## TABLE OF CONTENTS

### Combined MIL-DTL-38999 Series I, II, III

- Shell Size & Insert Arrangements Availability . . . . . 6-9
- Insert Arrangement Drawings . . . . . 10-17
- Specifications - Contact Ratings, Service Ratings, Finish Data . . . . . 18, 19

### MIL-DTL-38999, Series III TV

- Performance, Options . . . . . 21, 22
- Weight Comparison (Composite vs. Metal) . . . . . 23
- Test Data . . . . . 24
- How to Order (Commercial & Military) . . . . . 25-27
- How to Order (Boeing BACC63) . . . . . 28

### Shell Styles:

- Crimp Wall Mounting Receptacle TVP00R (D38999/20) /CTVP00R (D38999/20) . . . . . 29
- Crimp Box Mounting Receptacle TVP02R / CTVP02R . . . . . 30
- Crimp Straight Plug TV06R (D38999/26) / CTV06R (D38999/26) . . . . . 31
- Crimp CLUTCH-LOK™ Straight Plug for High Vibration TV26/MTV26 . . . . . 32
- Crimp Jam Nut Receptacle TV07R (D38999/24) / CTV07R (D38999/24) . . . . . 33
- Crimp Line Receptacle TV01R / CTV01R . . . . . 34
- Crimp Flange Mounting Plug TV09R . . . . . 35
- Hermetic Box Mounting Receptacle TVPS02Y (D38999/21) . . . . . 36
- Hermetic Jam Nut Receptacle TVS07Y (D38999/23) . . . . . 37
- Hermetic Solder Mounting Receptacle TVSIY (D38999/25),  
Hermetic Weld Mounting Receptacle TVSHIY (D38999/27) . . . . . 38
- Breakaway Fail-Safe Lanyard Release Plug  
D38999/29 & /30 (88-5565 / 91-5565) . . . . . 39, 40
- Breakaway Fail-Safe How to Order (Military/Commercial) . . . . . 41, 42
- Breakaway MIL-STD-1760 Lanyard Release Plug D38999/31 . . . . . 43
- Breakaway MIL-STD-1760 How to Order (Military) . . . . . 44
- Breakaway Hybrid, Low Profile Lanyard Release Plug . . . . . 45
- Stores Management Type II, Rail Launch (MIL-STD-1760) . . . . . 45

## MIL-DTL-38999 Series III Typical Markets:

- Military & Commercial Aviation
- Military Vehicles
- Missiles & Ordnance
- C4ISR
- Space Applications

- 38999

X Completely tooled.  
 • Majority of tooling is completed (contact Amphenol Aerospace for availability).  
 ◆ Not tooled for 02-R.  
 P Available with Pin contacts only  
 S Available with Socket contacts only  
 P/S Available with Pin contacts or Socket contacts  
 ★ Ground plane proprietary option available. Arrg. 9-5 is exclusively ground plane type.  
 ■ Not Mil-Qualified.  
 ◆ 21-75 is Mil-Qualified with twinax contacts only.  
 Note: MS connector 21-75 is supplied with size 8 twinax.  
 Commercial connector 21-75 is supplied with size 8 coax.

■ HD designates High Density 38999 Series III insert patterns which use size 23 contacts only. Not rated over 175°C.  
 \* Hermetic inserts - solder termination standard. (Contact Amphenol Aerospace for optional PCB or eyelet termination).  
 \*\* Two size 16 contacts dedicated to fiber optics. See the Fiber Optic section for more information.  
 \*\*\* For use in MIL-STD-1760 applications (see pages 43 & 44).  
 † For RG 180/U and RG 195/U cables only.  
 †† Size 8 Coax and Twinax are interchangeable.  
 (2) Not Tooled for RP or 02RE  
 (3) Pin inserts only, not tooled for RP or 02RE (Consult Amphenol Aerospace for avail.)  
 (5) MS Connector 21-79 has provision for two size 8 coax contacts. Coax contacts are not supplied unless specified by customer.

- X Completely tooled.
- Majority of tooling is completed (contact Amphenol Aerospace for availability).
- ♦ Not tooled for 02-R.
- P Available with Pin contacts only
- S Available with Socket contacts only
- P/S Available with Pin contacts or Socket contacts
- ★ Ground plane proprietary option available. Arrg. 9-5, 26-62 is exclusively ground plane type.
- Not Mil-Qualified.
- ◇ 21-75 is Mil-Qualified with twinax contacts only.
- \* Hermetic inserts - solder termination standard. (Contact Amphenol Aerospace for optional PCB or eyelet termination).
- HD designates High Density 38999 Series III insert patterns which use size 23 contacts only. Not rated over 175°C.
- \*\* Two size 16 contacts dedicated to fiber optics. See the Fiber Optic Section for more information.
- \*\*\* For use in MIL-STD-1760 applications (see pages 43 & 44).
- † For RG 180/U and RG 195/U cables only.
- †† Size 8 Coax and Twinax are interchangeable.
- (2) Not Tooled for RP or 02RE
- (3) Pin inserts only, not tooled for RP or 02RE (Consult Amphenol for avail.)
- (4) MS connector 21-75 is supplied with size 8 twinax. Commercial connector 21-75 is supplied with size 8 coax.
- (5) MS Connector 21-79 has provision for two size 8 coax contacts. Coax contacts are not supplied unless specified by customer.

(Insert arrangements requiring non-standard shells or larger contacts)

- X Completely tooled.
- Majority of tooling is completed (contact Amphenol Aerospace for availability).
- ◆ Not tooled for 02-R.
- P Pin inserts only (contact Amphenol Aerospace for socket availability).
- ★ Ground plane proprietary option available. Arrangement 9-5, 25-62 is exclusively ground plane type.
- Not Mil-Qualified.
- \* Hermetic inserts - solder termination standard. (Contact Amphenol Aerospace for optional PCB or eyelet termination).
- \*\* Two size 16 contacts dedicated to fiber optics. See the Fiber Optic section for more information.
- \*\*\* For use in MIL-STD-1760 applications (pgs. 43 & 44).
- † For RG 180/U and RG 195/U cables only.
- †† Size 8 Coax and Twinax are interchangeable. Note: 25L-3 and 25L-7 require longer shells.

## Tri-Start™ MIL-DTL-38999 Series III with Metal Shells - Aluminum, Stainless Steel, Class K Firewall

Amphenol® Tri-Start MIL-DTL-38999\* Series III Connectors offer the highest performance capabilities for both general duty and severe environment applications. Meeting or exceeding MIL-DTL-38999 Series III requirements, the Tri-Start connector with standard metal shells (aluminum or stainless steel with several finish options) offers these features:

- **EMI Shielding** - solid metal-to-metal coupling, grounding fingers, electroless nickel plating, and thicker wall sections provide superior EMI shielding capability of 65dB minimum at 10 GHz
- **Contact Protection** - recessed pins in this 100% scoop-proof connector minimize potential contact damage
- **Moisture Resistance** - improved interfacial seal design helps prevent electrolytic erosion of contacts
- **Corrosion Resistance** - shells of stainless steel or cadmium over nickel plating withstand a 500 hour salt spray exposure
- **Vibration/Shock** - operates under severe high temperature vibration, through 200°C
- **Firewall Capability** - available in a stainless steel shell, class RK, RS
- **Lockwiring Eliminated** - unique, self-locking, quick coupling connector eliminates lockwiring
- **Quick Coupling** - completely mates and self-locks in a 360° turn of the coupling nut
- **Inventory Support Commonality** - uses standard MIL-DTL-38999 contacts, application tools, insert arrangements
- **Electrostatic Discharge Protection (ESD)** - protection for sensitive circuitry without diodes, varistors, etc., with the use of the Faraday Cage principle which shunts high voltage, high current discharge events (see page 331)
- **Hermetic**- air leakage limited to 1 X 10<sup>-7</sup> cm<sup>3</sup> per second optional
- **Qualified Specifications** - Stainless Steel qualified to BACC63DB and BACC63DC specifications

### Optional Shell Geometries

Amphenol offers a number of different shell configurations to fit your needs.

- Deep Reach Shells - For increased panel thickness
- Stand-off Flange Shells - For attachments to Printed Circuit Boards.
- Connector with Integral Strain Reliefs

\* MIL-DTL-38999 Series III supersedes MIL-C-38999 Series III.

#### Applicable Patents:

Tri-Start™ Connector Patent 4,109,990.

Composite Connector Patents:

4,268,103; 4,648,670; 4,682,832; 4,703,987.

Clutch-Lok® Patent 6,152,753.

## Series III Composite Tri-Start, Qualified to MIL-DTL-38999, Rev. J

MIL-Qualified to MIL-DTL-38999, Rev. K, the Amphenol® Composite Tri-Start Connector offers a lightweight, corrosion resistant connector with the same high performance features as its metal counterpart. The Composite Tri-Start Connector also includes the following features:

- **Lightweight** - 17% – 70% weight savings (17–40% weight savings vs. Aluminum) (60–70% weight savings vs. Stainless steel) See Composite weight comparison chart on page 23.
- **Corrosion Resistance** - available in standard MIL-DTL-38999 olive drab cadmium (-65°C to 175°C) and electroless nickel plating (-65°C to 200°C), both withstanding 2000 hours of salt spray exposure. The base material is able to withstand an indefinite exposure to salt spray.
- **Durability** - 1500 couplings minimum (in reference to connector couplings, not contacts)
- **Extended Life Contact** - Mil-approved plating process which provides 1500 couplings minimum
- Qualified to BACC63CT and BACC63CU specifications

## CLUTCH-LOK™ MIL-DTL-38999 Series III High Vibration Connector

The Tri-Start option CLUTCH-LOK offers all advantages of stainless steel/Class K firewall for MIL-DTL-38999 Series III connectors, plus a unique clutch design that actually tightens itself under vibration. Features include:

- High degree of differential torque
- No settling back to the next ratchet tooth
- Completely intermateable with all existing MIL-DTL-38999 Series III connectors
- Offers advantage in inaccessible, hard to reach areas where mating torque is difficult to apply and complete coupling is not verifiable by inspection

See page 32 for description, 25 – 27 for ordering.

**Series III, TV Tri-Start Connectors, offer more versatility & options than any other interconnection family!**

High reliability and increased versatility best describe Amphenol MIL-DTL-38999, Series III circular connectors. Originally designed for the harshest of environments and most demanding of applications, Amphenol MIL-DTL-38999 Series III, Tri-Start connectors continue to evolve in pace with the needs of an ever-changing market.

Amphenol Tri-Start connectors can be configured with a number of application specific technologies like High Density HD38999, Duallok, Filters, Hermetics, PC Tails, Fiber Optics, Flex, CLUTCH-LOK, Fail Safe, and contacts. Flexibility aids in design optimization through the combination of different technologies within a common, time-tested, harsh environment connector body.

For more information about options, please call 800-678-0141 or visit [www.amphenol-aerospace.com](http://www.amphenol-aerospace.com).

**Performance**

**Designed for Performance**

Numerous advantages in performance capability are designed into the Amphenol Tri-Start Connector. A positive metal to metal coupling design, grounding fingers, and electroless nickel plating provide superior EMI shielding capability of 65 dB minimum at 10 GHz.

Acme threads provide coupling durability. Thicker wall sections and a greater coupling surface area improve strength and shock resistance. Blunting of the thread on both the coupling nut and receptacle eliminates cross coupling. The connector quickly mates and self locks in a 360° turn of the coupling nut.

Elongated mounting holes permit the Tri-Start Connector to intermount with various existing MIL-Spec box or wall mount receptacles, giving it a design replacement advantage.

Shells of stainless steel or cadmium over nickel plating prevent severe corrosion. Resistance is tested through exposure to a 500 hour salt spray. Composite versions provide protection from salt spray exposure for 2000 hours. Other finish options are available; see how to order Tri-Start metal and Tri-Start Composite.

Recessed pins minimize potential contact damage in this 100% scoop-proof connector. In a blind mating application, mating shells cannot “scoop” the pins and cause a shorting or bending of contacts.

The design of the Amphenol Tri-Start interfacial seal meets the MIL-DTL-38999 Series III requirements for electrolytic erosion resistance.

A rigid dielectric insert with excellent electrical characteristics provides durable protection to the contacts. The socket contacts are probe proof, and all contacts are rear removable. They are plated in the standard 50 micro inches minimum gold, with 100 micro inches as an option, and are available in standard Tri-Start insert arrangements and special Pyle® insert arrangements in sizes 10 power, 12, 16, 20 and 22D contacts. Special insert patterns are also available with larger contacts in sizes 4 and 0.

### TRI-START, SERIES III TYPICAL SHIELDING EFFECTIVENESS TEST DATA

EMI/EMP SHIELDING EFFECTIVENESS dB  
TESTING BY TRIAXIAL METHOD

**Amphenol® Tri-Start connectors provide EMI/EMP shielding capability which exceeds MIL-DTL-38999 Series III requirements.**

The TV and CTV Series III connector with standard solid metal-to-metal coupling, EMI grounding fingers and conductive finishes have proven to be the ultimate in EMI/EMP shielding effectiveness. The charts illustrate shielding effectiveness data which is typical of Tri-Start connectors tested with the nickel finish (Class F-metal, Class M-composite) over a wide frequency range.

The vibration capability of the Tri-Start Series is shown in the chart below. This illustrates the most severe vibration envelope of any qualified connector available today. These capabilities along with a +200°C, -65°C temperature rating and superior moisture sealing protection provide the user with a connector that can withstand the most rigorous application.

### TRI-START, SERIES III TYPICAL SHIELDING EFFECTIVENESS TEST DATA

EMI/EMP SHIELDING EFFECTIVENESS dB  
TESTING BY MODE STIRRING METHOD

### TRI-START VIBRATION CRITERIA

\* Dependant on shell finish

Test data beyond 2GHz is subject to equipment variation.

NOTE: For test data information on the new Clutch-Lok Tri-Start, high vibration connectors, consult Amphenol Aerospace.

### Easy Steps to build a part number... Tri-Start Series III TV

#### Step 1. Select a Connector Type

Do you need a Mil-Spec marked connector?

| Military-MIS-Spec Market |   |
|--------------------------|---|
| D38999                   | Military MIL-DTL-38999 Series III Connector |

If you don't need Mil-Spec Marked Connector select from the choices below.

Next question to help you decide. What Shell Material & Temperature rating do you need?

| Aluminum 175°C                          |  |
|---|--|
| TV                                      | Tri-Start 175°C  |
| TVP                                     | Panel mounted receptacle 175°C   |
| Aluminum, Aluminum Bronze & Steel 200°C |  |
| TVS                                     | 200°C rated  |
| TVPS                                    | Panel mounted, 200°C rated receptacle  |
| Composite 175°C                         |  |
| CTV                                     | Composite 175°C  |
| CTVP                                    | Panel mounted composite receptacle 175°C   |
| Composite 200°C                         |  |
| CTVS                                    | 200°C rated, composite   |
| CTVPS                                   | Composite Panel mounted, 200° rated receptacle   |
| Steel 200°C                             |  |
| MTV                                     | CLUTCH-LOK connector with "MS" stamping (Note: remove dashes in how to order part number when ordering CLUTCH-LOK) |

#### Step 2. Select a Shell Style

| COMMERCIAL             |         |     |      | MILITARY   |                 |                           | Designates  |
|------------------------|---------|-----|------|------------|-----------------|---------------------------|---|

\* Consult Amphenol Aerospace for availability. \*\*Coaxial arrangements are not available in these classes.

### Quadrax or Differential Twinax:

The incorporation of Quadrax or Differential Twinax contacts requires a modified connector to accommodate keyed contacts.

\* D38999/26KJ20PN, is a series III stainless steel plug with twin axial and coaxial contacts that may not meet the firewall requirement of the specification. D38999/26KJ61HN, is a series III stainless steel plug with high durability contacts. However, the connector will be limited to 500 cycles of durability. Insert arrangements using multi-axial (i.e. coax, twinax, triax shielded) contacts should not be used in firewall applications.

### Step 4. Select a Shell Size & Insert Arrangement see pages 6-9

| Double Start Threads | Triple Start Threads |   |    |    |    |    |    |    |    |    | Mil Shell Size      |
|----------------------|----------------------|---|----|----|----|----|----|----|----|----|---------------------|
|                      | A                    | B | C  | D  | E  | F  | G  | H  | J  |    |                     |
| 7                    | 7H                   | 9 | 11 | 13 | 15 | 17 | 19 | 21 | 23 | 25 | Amphenol Shell size |

|                   |                |                  |                            |                 |                       |                       |
|-------------------|----------------|------------------|----------------------------|-----------------|-----------------------|-----------------------|
| 1. Connector Type | 2. Shell Style | 3. Service Class | 4. Shell Size-Insert Arrg. | 5. Contact Type | 6. Alternate Position | 7. Special Variations |
|                   |                |                  | 23-2                       |                 |                       |                       |

Shell Size & Insert Arrangement are on pages 6-9. First number represents Shell Size, second number is the Insert Arrangement.

\* Size 7 and 7H are Double Start Threads only

### Step 5. Select a Contact Type

|          | Designates   |
|----------|--|
| <b>P</b> | Pin Contacts   |
| <b>S</b> | Socket Contacts  |
| <b>H</b> | 1500 Cycle Pin Contacts  |
| <b>J</b> | 1500 Cycle Socket Contacts   |
| <b>A</b> | Same as "P" except supplied less pin Contacts  |
| <b>B</b> | Same as "S" except supplied less socket contacts ( A & B designate nonstandard contact applications) |
| <b>X</b> | Eyelet contacts, hermetics only  |

### Step 6. Select an Alternate Keying Position

#### Key/Keyway Position

| Shell Size      | Key & Keyway Arrangement Identification Letter | AR° or AP° BSC | BR° or BP° BSC | CR° or CP° BSC | DR° or DP° BSC |
|-----------------|--|----------------|----------------|----------------|----------------|
| 7, 7H           | <b>N*</b>                                      | 120            | 240            |                |                |
|                 | <b>A</b>                                       | 132            | 248            |                |                |
|                 | <b>B</b>                                       | 80             | 230            | NA             | NA             |
|                 | <b>C</b>                                       | 140            | 275            |                |                |
|                 | <b>D</b>                                       | 155            | 234            |                |                |

A plug with a given rotation letter will mate with a receptacle with the same rotation letter. The angles for a given connector are the same whether it contains pins or sockets. Master key stays fixed, minor keys rotate. Inserts are not rotated in conjunction with the master key/keyway.

| MTV            | 26          | RS            | X-X                      | X            | N                  | (XXX)              |

For parts with MS Stamping use MTV26( ) part number as shown above.

Designed for high vibration and harsh environments such as aircraft gas turbine engines, the CLUTCH-LOK is also an ideal choice for demanding applications such as aircraft, space and military ground vehicles. The unique clutch design of the Amphenol CLUTCH-LOK means that you don't have to compromise the need for quick, smooth mating of plugs and receptacles in order to get increased uncoupling torque.

The CLUTCH-LOK has proven to not only remain mated and pass all the Series III specification requirements, it also has proven to actually tighten itself under vibration. This is a powerful advantage over the traditionally high vibration application connectors. The CLUTCH-LOK is also a tremendous advantage in inaccessible, hard to reach areas where mating torque is difficult to apply and complete coupling is not verifiable by inspection.

**CLUTCH-LOK features and benefits:**

- High degree of differential torque
- Infinite free coupling and positive metal-to-metal bottoming with each mating
- No settling back to the next ratchet tooth
- Available with stainless steel shells and Class K firewall inserts
- All the advantages of MIL-DTL-38999 Series III including EMI/RFI shielding, electrolytic erosion resistance and contact protection with recessed pins
- Enhanced connector performance at affordable prices
- Completely intermateable with all existing MIL-DTL-38999 Series III connectors
- Fully QPL'd

# Series III, TV Breakaway Fail Safe Connectors

## Quick-Disconnect with an Axial Pull of Lanyard

38999

**Amphenol® Tri-Start Breakaway Fail Safe Connectors provide unequalled performance in environments requiring instant disengagement.**

Designed to provide quick disconnect of a connector plug and receptacle with an axial pull on the lanyard. The “Breakaway” Fail Safe connector family offers a wide range of electrical and mechanical features:

- Instant decoupling and damage free separation
- Completely intermateable with standard receptacles (D38999/20 and /24)
- Inventory support commonality through the use of standard insert arrangements and contacts

Breakaway unmating is initiated by applying a pull force to the lanyard which causes the operating sleeve on the plug to move away from the receptacle. Coupling segments on the plug then move away from the mating receptacle while expanding, thus releasing the receptacle. After completion of the unmating sequence, spring compression returns the sleeve and segments to their original positions. Unmating of the plug may also be accomplished by normal rotation of the coupling ring without affecting the breakaway capability.

**Amphenol offers a variety of lanyard plug styles including MIL-STD-1760 types 1, 2 and 6 for Stores Management applications.**

**The Tri-Start Breakaway Fail Safe connector exceeds the MIL-Spec Series III requirements for EM/EMP shielding and features include:**

- Solid metal-to-metal coupling
- EMI grounding fingers
- Conductive finishes

**Amphenol Breakaway Fail Safe connectors are qualified to MIL-DTL-38999/29, /30 and /31 (for MIL-STD-1760 Stores Management applications). In fact, Amphenol offers more qualified Breakaway shell size and insert combinations than any other QPL supplier.**

In addition to standard Breakaway connectors, Amphenol also manufactures custom breakaway connectors including those with:

- Highly durable non-metallic operating sleeves in a variety of lengths and diameters
- Increased pull-force capability
- Low-profile designs
- Custom lanyard lengths and backshells
- Low force separation capabilities
- Low insertion/separation force contacts
- Non-cadmium finishes

Whether you need a standard Breakaway, one of our custom Breakaways or a unique Breakaway design, please contact your local Amphenol representative.

Contact Amphenol Aerospace for more information on breakaway, quick-disconnect connectors. Other Amphenol circular families (MIL-DTL-26482, MIL-DTL-83723) also offer breakaway quick-disconnect connectors.

See accessories for breakaway connectors on page 111.

**Breakaway with Coax Contacts**

**Special configuration Fail Safe used on space telescope application.**

Lanyard is replaced by a swivel ring for remote disconnect and “wing arms” have been added for manual actuation accessibility by gloved astronauts.

| DOD Number Prefix | Spec Sheet Number | Service Class | Shell Size | Insert Arrangement | Lanyard Length Code | Alternate Keying Position |
|-------------------|-------------------|---------------|------------|--------------------|---------------------|---------------------------|
| <b>D38999/</b>    | <b>29</b>         | <b>F</b>      | <b>E</b>   | <b>35</b>          | <b>P</b>            | <b>N</b>                  |

#### Step 1. DOD Number Prefix

**D38999/** designates MIL-DTL-38999, Series III, Tri-Start Connector

#### Step 2. Select a Specification Sheet Number

|           |  |
|-----------|--|
| <b>29</b> | Designates Lanyard Release Plug with pin contacts    |
| <b>30</b> | Designates Lanyard Release Plug with socket contacts |

#### Step 4. & 5 Insert Availability

#### Step 3. Select a Service Class

|          |   |
|----------|---|
| <b>F</b> | Designates electroless nickel plated aluminum, optimum EMI shielding effectiveness -65dB@10 GHz specification min., 48 hour salt spray, 200°C |
| <b>W</b> | Designates corrosion resistant olive drab cadmium plate aluminum, 500 hour extended salt spray, EMI -50dB@10 GHz specification min., 175°C    |

| 12.520                      | 318                       | T                                   |
| 13.031                      | 331                       | U                                   |
| 14.016                      | 356                       | V                                   |
| 15.000                      | 381                       | W                                   |
| 16.024                      | 407                       | X                                   |
| 17.008                      | 432                       | Y                                   |
| 18.031                      | 458                       | Z                                   |

**Step 7. Military Alternate Keying Position**  
For alternate positions of connector (to prevent cross-mating) see alternate positioning on page 27. (N indicates normal)

**Easy Steps to build a part number... Commercial**

**FAIL SAFE 88-5565( ) & 91-5565( )**

Ordering procedure for example part number 88-556529-EP is shown below:

| 1.            | 2.                            | 3.                             | 4.             | 5.                  | 6.                                     |
|---------------|-------------------------------|--------------------------------|----------------|---------------------|--|
| Service Class | Connector Type Identification | Shell Size & Insert Arrg. Code | Required Field | Lanyard Length Code | Contact Type/Alternate Keying Position |
| 88            | 5565                          | 29                             | 0              | E                   | P                                      |

**Step 1. Select a Service Class**

|    |   |
|----|---|
| 88 | Designates corrosion resistant olive drab cadmium plate over nickel, 500 hour extended salt spray, EMI -50dB @ 10 GHz specification min., 175°C |
| 91 | Designates electroless nickel plated aluminum, optimum EMI shielding effectiveness -65dB @ 10 GHz specification min., 48 hour salt spray, 200°C |

These are standard finishes. Consult Amphenol Aerospace for other variations.

**Step 2. Select a Connector Type Identification**

|      |   |
|------|---|
| 5565 | Designates MIL-DTL-38999, Series III Tri-Start Lanyard Release Plug |
|------|---|

**Step 3. Select a Commercial Shell Size & Insert Arrangement Code**

MIL-DTL-38999, see insert availability chart on page 41.

**Step 4. Required Field**

|   |                                  |
|---|----------------------------------|
| 0 | The required field is always a 0 |
|---|----------------------------------|

**Step 5. Select a Lanyard Length Code**

See Table II (to the left) for lanyard length code number.

**Step 6. Select a Contact Type/Alternate Keying Position**

P designates pin, S designates socket for normal positioning of contacts. When an alternate position of the connector is required to prevent cross-mating, a different letter (other than P or S) is used. See alternate positioning on page 27, then convert to Amphenol Commercial coding by the following chart.

| Pin Contacts |                   | Socket Contacts |                   |
|--------------|-------------------|-----------------|-------------------|
| MS Letter    | Amphenol letter   | MS Letter       | Amphenol Letter   |
| PN           | <b>P (normal)</b> | SN              | <b>S (normal)</b> |
| PA           | <b>G</b>          | SA              | <b>H</b>          |
| PB           | <b>I</b>          | SB              | <b>J</b>          |
| PC           | <b>K</b>          | SC              | <b>L</b>          |
| PD           | <b>M</b>          | SD              | <b>N</b>          |
| PE           | <b>R</b>          | SE              | <b>T</b>          |

**HOW TO ORDER - BY MILITARY PART NUMBER FAIL SAFE D38999/31**

Ordering procedure for example part number D38999/31WE20PN1 is shown below:

**Easy Steps to build a part number... Military**

| 1.                | 2.                | 3.            | 4.                  | 5.                 | 6.            | 7.                        | 8.          |
|-------------------|-------------------|---------------|---------------------|--------------------|---------------|---------------------------|-------------|
| DOD Number Prefix | Spec Sheet Number | Service Class | Lanyard Length Code | Insert Arrangement | Contact Style | Alternate Keying Position | Type Number |
| D38999/           | 31                | W             | E                   | 20                 | P             | N                         | 1           |

**1. Select a DOD Number Prefix**

|         | Designates                                     |
|---------|--|
| D38999/ | MIL-DTL-38999, Series III Tri-Start Connectors |

**2. Specification Sheet Number**

|    | Designates   |
|----|--|
| 31 | Designates Lanyard Release Plug for MIL-STD-1760 with pin contacts |

**3. Select a Service Class**

|   | Designates   |
|---|--|
| F | Electroless nickel plated aluminum, optimum EMI shielding effectiveness –65dB @ 10 GHz specification min., 48 hour salt spray, 200°C |
| W | Corrosion resistant olive drab cadmium plate aluminum, 500 hour extended salt spray, EMI –50dB @ 10 GHz specification min., 175°C    |

**4. Select a Lanyard Length Code**

| Lanyard Length (in.) ±.236 | Lanyard Length (mm.) ± 6.0 | Lanyard Length Code for Part Number |
|----------------------------|----------------------------|-------------------------------------|
| 6.024                      | 153.0                      | E                                   |
| 6.535                      | 166.0                      | F                                   |
| 7.008                      | 178.0                      | G                                   |
| 7.520                      | 191.0                      | H                                   |
| 7.992                      | 203.0                      | I                                   |
| 8.504                      | 216.0                      | J                                   |
| 9.016                      | 229.0                      | K                                   |
| 9.528                      | 242.0                      | L                                   |

**5. Select an Insert Arrangement**

Only 11 or 20 are available contact arrangement numbers. See page 43.

**6. Contact Style – P & A are Valid Options**

|   | Designates  |
|---|---|
| P | Replaces the “no designation” option in the PIN on revision C and earlier revision of the Mil-Spec. |
| A | Designates supplied less contacts.  |

**7. Alternate Keying Position**

|   | Designates                       |
|---|----------------------------------|
| N | Is required for normal position. |

**8. Type Number**

Type 1, 2 or 6. See drawings on page 43.

For accessories for lanyard release plugs see Accessories section.

# D38999 Type Hybrid Breakaway – Series III

## Lower Profile Lanyard Release Plug, Crimp, Metal shells with Composite Operating Sleeve

**New Hybrid Lanyard Breakaway Fail Safe connector with a composite thermoplastic outer operating sleeve for greater durability.**

This new hybrid breakaway is the breakaway of choice for the Navy F-18 Program. Amphenol's hybrid lanyard design offers greater durability over D38999 aluminum and composite designs because of its ability to handle abuse taken after weapons release.

Other advantages include:

- Lower profile compared to full metal breakaway Fail Safe connectors
- Less weight

This Hybrid Breakaway meets the applicable requirements of MIL-DTL-38999/31 including random & sine vibration, ice resistance, fluid immersion and hydrolytic stability tests. (Test reports are available upon request).

Currently the hybrid breakaway is available in shell sizes 25 and 17. It uses standard inserts available for breakaway plugs sizes 25 and 17, and is also available with inserts 25-20 and 25-11 for MIL-STD-1760. Consult Amphenol Aerospace for ordering of the new hybrid breakaway connectors. These hybrid connectors will accommodate the standard backshells for breakaway connectors shown on Accessories section or the backshell section.

**New Hybrid Lanyard Release Plugs (Metal inside shells and Composite, lower profile outer sleeves)**

| Condition/Test             | Description   | Reference                |
|----------------------------|---|--------------------------|
| Durability                 | 400 complete mating/unmating cycles   | MIL-DTL-38999/31D        |
| High Impact Shock          | Nine hammer blows from 1,3 and 5 feet, three each in three axes on mounting panel.  | MIL-S- 901D              |
| Vibration                  | 10 to 2000Hz in three perpendicular axes, 4 hours in each axis for a total of 12 hours with no fracturing or breaking of parts. | MIL-STD-202F, Method 204 |
| Ice Resistance             | Pull tested after conditioned with Ice water at -18C for 35 minutes.  | MIL-DTL-38999/31D        |
| Fail Safe Disengagement    | Rotationally unmated 180° from full mate position and pull tested in both a straight direction and at 15°.                      | MIL-DTL-38999/31D        |
| High Speed Pull Separation | 100 cycles at 30 feet per second.   | MIL-DTL-38999/31D        |

## Stores Management Type II, Rail Launch

### Plugs and Receptacles that meet MIL-STD-1760

**Amphenol provides a Breakaway Rail Launch connector that is designed for use on aircraft that carry rail launch missiles such as AMRAAM.**

These connectors are designed for blindmating of stores on rail launch applications. They consist of a buffer plug and a missile receptacle that meet the specifications of MIL-STD-1760 Stores Management.

Other features and benefits include:

- Designed to MIL-C-83538 specifications
- Bayonet and push pull coupling
- Use standard MIL-DTL-38999 crimp termination with power, coax and twinax contacts also available
- Buffer provides flame barrier
- Buffers are replaceable

Consult Amphenol Aerospace for more information and ordering.
