Series

Baureihen

FMX-Series

FMX-Serie

- Coaxial contact for cable termination
- Inner conductor for solder termination
- Outer conductor for solder termination
- Outer conductor for solder or crimp termination
- *Koaxialkontakt für Kabelanschluss*
- *Innenleiter zum Löten*
- *Außenleiter zum Löten*
- *Außenleiter zum Löten oder Crimpen*

FMP-Series

FMP-Serie

- High power contacts
- *Hochstromkontakte*

Modifications

Modifikationen

Modifications / Modifikationen		
B	Socket with 4 slits	<i>Buchse mit vier Schlitzen</i>
E	With earthing spring	<i>mit Erdungsfeder</i>
F	Greased contacts	<i>befettete Kontakte</i>
K	With plastic retention clip	<i>mit Kunststoffhalterung</i>
M	CuBe retention clip	<i>CuBe-Halterung</i>
R	With knurl for secure fixing in the insulator	<i>mit Rändel für festen Sitz im Isolierkörper</i>
U	Narrower insertion zone for a more secure fixing in the insulator with a Cu-Be-retention clip	<i>engeres Einrastmaß für festen Sitz im Isolierkörper mit Cu-Be-Halterung</i>
W	With spring washer	<i>mit Federring</i>

FMS-Series

FMS-Serie

- Coaxial contact for cable termination
- Inner conductor for crimp or solder termination
- Crimp Snap-In System
- Outer conductor for solder or crimp termination
- *Koaxialkontakt für Kabelanschluss*
- *Innenleiter zum Crimpen oder Löten*
- *Crimp Snap-In System*
- *Außenleiter zum Löten oder Crimpen*

FMV-Series

FMV-Serie

- High voltage contacts
- *Hochspannungskontakte*

FME-Series

FME-Serie

- Coaxial contact for PCB termination
- *Koaxialkontakt für Leiterplattenanschluss*

FBM-Series

FBM-Serie

- Coaxial contact for D-Sub / Blind mate / For hidden mounting, e.g. in drawers for frequencies up to 3.5 GHz.
- *Koaxialkontakte für D-Sub / Blind mate / Für verdecktes Stecken z. B. bei Einschubschächten für Frequenzen bis zu 3,5 GHz*

FMG-Series

FMG-Serie

- Pneumatic contacts
- *Pneumatikkontakte*

VSWR Measurements (Examples)

VSWR Messungen (Beispiele)

VSWR

VSWR

The ratio of the maximum to minimum value of the voltage amplitude on a lead is known as the VSWR value. The quotient is a measurement of the quality of the adaptation or of the fluctuation of the resulting voltage surge. In the case of a mismatch, the outward wave is reflected onto the contact point. By superimposing the outward and return waves, a greater difference is obtained between the maximum and minimum voltage than for the outward wave. The VSWR value is 1.0 for a perfect adaptation. The reciprocal value is known as the adaptation factor m .

Das Verhältnis von Maximal- zu Minimalwert der Spannungsamplitude auf einer Leitung wird mit VSWR Wert bezeichnet. Der Quotient ist ein Maß für die Qualität der Anpassung bzw. der Welligkeit der resultierenden Spannungswelle. Bei Fehlanpassung wird die hinlaufende Welle an der Kontaktstelle reflektiert. Durch die Überlagerung der hinlaufenden und der rücklaufenden Spannungswelle ergibt sich für die resultierende ein größerer Unterschied zwischen der maximalen und der minimalen Spannungsamplitude als bei der hinlaufenden Welle. Der VSWR-Wert ist im Idealfall der Anpassung gleich 1.0, den Kehrwert bezeichnet man als Anpassungsfaktor m .

r : Reflection factor / Reflexionsfaktor

m : Adaptation factor / Anpassungsfaktor

a : Return loss / Rückflußdämpfung

VSWR: Voltage standing wave ratio / Stehwellenverhältnis

$$VSWR = \frac{U_{\max}}{U_{\min}} = \frac{1+r}{1-r}$$

$$r = \frac{VSWR - 1}{VSWR + 1}$$

$$m = \frac{1}{VSWR}$$

$$a = -20 \lg \frac{VSWR + 1}{VSWR - 1}$$

PCB Hole Pattern for Connectors with Straight PCB Terminations

Leiterplattenlochbild für Steckverbinder mit geradem Leiterplattenanschluss

All PCB hole patterns apply to male connectors with straight PCB contacts (signal contacts P1) and the coaxial contacts **FME010P...** or **FME005P...** (when using female connectors the hole pattern must be mirrored on the Y-axis).

Measurements without tolerances are in accordance with DIN ISO 2768 m.

Alle Lochbilder gelten für Stiftsteckverbinder mit geradem Leiterplattenanschluss (Signalkontakte P1) und eingebauten Koaxialkontakten **FME010P...** bzw. **FME005P...** (bei Verwendung von Buchsensteckverbindern muss das Lochbild an der Y-Achse gespiegelt werden).

Maße ohne Toleranzangabe nach DIN ISO 2768 m.
