Finisar's FCLF8520P2BTL, FCLF8521P2BTL and FCLF8522P2BTL 1000BASE-T Copper Small Form Pluggable (SFP) transceivers are based on the SFP Multi Source Agreement (MSA)<sup>1</sup>. They are compatible with the Gigabit Ethernet and 1000BASE-T standards as specified in IEEE Std 802.3<sup>2</sup>. The transceiver is RoHS compliant and per Directive 2011/65/EU<sup>3</sup> and Finisar Application Note AN-2038. The 1000BASE-T physical layer IC (PHY) can be accessed via I2C, allowing access to all PHY settings and features.

The FCLF8520P2BTL uses the SFP's RX\_LOS pin for link indication, and 1000BASE-X auto-negotiation should be disabled on the host system. The FCLF8521P2BTL is compatible with 1000BASE-X auto-negotiation, but does not have a link indication feature (RX\_LOS is internally grounded). See AN-2036, "Frequently Asked Questions Regarding Finisar's 1000BASE-T SFPs", for a more complete explanation on the differences between the two models and details on applications issues for the products. The FCLF8522 shall support both RX\_LOS pin for link indication and 1000BASE-X auto-negotiation.
