DIGITAL BUILDING INFRASTRUCTURES

 **legrand**<sup>®</sup>

# NEW TX<sup>3</sup> RANGE PROTECTION YOU CAN RELY ON

Designed to meet the requirements of modern installations in residential and commercial applications, Legrand's new TX<sup>3</sup> range provides effective protection against short-circuits, overloads and residual current faults. The range, which comprises thermal-magnetic circuit breakers and residual current devices and is complemented by numerous control and signalling auxiliaries, ensures safety, ruggedness and a high build quality for your installations.

## RCCBs

- In = from 16 to 80 A
- 2P and 4P (neutral on right-hand side)
- Type AC and A
- Sensitivity: 30, 100, 300 mA
- Compliant with IEC 61008-1

## THERMAL-MAGNETIC CIRCUIT BREAKERS

- In = 2 to 63 A
- 1P to 4P
- B and C curves
- Breaking capacity: 6000 A and 10000 A at 230/400V ~
- Compliant with IEC 60898-1

### Common auxiliaries

Legrand offers a wide range of control and signalling auxiliaries common for all circuit breakers and RCCBs in the TX<sup>3</sup> and DX<sup>3</sup> ranges.

For more information, see p. 6

# TX<sup>3</sup> - SAFETY ON ALL LEVELS

The new TX<sup>3</sup> range ensures safe installation and operation for maximum protection of people and property.

## A PRODUCT DESIGNED WITH SAFETY IN MIND

The product design and materials have been carefully developed to allow air to flow freely between each device to avoid overheating.

## WIRE GUIDE FLAP

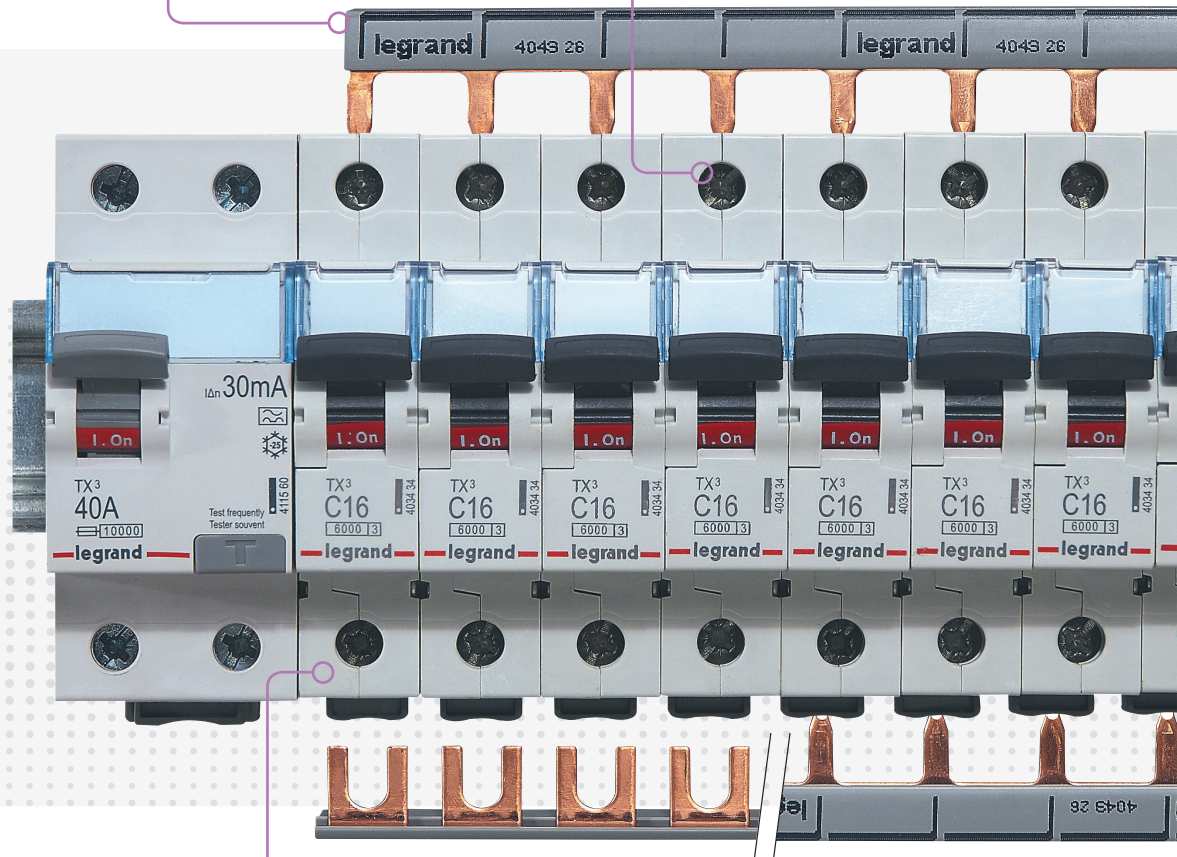

Avoids connection errors for an increased safety level, by preventing insertion of the wire behind the terminal.

### RELIABLE CONNECTIONS

Prong and fork type comb busbars guarantee connection quality by eliminating the risk of short-circuits and ensuring a reliable connection via the top or bottom of the device.

### INCREASED SAFETY

IP 2x terminals - no direct contact with live parts, even with the faceplate open. Clamping screw for flat-blade or Pozidriv screwdriver. Reinforced terminals allowing tightening torques higher than those recommended by the standard.

### RISING CAGE CLAMP TERMINALS

The shape of the screws and terminals ensures excellent mechanical withstand of the wires and limits contact impedance, temperature rise and heat loss.

Bottom terminals compatible with fork or prong type comb busbars.

### Limitation class 3

Circuit breakers with class 3 limitation provide excellent short-circuit protection. They limit the short-circuit energy released in cables and hence help to extend the service life of an installation.

# TX<sup>3</sup> - INSTALLATION AND MAINTENANCE MADE EASY

For ease of installation, wiring and maintenance, the new TX<sup>3</sup> range has a number of features which help save time at each stage of a project.

## CLEAR MARKING ON THE FRONT PANEL

For quick visual identification of the relevant information - product name, curve type, rating, breaking capacity, limitation class.

## TECHNICAL LABELLING AREA

For quick identification of each circuit according to the wiring diagram. The surface of this part of the modular devices has been specially treated to receive a temporary marking (adhesive label, felt pen or pencil).

### ERGONOMIC LABEL HOLDER

For customisable labels. These holders provide effective, durable protection for the labels which are used to identify circuits clearly for the purposes of rapid intervention in the event of an error.

### THE EXTRA-SPACE CLAMP

Ensures even more comfort during installation and allows independent MCB or RCCB removal with supply busbar in place (without removing the other devices on the same row).

### BISTABLE CLAMP

For easy positioning or removal of the product on the DIN rail. Compatible with flat-blade or pozidriv screwdrivers. Several additional functions of the DX<sup>3</sup> range, such as isolating switches or single pole + neutral RCBOs, are also equipped with this clamp.

### Quick visual identification of the function and contacts position

Black handle - circuit breaker  
 Grey handle - RCCB  
 I - ON marking and red : closed contacts  
 O - OFF marking and green : open contacts

# AUXILIARIES - OFFERING FLEXIBILITY FOR YOUR INSTALLATIONS

Legrand offers a wide range of control and signalling auxiliaries for TX<sup>3</sup> circuit breakers and RCCBs to monitor and control circuits remotely. These auxiliaries are used for remote control and information feedback purposes in commercial premises and are also common to the DX<sup>3</sup> range.

## TOTAL FLEXIBILITY

Auxiliary contacts and fault signal contacts, shunt trips, undervoltage releases and motor-driven controls. Available in 0.5 or 1 module wide. The signalling auxiliaries exist in 2 versions, adapted for fork-type respectively prong-type supply busbars.

### MARKINGS ON SIDE PANEL

Technical information, such as identification of the function, schematic, connection and mounting.

### RETAINER CLIP

Auxiliaries are equipped with clips for quick, tool-free assembly which ensures a more robust unit.

### ACCESSIBLE TERMINALS

Visible, accessible screw heads make wiring easier.

### CLEAR MARKING

The arrow on the front of auxiliaries allows instant identification of the device to which they are associated.

### Optimised space in the panel

Legrand (ON/OFF) motor-driven control is the most compact on the market at just **1 module wide**. These motor-driven controls are used with TX<sup>3</sup> circuit breakers and RCCBs.

# TX<sup>3</sup> - HIGH BUILD QUALITY AND ENVIRONMENTALLY- FRIENDLY

At Legrand, we take pride in the quality of our products. The TX<sup>3</sup> range has many approvals issued by independent certification bodies, renowned for their strict requirements.

## Rugged reliability

**10,000 operations with load**  
Electrical endurance

**- 25°C to + 70°C**  
Extreme operating conditions

## ECO-FRIENDLY

The TX<sup>3</sup> range has been designed to comply with different environmental requirements such as the RoHS Directive.

## COPYTRACER - THE FIGHT AGAINST COUNTERFEITING

A unique serial number is printed on our circuit breakers which allows customers to check the authenticity of the product using the online Copytracer facility at [www.legrand-copytracer.com](http://www.legrand-copytracer.com).

## PRODUCTS CERTIFIED ACCORDING TO INTERNATIONAL STANDARDS

Rigorous, recognised approvals such as VDE (Germany) are renewed annually.

### Certification of Legrand's production facilities

- ISO 9001 for quality
- ISO 14001 for environmental protection

## MCBs TX<sup>3</sup> 6000

thermal magnetic MCBs from 2 A to 63 A - B & C curve

Technical characteristics p. 14

Conform to IEC 60898-1  
 Compatible with prong-type and fork type supply busbars  
 Equipped with special DIN rail clamp allowing independent MCB removal with supply busbar in place  
 Breaking capacity:  
 [6000]- IEC 60898-1 - 230/400 V~  
 6 kA - IEC 60947-2 - 230/400 V~  
 Can be equipped with DX<sup>3</sup> signalling and remote tripping auxiliaries and motorised controls (p. 12-13)  
 Do not accept add-on modules

## AUXILIARIES AND REMOTE CONTROL

# Common auxiliaries & remote control

The signalling and remote tripping auxiliaries and the motorised controls are common for DX<sup>3</sup> MCBs, RCBs and TX<sup>3</sup> MCBs and RCCBs. Signalling auxiliaries are available in two versions, adapted to the prong or fork type supply busbars.

1 module motorised controls p. 13

### COMPACT SIZE

1 module motorised controls for remote tripping of 1-pole to 4-pole modular devices.

Auxiliaries p. 12

### EASY TO INSTALL

Perfect fitting to protection devices  
Easy access and visible terminals  
Allow insertion of supply busbars

Power overvoltage protection p. 12  
Motorised control with automatic resetting p. 13

### AVAILABLE FUNCTIONS

- auxiliary or fault signal contact
- current shunt trips
- undervoltage releases
- power overvoltage protection
- motorised controls with or without automatic resetting

## Motorised controls DX<sup>3</sup>, STOP&GO automatic resetting

## DX<sup>3</sup> and accessories

Pack	Cat.Nos	Motorised controls
		For remote control (opening and closing) of their associated device. To fit on the left-hand side of DX <sup>3</sup> and TX <sup>3</sup> devices For MCBs, RCBOs, RCCBs and remote trip isolating switches (from 1P to 4P) Can take one control auxiliary and one signalling auxiliary. No tool required for joining together the motorised control and the main device
1	4 062 90	<b>ON/OFF function - for 1 module / pole devices (In up to 63 A)</b>
1	4 062 91	Control voltage   Number of modules 24-48 V $\sim$ /=   1 230 V $\sim$   1
1	4 062 92	<b>ON/OFF function - for 1.5 module / pole devices (In up to 125 A)</b> 230 V $\sim$   1
		<b>ON/OFF + automatic resetting function - for 1 module / pole devices (In up to 63 A)</b> Automatically resets the device to which it is associated, thus ensuring continuity of service
1	4 062 93	Control voltage   No. of modules 24-48 V $\sim$ /=   2
1	4 062 95	230 V $\sim$   2
		<b>STOP&amp;GO automatic resetting</b> For automatic resetting of 1 module per pole RCCBs and RCBOs up to 63 A STOP&GO is used in the event of unwanted tripping generated by temporarily electrical disturbances or other external events. Can take one control auxiliary and one signalling auxiliary. The signalling auxiliary must be placed between the STOP&GO and the control auxiliary. No tool required for assembling
1	4 062 88	<b>Automatic resetting function</b> Control voltage   No. of modules 230 V $\sim$   2
1	4 062 89	<b>Automatic resetting + periodic self-test function</b> 230 V $\sim$   2

Pack	Cat.Nos	Manual supply inverter (MSI)
		For manually switching between the mains and an alternative power supply. Allow to restore power on pre-designated and/or critical circuits in case of a power failure of the main supply. For DX <sup>3</sup> MCBs and remote trip isolating switches Installation principle - see e-catalogue
1	4 063 14	For 2P 2-module devices
1	4 063 15	For 3P 3-module devices
1	4 063 16	For 4P 4-module devices
		<b>Front external rotary handles</b> Allow the manual control (open/close) of a modular device without opening the enclosure For all DX <sup>3</sup> , TX <sup>3</sup> and RX <sup>3</sup> devices from 2P upwards Supplied with bracket, connection rod, handle, self-adhesive drilling template and connection accessories Installation principle - see e-catalogue
1	4 063 19	Black handle
1	4 063 20	Yellow and red handle
		<b>Wiring management accessories</b>
		<b>Insulating shields</b> For 1 module per pole MCBs For separation between the terminals of the MCB, when using high cross section cables
1	4 063 05	
10	4 063 07	<b>Spacing unit with feedthrough</b> 0.5 module Allows cables to run between two modular devices and creates an air channel in order to limit temperature rise
		<b>Terminals for aluminium cables</b>
1	4 063 10	For 1.5 module/pole MCBs up to 63 A
1	4 063 11	For 1.5 module/pole MCBs and remote trip isolating switches from 80 A to 125 A
		<b>Safety and maintenance accessories</b>
		<b>Sealable screw covers</b>
2	4 063 04	For 1 module per pole MCBs (set of 4)
1	4 063 12	For 1.5 module per pole MCBs (set of 4)
		<b>Terminal shield</b>
1	4 063 06	For 1.5 module/pole MCBs (set of 2)
		<b>Padlocking</b> To lock the handle of a modular device during maintenance
1	0 227 97	Large padlock, Ø6 mm, 50 mm length Supplied with two keys and labels
3	4 063 13	Small padlock, Ø5 mm
2	4 063 03	Support for one padlock (for small or large model) For locking the handle of the modular devices (MCBs, RCCBs, RCBOs or isolating switches) in OFF position

# Performance of MCBs and auxiliaries

## Breaking capacity in IT neutral earthing system

MCB single pole breaking capacity at 400 V according to IEC 60947-2

TX <sup>3</sup> <b>6000</b> 6 kA	1P/2P/3P/4P	3 kA
TX <sup>3</sup> <b>10000</b> 10 kA	1P/2P/3P/4P	4 kA

## Breaking capacity in the event of short-circuit to earth and insulation voltage

	1P/2P/3P/4P 230/400 V~ MCBs	
	TX <sup>3</sup> <b>6000</b> 6 kA	TX <sup>3</sup> <b>10000</b> 10 kA
I <sub>cn1</sub>	6000 A	10000 A
U <sub>i</sub>	500 V	500 V

I<sub>cn1</sub>: Breaking capacity on 1 pole for multipole MCBs in the event of short-circuit to earth  
 U<sub>i</sub>: Rated insulation voltage

## Terminal connection cross-sections (mm<sup>2</sup>)

Copper cable	Rigid		Flexible
	TX <sup>3</sup> <b>6000</b> 6 kA	35	25
TX <sup>3</sup> <b>10000</b> 10 kA			
Auxiliaries	2.5	2.5	

## MCB tripping curves

Curves	Magnetic threshold settings
Z <sup>(1)</sup>	2.4 to 3.6 I <sub>n</sub>
B	3 to 5 I <sub>n</sub>
C	5 to 10 I <sub>n</sub>
D	10 to 14 I <sub>n</sub> (10 to 20 acc. to the stds)
MA <sup>(1)</sup>	12 to 14 I <sub>n</sub>

1: On request

## Performance of RCCBs

### AC type - Standard applications

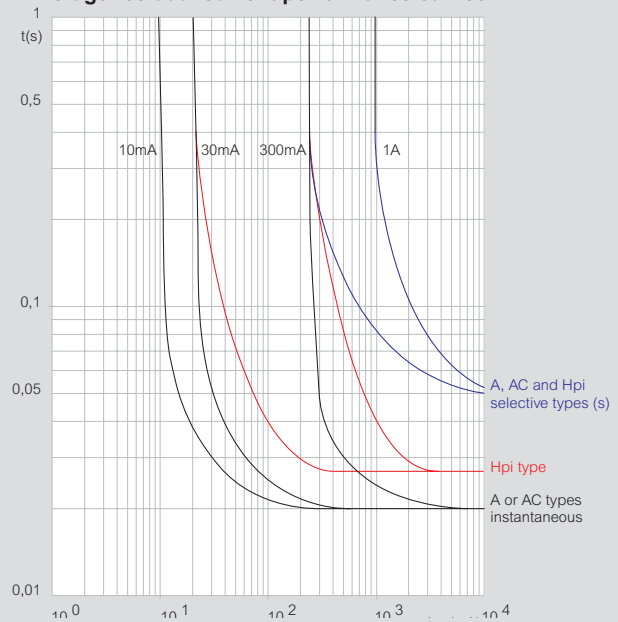

Detection of 50-60 Hz AC residual currents

### A type - Specific applications: dedicated lines

In addition to the characteristics of AC type add-on modules, A type add-on modules also detect residual currents with DC components. They are used whenever the fault currents are not sinusoidal. They are particularly suitable for the following dedicated line applications:

- On circuits where class 1 equipment may produce fault currents with DC components, such as variable speed drives with frequency inverter, etc.

## Average residual current performance curves

### Technical characteristics of auxiliaries

Max. connection cross-section: 2.5 mm<sup>2</sup>  
 Operating temperature: - 25°C to + 70°C

#### Shunt trips

Nominal voltage (Un)  
 - 12 to 48 V $\sim$  and  $\equiv$   
 - 110 to 415 V $\sim$  and 110 to 125 V $\equiv$

Equipped with a signalling contact which indicates tripping of the shunt trip and automatically breaks the coil.  
 Min. and max. voltage: 0.7 to 1.1 Un  
 Tripping time: less than 20 ms  
 Power consumption: at 1.1 x 48 V = 121 VA  
 at 1.1 x 415 V = 127 VA  
 Impedance: 12 to 48 V = 23  $\Omega$   
 110 to 415 V = 1640  $\Omega$

Consumption	Umin.	Umax.
12 to 48 V	522 mA	2610 mA
110 to 415 V	69 mA	259 mA

#### Undervoltage releases

Pull-in voltage  $\geq 0.55 U_n$   
 Tripping time: 100 to 400 ms  $\pm$  10% (adjustable)  
 Power consumption: 24 V $\sim$  and  $\equiv$ : 0.1 VA  
 48 V $\sim$  and  $\equiv$ : 0.2 VA  
 230 V $\sim$ : 1 VA

Nominal voltage:  
 24 and 48 V $\sim$  and  $\equiv$   
 230 V $\sim$

#### Stand-alone releases for N/C push-buttons

Min. and max. operating voltage: 196 to 250 V $\sim$   
 Power consumption: 1.4 VA

#### Signalling auxiliaries

Umin.: 24 V $\sim/\equiv$  and Imin.: 5 mA

### Technical characteristics of auxiliaries (continued)

Max. connection cross-section: 2.5 mm<sup>2</sup>  
 Operating temperature: - 25°C to + 70°C

#### Power overvoltage protection (POP)

Conform to EN 50550:2010  
 Mechanical indicator on the front panel:  
 - red indicator : tripping on a fault (overvoltage)  
 - transparent window : the power overvoltage protection is ON (armed position)  
 Power consumption: 0.45 VA at 230 V  $\sim$

	Voltage Ua				
	255 V	275 V	300 V	350 V	400 V
Maximum actuation time (s)	No tripping				
Maximum non activating time (s)	3	1	0.25	0.7	

### Compatibility between auxiliaries on 1 module/pole devices

1 module / pole device (auxiliary on the left side)	1st auxiliary	2nd auxiliary	3rd auxiliary
1st auxiliary	4 062 .. 50/52/56/58/60/ 62/66/76/78/80/ 82/84/86/87	-	-
