

## MICRO SWITCH™ Specialty Large Basic Switches

BS | DT | MN | MT | TB Series

004956

Issue 3

Datasheet

### DESCRIPTION

MICRO SWITCH™ premium specialty large snap-action switches are designed for repeatability and enhanced life. These series of precision switches feature application-specific characteristics. From double-break circuitry to handling power duty electrical loads, MICRO SWITCH™ premium large snap-action switches are suitable for a variety of applications.

BS Series switches offer alternatives to solve challenging switch applications. These unique solutions can provide adjustable operating characteristics, sequential outputs, or impact actuation (no external plunger).

DT Series switches consist of two independent single-pole double throw (SPDT) contacts in one housing controlled by an integral common actuator. The DPDT contact configuration provides a contact for the control circuit and a different contact for the signal or auxiliary circuit.

MT Series magnetic blow-out switches are designed to switch high-capacity (125 Vdc/250 Vdc) electrical loads. An integral magnet around the contact gap deflects the arc away from the contacts, extending switch life. Vents between the cover and housing allow the hot gas to escape.

Easy to gang mount, MN Series single pole double throw double-break switches are for use with limit or control mechanisms on machine tools, presses, or other equipment.

MICRO SWITCH™ TB Series miniature single pole double throw double break switches offer a means of controlling circuits similar to the MN Series switches except in a smaller package.

### DIFFERENTIATION

- Double pole switch options in small package for increased application flexibility
- Double break switch options in compact design requires less space on equipment
- -55 °C [-67 °F] low temperature capability for harsh outdoor or cold room applications

### FEATURES

- Double pole design in small package allows for control of two independent circuits (DT Series and MN Series)
- Switch design with adjustable operating characteristics (BS Series)
- Higher dc current capacity at 125 Vdc and 250 Vdc with magnetic blow-out contact design (MT Series)
- Compact switch package with double-break contacts (MN Series and TB Series)
- Variety of integral plunger and lever options or auxiliary plunger and lever options
- Most switches mount on the common 25,4 mm [1.00 in] centers
- Metal or plastic enclosures available to prevent contact with switch terminals
- Select switch series with a temperature range of -55 °C to 85 °C [-67 °F to 185 °F]
- Agency certifications with CSA and UL for select catalog listings
- MIL-PRF-8805 for select DT Series catalog listings

### POTENTIAL APPLICATIONS

- Temperature and pressure switch assemblies
- Motor and solenoid dc control circuits
- Welder control circuits
- Switch element in machine tools
- Switch element in manually operated devices

### VALUE TO CUSTOMERS

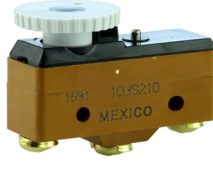

- Can control two independent circuits in a small package (DT Series and TB Series)
- Unique switch design with adjustable operating characteristics (BS Series)
- Magnetic blow-out contact design permits control of dc circuits in a small package size (MT Series)
- Double break switch design adds element of redundancy within small switch package (MN series and TB Series)

### PORTFOLIO

The five different series of premium specialty large basic switches (BS Series, DT Series, MN Series, MT Series, and TB Series) complements the four different families of premium large basic switch series ([BA Series](#), [BE Series](#), [BM Series](#), and [BZ Series](#)).

# MICRO SWITCH™ Specialty Large Basic Switches BS | DT | MN | MT | TB Series

Table 1. Specifications

Series	BS Series	DT Series	MT Series	MN Series	TB Series
					
Differentiator	adjustable switch characteristics or special circuitry	same size as the MICRO SWITCH™ BZ Series, but double pole double throw (DPDT)	designed for power duty dc loads	double-break contacts	smaller double-break package
Use	pressure or temperature switch assemblies	design permits several different wiring configurations	control circuits to switch high capacity (125 Vdc and 250 Vdc) systems	limit or control mechanisms	limit or control mechanisms
Ampere rating	Up to 20 A	10 A	10 A	15 A	10 A
Circuitry	SPDT, SPNC	DPDT	SPDT	SPDT DB	SPDT-DB, DPDT-DB
Operating force	Up to 9,73 N [35 oz]	3,34 N to 5,56 N [12.0 oz to 20.0 oz] max.	3,34 N to 5,00 N [12 oz to 18 oz] max.	1,95 N to 3,1 N [7 oz to 11 oz]	1,95 N to 3,89 N [7 oz to 14 oz] max.
Termination	solder, screw	screw	solder, screw	screw	solder, screw
Actuator	impact actuation (no plunger), pin plunger (SST), overtravel plunger (SST)	pin plunger, straight plunger, straight lever, reversed lever, roller lever	pin plunger, straight lever, roller lever, flexible leaf, flexible leaf with roller	pin plunger	pin plunger
Voltage	up to 480 Vac	125 Vac, 250 Vac, 28 Vdc	125 Vdc, 250 Vdc	480 Vac	250 Vac
Agency approvals	UL, CSA (most models)	UL recognized; CSA certified, MIL-PRF-8805	UL recognized	UL recognized; CSA certified	UL recognized, CSA certified
Operating temperature	-55 °C to 85 °C [-67 °F to 185 °F]	-55 °C to 85 °C [-67 °F to 185 °F]	-55 °C to 82 °C [-67 °F to 180 °F]	-55 °C to 85 °C [-67 °F to 185 °F]	-55 °C to 125 °C [-67 °F to 257 °F]
Contact material	silver	silver	silver	silver	silver
Housing	phenolic	general purpose phenolic	arc resistant melamine	general purpose phenolic	general purpose phenolic
Expected mechanical life	Up to 20,000,000 operations at 95 % survival	3,000,000 operations	100,000 operations	10,000,000 cycles	7,000,000 operations

\* Except where stated ±1,14 mm [±0.045 in]

NOTE: All actuators are for use with pin plunger types only, except catalog listing JR.

**OPERATING CHARACTERISTICS**

**Table 22. Operating Characteristics Definitions**

Characteristic	Description
<b>Differential Travel-DT</b>	Plunger or actuator travel from point where contacts “snap-over” to point where they “snap-back.”
<b>Free Position-FP</b>	Position of switch plunger or actuator when no external force is applied.
<b>Full Overtravel Force</b>	Force required to attain full overtravel of actuator.
<b>Operating Position-OP</b>	Position of switch plunger or actuator at which point contacts snap from normal to operated position. With flexible or adjustable actuators, the operating position is measured from the end of the lever or its maximum length. Location of operating position measurement shown on mounting dimension drawings.
<b>Operating Force-OF</b>	Amount of force applied to switch plunger or actuator to cause the contact “snap-over.” Note in the case of adjustable actuators, the force is measured from the maximum length position of the lever.
<b>Overtravel-OT</b>	Plunger or actuator travel safely available beyond operating position.
<b>Pretravel-PT</b>	Distance or angle traveled in moving plunger or actuator from free position to operating position.
<b>Release Force-RF</b>	Amount of force still applied to switch plunger or actuator at the moment contacts snap from operated position to non-operated position.
<b>Total Travel</b>	Distance from actuator free position to overtravel limit position.

## **WARNING** **PERSONAL INJURY**

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

**Failure to comply with these instructions could result in death or serious injury.**

## **WARNING** **MISUSE OF DOCUMENTATION**

- The information presented in this product sheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

**Failure to comply with these instructions could result in death or serious injury.**

### Warranty/Remedy

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgement or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items it finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While we provide application assistance personally, through our literature and the Honeywell web site, it is up to the customer to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this printing. However, we assume no responsibility for its use.
