVISIONS - The appearance of products, including safety agency certifications pictured on labels, may change depending on the date manufactured. Specifications are subject to change without notice.

[^0]:    ${ }^{1}$ Also available on $\mathrm{I}^{2} \mathrm{C}$ data line.
    ${ }^{2}$ A pull-up to 3.3 V can be achieved by terminating the logic signal with a $10 \mathrm{k} \Omega$ resistor to logic ground.
