NO	DATE	REVISION ITEMS	ISSUED BY	APPR'D BY
0	12.10.16	Issued	YS.Choi	KY.Lee
1	14.02.10	Updated Specification(MSL, Reflow Profile)	SJ.Kim	YH.Lee
A	14.09.29	Updated Specification(Approval, MSL etc..)	SJ.Kim	YH.Lee
B	14.10.29	Improve The Package Lead Form	SJ.Kim	YH.Lee
C	15.04.30	Updated The Package Dimension	SJ.Kim	YH.Lee
D	15.11.12	Added to sensor pin connection drawing	SJ.Kim	CH.Cho

This specification sheets include the contents under the copyright of KODENSHI AUK CORP ("AUK"). Please keep them with reasonable care as important information.
Please don't reproduce or cause anyone reproduce them without AUK's consent.

AUK takes no responsibility for damage caused by improper use of the devices which does not meet the conditions and absolute maximum ratings to be used specified in the relevant specification sheet.

Please obey the instructions mentioned below for actual use of this device.

This device is designed for general electronic equipment.
Main use of this device are as follows;

- * Computer * OA equipment * Telecommunication equipment(Terminal)
- * Measuring instrument * Machine tool *Industrial robot
- * AV equipment * Home appliance,etc.

Please take proper steps in order to maintain reliability and safety, in case this device is used for the uses mentioned below which require high reliability.

- * Unit concerning control and safety of a vehicle (air plane,train,automobile, etc.)
- * Traffic signal * Gas leak detection breaker
- * Fire box and burglar alarm box * Other safety equipment,etc.

Please don't use for the uses mentioned below which require extremely high reliability.

- * Space equipment * Telecommunication equipment(Trunk)
- * Nuclear control equipment * Medical equipment(relating to any fatal element),etc.

1. Description

The KIT3032S is a compact transmission type photointerrupter, which combine high-output GaAs IRED with high sensitive dual photo transistors.

2. Features

Surface mount package

Slit : 0.3mm (Channel Distance : 0.8mm)

Moisture Sensitive Level(MSL) 2

GAP : 3.0mm

RoHS Compliance

AEC-Q101 Qualified

3. Applications

Motor Control

Printers

Position Encoder

Ticket Vending Machines

4. Outline Dimensions

(ALL DIMENSIONS IN MILLIMETERS)

5. Absolute Maximum Ratings

(Ta=25)

Item		Symbol	Ratings	Unit
Input	Power Dissipation	P_D	75	mW
	Forward Current	I_F	50	mA
	Reverse Voltage	V_R	6	V
	Pulse Forward Current *1	I_{FP}	0.5	A
Output	Collector Dissipation	P_C	75	mW
	Collector Current	I_C	20	mA
	Collector-Emitter Voltage	V_{CEO}	80	V
	Emitter-Collector Voltage	V_{ECO}	7	V
Operating Temperature *2		T_{opr}	-40 ~ +105	
Storage Temperature *2		T_{stg}	-40 ~ +105	
Soldering Temperature *3		T_{sol}	260	
Reflow Soldering Temperature		T_{sol}	255	

* 1. Pulse width (tw) 100 μ s, Period (T) = 10msec.

* 2. No icebound or dew.

* 3. For 5s or less

6. Electro-Optical Characteristics

(Ta=25)

Item	Symbol	Min	Typ	Max	Unit	Conditions	
Input	Forward Voltage	V_F	-	1.2	1.4	V	$I_F = 20mA$
	Reverse Current	I_R	-	-	10	μA	$V_R = 5V$
	Peak Wavelength	λ_p	-	940	-	nm	$I_F = 15mA$
Output	Dark Current	I_{CEO}	-	1	100	nA	$V_{CE} = 20V, 0 Lux$
Collector Current		I_C	0.3	-	-	mA	$I_F=15mA, V_{CE}=5V$
Collector-Emitter Saturation Voltage		$V_{CE(sat)}$	-	-	0.4	V	$I_F = 15mA, I_C = 0.05mA$
Time	Rise Time	t_r	-	4	15	μs	$V_{CC}=5V, I_C=0.3mA, R_L=100\Omega$
	Fall Time	t_f	-	5	20	μs	

Fig 1. Test Circuit for I_c

Fig 2. Test Circuit for Rise and Fall Time

Fig 3. Definitions for Response Times

7. Quality Assurance Inspection

7-1. Inspection Form

MIL-STD-105D, Normal Inspection, Single sampling inspection.

7-2. Inspected Items and Standards

Item	Class	Judgement factor	AQL
Collector Current (I_c) Dark Current (I_{CEO})	Major	Satisfies the 5th item of the Electro-Optical Characteristics.	0.065%
Exterior (Crack, Chip, Dirt, etc.)	Minor	Those that effect the 5th item of the Electro-Optical Characteristics are not good.	0.25%

8. Cautions in Usage

- 8-1. Store product where there is no exterior force causing product to be deformed or change in quality.
- 8-2. Store and use where there is no hydrogen sulfide gas etc, causing corrosion.
- 8-3. Use active area where there is no direct light. Sunlight and tungsten lamp light.
- 8-4. Do not allow dirt or dust to fill in the slit part.
- 8-5. Design the gobo so that it covers the slit.
- 8-6. Take into consideration the drop in the emitting diode's output on continuous use.
- 8-7. Solder the lead pin under the rating conditions. Do not apply any unnecessary force to the lead pin during and after soldering.

8-8. Use ethyl alcohol, methyl alcohol, iso-propylene alcohol for cleansing and do not place product in the mentioned three alcohols for more than threeminutes.

Be sure that there is no flux on the active area the emitting area or it may cause the light quantity to reduce.

9. Guarantee Period and Scope

9-1. Period of Guarantee

1 year after delivery to designated place.

9-2. Scope

Replacement of products will be done, if any problems lie in out company's products.

However, we are not liable for your damage by lack of caution.

10. Others

10-1. This product is not designed against radiative rays, electro-magnetic waves or rays that have heavily charged particles.

10-2. Synthetic resin is used in the package.

10-3. Electricity is used for input and output.

10-4. If any doubts concernig on this specification will be discussed and solved by both parties concerned.

CHARACTERISTICS

Power dissipation Vs. Ambient temperature

Forward current Vs. Forward voltage

Collector Current Vs. Forward Current

Collector Current Vs. Collector-Emitter Voltage

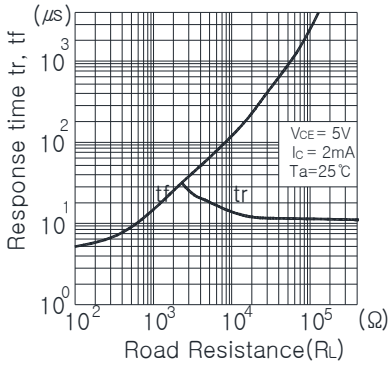

Relative Collector Current Vs. Ambient temperature

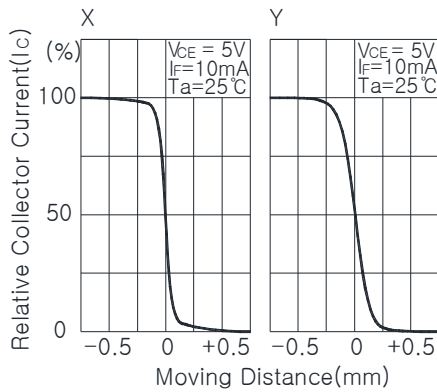

Dark current Vs. Ambient temperature

Switching time Vs. Load resistance

Relative Collector Current Vs. Moving distance

Switching time measurement circuit

Method of measuring position detection characteristic

Soldering Method 1

Recommended Lead-Free Reflow Soldering Temperature Profile

Hand soldering

Hand soldering should be completed within 3 s when the point of solder iron is below 350 .
 Please solder within one time.
 Please don't touch the terminals directly by soldering iron.
 Soldered product shall treat at normal temperature.

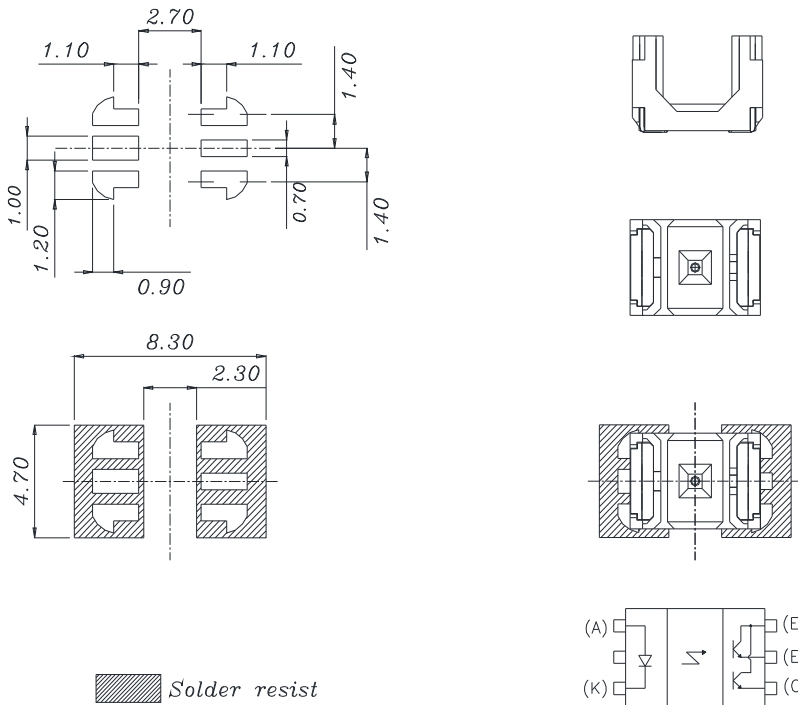

Other notice

Please take care not to let any external force exert on lead pins.
 Please test the soldering method in actual condition and make sure the soldering works fine, since the impact on the junction between the device and PCB varies depending on the cooling and soldering conditions.

*Note

Lead(Pb)-Free Reflow Solder Profile accepts. J-STD-020D.1.

Recommended Solder Pad

Design Considerations

Design guide

- 1) Prevention of detection error
To prevent photointerrupter from faulty operation caused by external light, do not set the detecting face to the external light.
- 2) Position of opaque board
Opaque board shall be installed at place 1.5mm or more from the top of elements.
(Example)

This product is not designed against irradiation and incorporates non-coherent IRED.

Degradation

In general, the emission of the IRED used in photointerrupter will degrade over time. In the case of long term operation, please take the general IRED degradation (50% degradation over 5 years) into the design consideration.

Manufacturing Guidelines

Storage and management after open

Storage condition

Storage temp.: 5 to 30°C, Storage humidity : 70%RH or less at regular packaging.

Treatment after opening the moisture-proof package

After opening, you should mount the products while keeping them on the condition of 5 to 25°C and 70%RH or less in humidity within 7 days.

After opening the bag once even if the prolonged storage is necessary, you should mount the products within two weeks.

And when you store the rest of products you should put into a DRY BOX. Otherwise after the rest of products and silicagel are sealed up again, you should keep them under the condition of 5 to 30°C and 70%RH or less in humidity.

Baking before mounting

When the above-mentioned storage method could not be executed, please process the baking treatment before mounting the products.

However the baking treatment is permitted within one time.

Recommended condition : 125°C, 16 to 24 hours

*Do not process the baking treatment with the product wrapped. When the baking treatment processing, you should move the products to a metallic tray or fix temporarily the products to substrate.

Cleaning instructions

Solvent cleaning :

Solvent temperature should be 45°C or below. Immersion time should be 3 minutes or less.

Ultrasonic cleaning :

Do not execute ultrasonic cleaning.

Recommended solvent materials :

Ethyl alcohol, Methyl alcohol and Isopropyl alcohol.

Reliability

The reliability of productions shall satisfy items listed below.

Confidence level : 90%

LTPD : 10 or 20

Test item	Test conditions	Failure Judgement Criteria	Samples (n)
			Defective(C)
Pre-Conditioning	MSL Level 2		N/A
Parametric Verification	-40 , 25 , 105	-	n = 22, C = 0
Temperature Cycling	-40 /+ 105 , 500 Cycles		n = 22, C = 0
High Temperature Reverse Bias	105 , 1000h Emitter : $V_R = 4V$, Detectors : $V_{CEO} = 5V$	$V_F \quad U \times 1.2$	n = 22, C = 0
High Humidity High Temperature Reverse Bias	85 /85%RH, 1000h Emitter : $V_R = 4V$, Detectors : $V_{CEO} = 5V$	$I_R \quad U \times 2$ $I_{CEO} \quad U \times 2$	n = 22, C = 0
Power and Temperature Cycle	-40 /+ 105 , 1000h Emitter : $I_F = 5mA$, Detectors : $V_{CE} = 30V$, 2min. On, 2min. Off	$I_C \quad L \times 0.8$	n = 22, C = 0
ESD	HBM : $\pm 2kV$, MM : $\pm 200V$		n = 22, C = 0

* U : Upper specification limit, L : Lower specification limit
