

RFTide Transceiver

FOR WIRELESS NETWORK 868 MHz

RFT 868 3V

Descrizione

Il modulo RFT-868 rappresenta l'elemento chiave per la rete RFTide, sviluppata da Aurel. Si tratta di un ricetrasmittitore a 868 MHz da utilizzare su di un attuatore o di un sensore remoto.

E' provvisto di due terminali di ingresso, da usare come ingressi analogici o digitali, e due terminali di uscita digitali, uno dei quali può anche essere usato per realizzare una modulazione PWM.

E' inoltre stata aggiunta un'interfaccia UART con un protocollo specifico per fornire all'utente una rete maggiormente personalizzabile. Un pin di Enable permette inoltre di spegnere il modulo per applicazioni a batteria.

Description

RFT-868 Module is the key element for RFTide network, developed by Aurel. It is a 868MHz transceiver to be used on a actuator or in a remote sensor.

It is equipped with two input pins, which can be used as digital input or analog inputs, and two output digital pins to perform actuation, one of which can implement a PWM modulation.

A UART interface with a specific protocol is also provided in order to establish a more customizable network. An Enable pin is used to to switch-off the module for battery-powered applications.
