## About this Document

This document provides information for the WiConnect serial Wi-Fi application and the AMW004-A01 'Hornet' module available from ACKme Networks.

Products covered by this guide include:

- AMW004-A01 'Hornet'

Further information about WiConnect is available in the WiConnect Reference manual online at:

<http://wiconnect.ack.me>

## Organization

This document is organized into the following sections:

## 1 Introduction

The AMW004-A01 'Hornet' module is a through-hole module adaptor that allows the AMW004 'Wallaby' Wi-Fi module to be fitted to any board conforming to the de-facto standard 2mm pitch 2x10 pin sockets commonly used in embedded applications. The module is a self-contained low-power Wi-Fi networking module with onboard microcontroller and antenna. It comes with ACKme WiConnect firmware, providing easy manual and automated control of the module's features, straightforward and secure networking, OTA software upgrades, and access to the goHACKme IoT (Internet of Things) cloud.

### 3 Using WiConnect

For details of using the AMW004-A01 with WiConnect, see the ARG-AMW004E Reference Guide and the WiConnect Reference Guide, available online at <http://wiconnect.ack.me>.

A number of simple and more sophisticated example applications are also provided to help you get the most out of WiConnect and the AMW004 module.

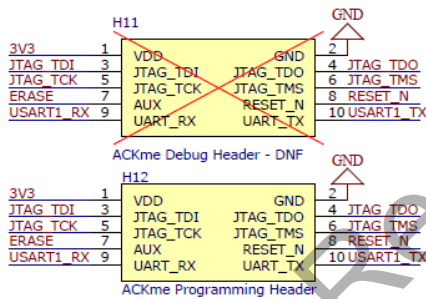

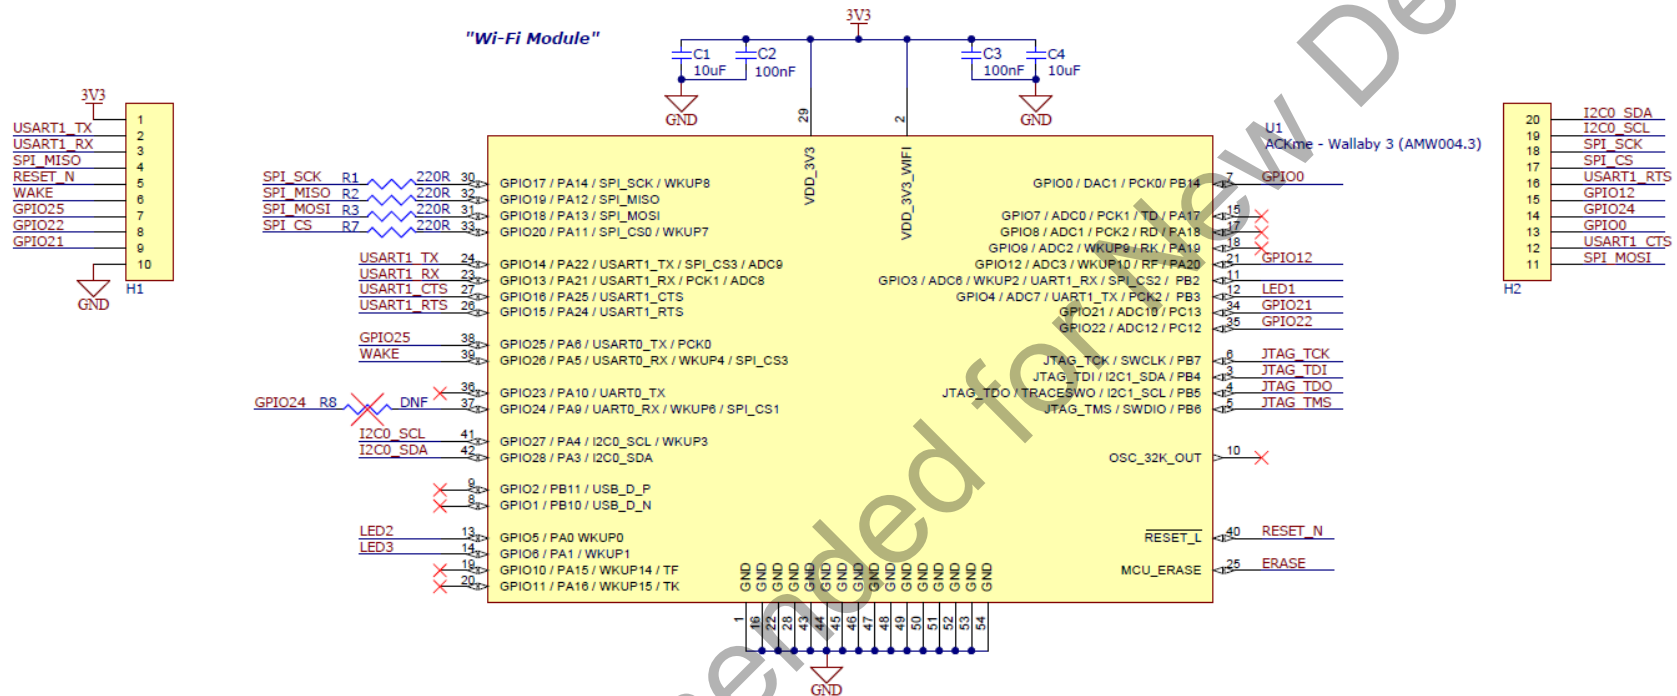

### 4 Ordering Information

Table 4 provides ordering information for AMW004-A01 and related evaluation boards.

**Table 3. Ordering Information**

Part Number	Picture	Description
AMW004-A01 'Hornet'		Hornet module adapter. Includes AMW004 module.
AAE001		Bare bones evaluation board that takes an AMW004-A01 Hornet module adapter. Does <b>NOT</b> include a AMW004-A01 'Hornet' module adapter!
AMW004-E02 'Marlin'		WiConnect development and evaluation platform for the AMW004-A01 Hornet through-hole pluggable module adapter. This part number includes both the AAE001 evaluation board and the AMW004-A01 module.
