LT3010

Tripolar Overvoltage Protection for Network Interfaces

Revision:B

General Description

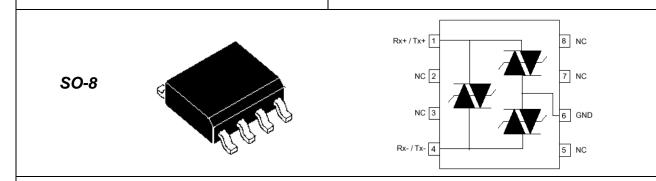

The LT3010 is a low capacitance transient surge arrestor designed for protection of high debit rate communication network.

Applications

Dedicated to dataline protection, this device provides a tripolar protection function. It ensure the same protection capability with the same breakdown voltage in both common and differential modes.

Features

- Tripolar crowbar protection
- Low capacitance
- Repetitive peak pulse current: Ipp=30A (10/1000µs)
- Low holding current: I_H=30mA
