1. Features

- High quality ball bearing steel
- **63 - 65 Rockwell Hardness (HRC):** Pyrometer controlled inductive hardening
- All cutters available with three types of cutting blades:
 - **SEMI-FLUSH**, for soft and hard wire.
 - **FLUSH**, for very precise cutting of soft wire.
 - **FULL-FLUSH**, for a perfect cutting of soft wire.

- **2-Component ESD Ergonomic handles**, soft comfortable gripping surface, hard plastic core
- Dual leaf **springs** in blue steel.
- **Matched bearing rings** in order to minimize metal-metal contact and friction.
- **Lap joint with screw** in order to achieve a high level of strength and precision. The nut is made of hardened alloy steel in order to resist high cutting load. The screw is fine-pitched for perfect joint adjustment.

2. The cutters
