

**VOIDLESS HERMETICALLY SEALED
500mW GLASS ZENER DIODES**
Qualified per MIL-PRF-19500/533

Qualified Levels:
JAN, JANTX, JANTXV
and JANS

DESCRIPTION

This Zener voltage regulator series is military qualified and is ideal for high-reliability applications where a failure cannot be tolerated. These industry-recognized 0.5 watt Zener voltage regulators are hermetically sealed with voidless-glass construction using an internal metallurgical bond. It includes Zener selections from 2.4 to 200 volts in standard 5% tolerances as well as 1% and 2% tolerances. They are also available in surface-mount packages. Microsemi also offers numerous other Zener products to meet higher and lower power ratings in both thru-hole and surface mount packages.

Important: For the latest information, visit our website <http://www.microsemi.com>.

FEATURES

- JEDEC registered 1N6309 thru 1N6355 series.

NOTES:

- Standard voltage tolerance is 5 percent. Tighter tolerances are available in plus/minus 1 and 2 percent voltage tolerances. (See [part nomenclature](#).)
- Voltage regulation V_{Z(reg)} is the measured voltage change at thermal equilibrium between the current of 10% and 50% of maximum Zener current I_{ZM} when the lead temperature is maintained at 25 °C =+8 °C, -2 °C.
