

## 0.2W Medium Power Thin Series Datasheet

### Features:

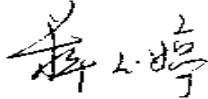

- PLCC-2 package.
- Silicone resin.
- GaN technology Chip Material.
- High luminous Intensity and high efficiency.
- High Color rendering index.
- Low Color Tolerance Adjustment.
- 120°Wide viewing angle.
- Compatible with automatic placement equipment.
- Compatible with reflow solder process.
- Suitable for all SMT assembly methods.
- Doesn't contain restriction Substance, comply ROHS standard.

### Typical Application:

- Indoor Displays.
- Backlighting (illuminated advertising, general lighting).
- Substitution of fluorescent lamps.
- Interior Automotive Lighting.
- Signal and Symbol Luminaire.

## Contents

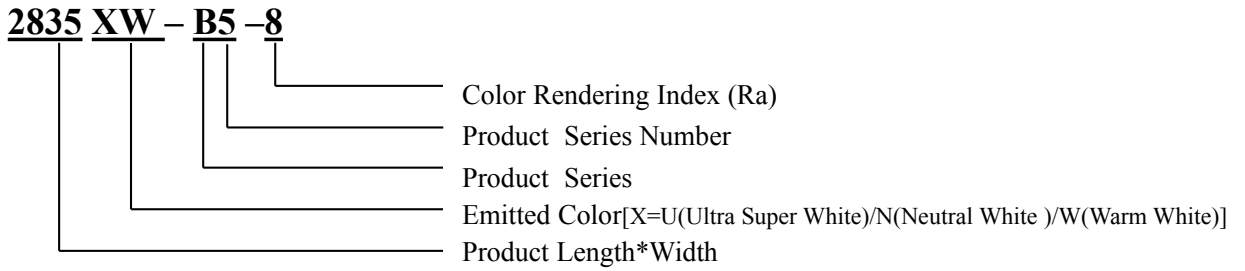

01. General Information
02. Package dimensions
03. Absolute maximum rating
04. Electrical optical characteristics
05. BIN range
06. Chromaticity Coordinates & Bin grading diagram
07. Package label
08. Soldering pad dimensions
09. Soldering conditions
10. Package tape specifications
11. Typical electro-optical characteristics curves
12. Storage and application notices
13. Notes

Customer confirm	Approved by	Checked by	Issued by

◆ **General Information**

**Product Nomenclature**

The following table describes the available color, color rendering index (Ra) and product series. For more flux and forward voltage information, please consult the Bin range of Chromaticity Coordinates and Chromaticity Coordinates & Bin grading diagram.

◆ **Package Dimensions**

Unit: mm

Figure: 0.2W medium power thin series circuit diagram

Tolerance: ±0.2mm unless otherwise noted

Electrodes: Ag Plating Copper Alloy

Encapsulating Resin: Silicon Resin

Package: Heat-Resistant Polymer

◆ **Absolute Maximum Rating (Ta=25°C)**

The following table describe absolute maximum ratings of 0.2 W medium power thin series.

Parameter	Symbol	Max.	Unit
Power Dissipation	Pd	300	mW
Pulse Forward Current*	I <sub>FP</sub>	120	mA
DC Forward Current	I <sub>F</sub>	90	mA
Reverse Voltage	V <sub>R</sub>	5	V
Operating Temperature Range	Topr	-40°C ~ 85°C	°C
Storage Temperature Range	Tstg	-40°C ~ 100°C	°C

● I<sub>FP</sub> condition: pulse width ≤0.1ms, duty cycle ≤1/10.

◆ **Optical and Electrical Characteristics (Ta=25°C)**

Luminous intensity characteristics at Ta=25°C for 0.2W medium power thin series.

Part Name	TCC /K	Ra	Luminous Flux / lm		Luminous intensity/mcd	I <sub>R</sub> (V <sub>R</sub> =5V) / uA	Typ. Δλ / nm	2θ <sub>1/2</sub> /°	Test Condition
			Min	Max.					
2835WW-B5-8	2580-2870K	80	19	22	5000-7200	<10	130	120	60 mA
	2870-3220K		21	24	6000-8600				
	3220-3710K		21	24	6000-8600				
2835NW-B5-8	3710-4260K	80	23	26	6000-8600	<10	25	120	
	4260-4745K								
2835UW-B5-8	4745-5312K	80	23	26	6000-8600	<10	25	120	
	5312-6020K		23	26					
	6020-7040K		23	26					
	7040-7650K		21	24					

Note: 1. Tolerance of Luminous Intensity ±10%.

2. Tolerance of Forward voltage ±0.05V.

3. Luminous Flux is measured by WENRUN's equipment on bare chips, which is only for your reference, not 100% test value. The manufacturer do not guarantee this value.

◆ **BIN range**

Forward voltage (tolerance is  $\pm 0.05V$  @  $I_F=60$  mA):

<b>BIN CODE</b>	<b>Min. (V)</b>	<b>Max. (V)</b>
S	2.9	3.0
T	3.0	3.1
U	3.1	3.2
V	3.2	3.3
W	3.3	3.4

Luminous intensity (tolerance is  $\pm 10\%$  @  $I_F=60$  mA):

<b>BIN CODE</b>	<b>Min. (mcd)</b>	<b>Max. (mcd)</b>
B8	5000	6000
B9	6000	7200
B10	7200	8600

◆ **Chromaticity Coordinates & Bin grading diagram**

Bin range of Chromaticity Coordinates (tolerance is  $\pm 0.01$  @  $I_f=60$  mA):

<b>CCT</b>	<b>Bin Code</b>	<b>X1</b>	<b>Y1</b>	<b>X2</b>	<b>Y2</b>	<b>X3</b>	<b>Y3</b>	<b>X4</b>	<b>Y4</b>

◆ **Soldering Pad Dimensions**

◆ **Soldering Conditions (Maximum allowable soldering conditions)**

Reflow soldering profile  
<Pb-free solder>

- Reflow soldering should not be done more than two times.
- Do not stress its resin while soldering.
- After soldering, do not warp the circuit board.
- Pay attention to electrostatic (ESD).

◆ Package Tape Specifications (4000 Pcs/Reel) :

5 Reels in one Box

16 Boxes in one Carton

## ◆ Storage and application notices

### 1. Storage

1. Calculated shelf life in sealed bag: 12 months at  $<30^{\circ}\text{C}$  and  $<90\%$  relative humidity (RH)
- 2.1 TOP LED: After bag is opened, devices that will be subjected to reflow solder or other high temperature process must be:
  - a) Mounted within: 168 hours of factory conditions  $\leq 30^{\circ}\text{C}/60\%$  RH, or
  - b) Stored at ambient of  $<20\%$  RH
- 2.2 CHIP LED: After bag is opened, devices that will be subjected to reflow solder or other high temperature process must be:
  - a) Mounted within: one year of factory conditions  $\leq 30^{\circ}\text{C}/60\%$  RH, or
  - b) Stored at ambient of  $<20\%$  RH.
3. Device require bake, before mounting, if:
  - a) Humidity indicator Card reads  $>10\%$  when read at  $25\pm 5^{\circ}\text{C}$
  - b) Above conditions are not metBaking condition: 24 hours at  $60\pm 3^{\circ}\text{C}$  and  $<5\%$  RH
4. The internal and esterand boxes can not be contacted with ground to prevent absorption of moisture;
5. No acid, alkali, salt, corrosive and explosive gas; away from sunlight and keep the environment clean;

### 2. Application

1. Do not use any unknown chemical liquid to clean LED, it will damage the LED resin surface; use the alcohol under the room temperature if necessary but less than 1 min, or use the ultrasonic cleaning with proper characters, such as correct power, frequency ,etc.
2. Do not touch the epoxy resin area when carrying LEDs by tweezers (as the following pictures), especially after the soldering process, the epoxy resin will turn to soft, the internal instruction will be damaged by the tweezers which cause the electric character's failure; nozzle is recommended by using SMT mounting.

Correct

Incorrect

3. Soldering iron: double-side soldering iron with power of less than 25W; soldering temperature: less than 300°C; soldering time: less than 3sec.; 1 time completed is recommended, if the 2<sup>nd</sup> soldering process is requested, 3mins must be left to ensure the high temperature status can return to room temperature.
  - a. REFLOW soldering: set and test the temperature of the different area of REFLOW equipment in advance.
  - b. To set the peak temperature according to different SMDs, but the actual peak temperature should be less than 260 °C ,processing time should be less than 10sec, only 1 time is allowed.
4. SMDs should be soldered at the coordinated position on the PCB.
5. Note of Electrical matter:
  - ① One-way conduction, LED does not allow the reverse driving.
  - ② LED is a kind of constant current component which can not be lighted by the constant voltage mode; a smaller voltage fluctuation can cause the large current fluctuation which causes the failure of LED.

Each LED should be drove under constant current mode if in a parallel circuit design, otherwise, the colour and brightness will be nonuniform; When the environmental temperature rising, the LED junction temperature will rise, internal resistance will decrease, so the current will be increased by the constant voltage power which short the life span.
  - ③ If the brightness of lighting source can meet the requirement, we recommend using the driving current less than the rated current, in order to improve the product's reliability.
6. LED is a kind of electrostatic sensitive devises, anti-static measures have to be processed during storage and operation:
  - ① LED production workshop should lay anti-static floor and ground connection, the work table have to use the anti-static materials and cover a table mater with the surface resistance of  $10^6$ - $10^9\Omega$ .
  - ② Production machine: REFLOW, SMT equipment, electric iron, test equipment; all the equipments must be well grounded, and the grounding alternating current impedance should be less than 1.0 $\Omega$ . A fan need to be installed on the equipments and production processes that easy to generate static electricity; the operators must wear anti-static clothing, shoes, wristband, and gloves, etc. in the process.
  - ③ LEDs must be contained in the anti-static box, and all the package material should be the anti-static materials.

7. The details electronic characters can refer to our product specification.

◆ Notes:

1、Above specification may be changed without notice. We will reserve authority on material change for above specification.

2、When using this product, please observe the absolute maximum ratings and the instructions for the specification sheets. We assume no responsibility for any damage resulting from use of the product which does not comply with the instructions included in the specification sheets.
