Application Notes

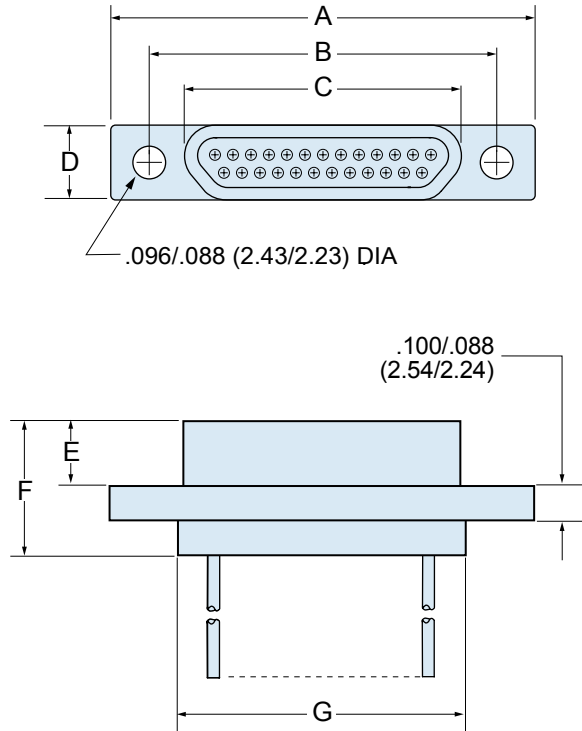

- Intermateability: M83513 plastic shell connectors are not intermateable with metal shell M83513 connectors.
- Tin-Plated Wire: Glenair M83513 connectors do not contain any components exceeding 97% tin.
- M22759/33 Corrosion: The M83513 spec contains a cautionary note regarding M22759/33 wire. The wire insulation is known to cause corrosion to metal parts when stored in a sealed environment. This corrosion has been observed on M83513 connectors. Glenair has implemented a packaging procedure to minimize or eliminate this problem. Connectors are individually wrapped with teflon tape, and the unit pack is a perforated paper envelope. M22759/33 continues to be the preferred wire for space applications.
