

# AC and Pulse Film Foil Capacitors KP Radial Potted Type

Dimensions in millimeters

# MAIN APPLICATIONS

Oscillator, timing and LC/RC filter circuits, high frequency coupling of fast digital and analog IC's.

# **REFERENCE STANDARDS**

IEC 60384-13

# MARKING

C-value; tolerance; rated voltage; sub-class; manufacturer's type; code for dielectric material; manufacturer's location; manufacturer's logo; year and week

# DIELECTRIC

Polypropylene film

# ELECTRODES

Tin foil

# CONSTRUCTION

Mono construction

# **RATED DC VOLTAGES**

63 V, 250 V, 630 V

# RATED AC VOLTAGES

40 V, 160 V, 250 V

# FEATURES

5 mm lead pitch, supplied loose in box taped in ammopack or reel

Material categorization:

for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

# ENCAPSULATION

ROHS COMPLIANT

Plastic case, epoxy resin sealed, flame retardant UL-class 94 V-0  $\,$ 

# CLIMATIC TESTING CLASS ACC. TO IEC 60068-1

55/100/56

# **CAPACITANCE RANGE**

100 pF to 0.022 µF

# CAPACITANCE TOLERANCE

 $\pm$  10 % ,  $\pm$  5 %,  $\pm$  2.5 %,  $\pm$  2 %,  $\pm$  1 %

# LEADS

Tinned wire

# MAXIMUM APPLICATION TEMPERATURE

100 °C

# **DETAIL SPECIFICATION**

For more detailed data and test requirements contact: <u>dc-film@vishay.com</u>

Document Number: 26016 Revision: 17-Jun-15

| Tolerance codes: 1 = 1 % (F); 2 = 2 % (G); 3 = 2.5 % (H); 4 = 5 % (J); 5 = 10 % (K) |                  |              |                |                |  |  |

Note

For detailed tape specifications refer to "Packaging Information" www.vishay.com/doc?28139 or end of catalog

#### MOUNTING

#### Normal Use

The capacitors are designed for mounting on printed-circuit boards. The capacitors packed in bandoliers are designed for mounting on printed-circuit boards by means of automatic insertion machines.

For detailed tape specifications refer to "Packaging information" www.vishay.com/doc?28139 or end of catalog

#### Specific Method of Mounting of Withstand Vibration and Shock

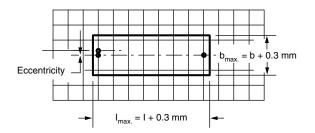

In order to withstand vibration and shock tests, it must be ensured that the stand-off pips are in good contact with the printed-circuit board.

- For pitches  $\leq$  15 mm the capacitors shall be mechanically fixed by the leads
- For larger pitches the capacitors shall be mounted in the same way and the body clamped

#### Space Requirements on Printed-Circuit Board

The maximum length and width of film capacitors is shown in the drawing:

- Eccentricity as in drawing. The maximum eccentricity is smaller than or equal to the lead diameter of the product concerned
- Product height with seating plane as given by "IEC 60717" as reference:  $h_{max} \le h + 0.4 \text{ mm or } h_{max} \le h' + 0.4 \text{ mm}$

#### Storage Temperature

• Storage temperature: T<sub>stq</sub> = - 25 °C to + 35 °C with RH maximum 75 % without condensation

#### **Ratings and Characteristics Reference Conditions**

Unless otherwise specified, all electrical values apply to an ambient free temperature of 23 °C  $\pm$  1 °C, an atmospheric pressure of 86 kPa to 106 kPa and a relative humidity of 50 %  $\pm$  2 %.

For reference testing, a conditioning period shall be applied over 96 h  $\pm$  4 h by heating the products in a circulating air oven at the rated temperature and a relative humidity not exceeding 20 %.

| 7.5                    | 6                         |
| 9.0                    | 7                         |

# POWER DISSIPATION AND MAXIMUM COMPONENT TEMPERATURE RISE

The power dissipation must be limited in order not to exceed the maximum allowed component temperature rise as a function of the free air ambient temperature.

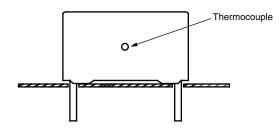

The power dissipation can be calculated according type detail specification "HQN-384-01/101: Technical Information Film Capacitors" with the typical tgd of the curves.

The component temperature rise ( $\Delta T$ ) can be measured (see section "Measuring the component temperature" for more details) or calculated by  $\Delta T = P/G$ :

- $\Delta T$  = Component temperature rise (°C)
- P = Power dissipation of the component (mW)
- G = Heat conductivity of the component (mW/°C)

# MEASURING THE COMPONENT TEMPERATURE

A thermocouple must be attached to the capacitor body as in:

The temperature is measured in unloaded  $(T_{amb})$  and maximum loaded condition  $(T_c)$ .

The temperature rise is given by  $\Delta T = T_c - T_{amb}$ .

To avoid radiation or convection, the capacitor should be tested in a wind-free box.

# APPLICATION NOTE AND LIMITING CONDITIONS

To select the capacitor for a certain application, the following conditions must be checked:

- 1. The peak voltage  $(U_p)$  shall not be greater than the rated DC voltage  $(U_{Rdc})$
- 2. The peak-to-peak voltage (U<sub>p-p</sub>) shall not be greater than the maximum (U<sub>p-p</sub>) to avoid the ionization inception level
- 3. The maximum component surface temperature rise must be lower than the limits
- 4. The maximum application temperature must be lower than 105 °C
- 5. There is no limit for the voltage pulse slope in the application

# Disclaimer

ALL PRODUCT, PRODUCT SPECIFICATIONS AND DATA ARE SUBJECT TO CHANGE WITHOUT NOTICE TO IMPROVE RELIABILITY, FUNCTION OR DESIGN OR OTHERWISE.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained in any datasheet or in any other disclosure relating to any product.

Vishay makes no warranty, representation or guarantee regarding the suitability of the products for any particular purpose or the continuing production of any product. To the maximum extent permitted by applicable law, Vishay disclaims (i) any and all liability arising out of the application or use of any product, (ii) any and all liability, including without limitation special, consequential or incidental damages, and (iii) any and all implied warranties, including warranties of fitness for particular purpose, non-infringement and merchantability.

Statements regarding the suitability of products for certain types of applications are based on Vishay's knowledge of typical requirements that are often placed on Vishay products in generic applications. Such statements are not binding statements about the suitability of products for a particular application. It is the customer's responsibility to validate that a particular product with the properties described in the product specification is suitable for use in a particular application. Parameters provided in datasheets and/or specifications may vary in different applications and performance may vary over time. All operating parameters, including typical parameters, must be validated for each customer application by the customer's technical experts. Product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein.

Except as expressly indicated in writing, Vishay products are not designed for use in medical, life-saving, or life-sustaining applications or for any other application in which the failure of the Vishay product could result in personal injury or death. Customers using or selling Vishay products not expressly indicated for use in such applications do so at their own risk. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay. Product names and markings noted herein may be trademarks of their respective owners.

# **Material Category Policy**

Vishay Intertechnology, Inc. hereby certifies that all its products that are identified as RoHS-Compliant fulfill the definitions and restrictions defined under Directive 2011/65/EU of The European Parliament and of the Council of June 8, 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (EEE) - recast, unless otherwise specified as non-compliant.

Please note that some Vishay documentation may still make reference to RoHS Directive 2002/95/EC. We confirm that all the products identified as being compliant to Directive 2002/95/EC conform to Directive 2011/65/EU.

Vishay Intertechnology, Inc. hereby certifies that all its products that are identified as Halogen-Free follow Halogen-Free requirements as per JEDEC JS709A standards. Please note that some Vishay documentation may still make reference to the IEC 61249-2-21 definition. We confirm that all the products identified as being compliant to IEC 61249-2-21 conform to JEDEC JS709A standards.
