## Circuit Breaker Lockout System

OSHA (Occupational Safety and Health Administration) mandates that all energy sources be turned off and locked out to protect employees from injuries caused by the accidental startup of equipment under repair and service. To support compliance with OSHA 1910.147, Panduit offers a complete line of high quality, circuit breaker lockout devices to ensure that electrical energy sources are isolated for optimal work place safety. These circuit breaker lockouts are part of an extensive line of innovative safety devices designed by Panduit to protect employees from risks associated with all forms of hazardous energy, while meeting safety and regulatory requirements.

PowerLOK ${ }^{\text {TM }}$ Circuit Breaker Lockout Device

Miniature Circuit Breaker Lockout Device

"No Tool" Circuit Breaker Lockout Device

Large Handle Circuit Breaker Lockout Device

| Key Features | Benefits |
| :--- | :--- |
| Complete circuit breaker <br> lockout offering | One supplier for all circuit breaker lockout needs to deliver optimal <br> workplace safety |
| Unique "no tool" option | Allows circuit breaker to lock in the off position without the use of a tool <br> to provide a quick and easy installation |
| Industry-leading <br> clamping force | Prevents the breaker from being turned back on for safe performance of <br> maintenance or service |
| Universal design | Accommodates single pole and multiple pole breakers to efficiently <br> lockout most circuit breakers in the facility |
| Rugged nylon and stainless <br> steel construction | Provides strength, durability, added security, and corrosion resistance; <br> ideal for industrial and harsh applications |
| Compact and lightweight | Convenient, easy to transport and store in a small lockout kit |

## PowerLOK ${ }^{\text {m }}$ Circuit Breaker Lockout Devices

Panduit's PowerLOK ${ }^{\text {m" }}$ Circuit Breaker Lockout Devices include many innovative features to provide a versatile, easy to use lockout/tagout device. These devices can be applied to single or multi-pole circuit breakers (such as $120 / 277 \mathrm{~V}$ breakers) to prevent the breaker from being turned back on; for safe performance of maintenance or service in accordance with lockout/tagout procedures.

## Two Metal Contacts

Provide a contact area that is evenly distributed on the breaker handle for a secure and reliable connection without damage to the breaker handle itself

## Fits Single and Multi-Pole

 Circuit Breakers Jaws designed to grasp the tie-bar of two and three pole circuit breakers, allowing one part to be used in multiple applications horizontally or vertically to accommodate space> Two-Piece Construction Delivers outstanding clamping force, to assure the circuit breaker will remain locked out once the device is applied for improved reliability and safety

## PowerLOK ${ }^{T w}$ Circuit Breaker Lockout Devices Deliver Industry-Leading Clamping Force

Circuit Breaker Lockout Device
Pull-Off Force Testing

The PowerLOK ${ }^{\text {T" }}$ Circuit Breaker Lockout Devices are designed for superior engagement with the circuit breaker to deliver industry-leading pull-off resistance performance. The two-piece construction, metal contacts, and jaws that encircle the circuit breaker handle create superior clamping force for a reliable and secure connection. Pull-off force test results indicate the Panduit ${ }^{\oplus}$ PowerLOK ${ }^{\text {Tw }}$ devices deliver over 3X the pull-off resistance when compared to competitor products used in the same application.

Test results based on pull-off force of each device when force applied perpendicular to the circuit breaker. For more information on the test contact Panduit at: safety @ panduit.com.

## Circuit Breaker Lockout System and Electrician Lockout Kit

## Miniature Circuit Breaker Lockout Devices

PSL-MCB

PSL-MCBNT

- Quickly locks out miniature circuit breakers commonly used in industrial automation and motor control
- On the PSL-MCBNT, multiple padlock orientations allow adjacent circuit breakers to be locked out individually
- PSL-MCB can be installed using a screwdriver
- PSL-MCBNT can be installed by hand with no tool required

|  |  | Std. <br> Pkg. <br> Qty. | Std. <br> Ctn. <br> Qty. |

## Universal and I-LINE Circuit Breaker Lockout Devices

PSL-CBILNT

- Quickly locks out circuit breakers (such as 120/277V breakers); ideal for industrial and harsh applications
- PSL-CB and PSL-CBIL can be installed using a screwdriver
- PSL-CBNT and PSL-CBILNT can be installed by hand, with no tool required
