

## Silicon Diffused Power Transistor

PHE13009

## GENERAL DESCRIPTION

The PHE13009 is a silicon npn power switching transistor in the TO220AB envelope intended for use in high frequency electronic lighting ballast applications, converters, inverters, switching regulators, motor control systems, etc.

## QUICK REFERENCE DATA

| SYMBOL      | PARAMETER                             | CONDITIONS                                  | TYP. | MAX. | UNIT          |
|-------------|---------------------------------------|---|------|------|---------------|
| $V_{CESM}$  | Collector-emitter voltage peak value  | $V_{BE} = 0\text{ V}$                       | -    | 700  | V             |
| $V_{CBO}$   | Collector-Base voltage (open emitter) |   | -    | 700  | V             |
| $V_{CEO}$   | Collector-emitter voltage (open base) |   | -    | 400  | V             |
| $I_C$       | Collector current (DC)                |   | -    | 12   | A             |
| $I_{CM}$    | Collector current peak value          |   | -    | 24   | A             |
| $P_{tot}$   | Total power dissipation               | $T_{mb} \leq 25\text{ °C}$                  | -    | 80   | W             |
| $V_{CESat}$ | Collector-emitter saturation voltage  | $I_C = 5.0\text{ A}; I_B = 1.0\text{ A}$    | 0.32 | 1.0  | V             |
| $h_{FEsat}$ |                                       | $I_C = 5.0\text{ A}; V_{CE} = 5\text{ V}$   | -    | 40   |               |
| $t_f$       | Fall time                             | $I_C = 5.0\text{ A}; I_{B1} = 1.0\text{ A}$ | 0.1  | 0.5  | $\mu\text{s}$ |

## PINNING - TO220AB

| PIN | DESCRIPTION |

**DEFINITIONS**

|  |   |
|--|---|
| <b>Data sheet status</b>   |   |
| Objective specification  | This data sheet contains target or goal specifications for product development.       |
| Preliminary specification  | This data sheet contains preliminary data; supplementary data may be published later. |
| Product specification  | This data sheet contains final product specifications.                                |
| <b>Limiting values</b>   |   |
| Limiting values are given in accordance with the Absolute Maximum Rating System (IEC 134). Stress above one or more of the limiting values may cause permanent damage to the device. These are stress ratings only and operation of the device at these or at any other conditions above those given in the Characteristics sections of this specification is not implied. Exposure to limiting values for extended periods may affect device reliability. |   |
| <b>Application information</b>   |   |
| Where application information is given, it is advisory and does not form part of the specification.  |   |
| © Philips Electronics N.V. 1999  |   |
| All rights are reserved. Reproduction in whole or in part is prohibited without the prior written consent of the copyright owner.  |   |
| The information presented in this document does not form part of any quotation or contract, it is believed to be accurate and reliable and may be changed without notice. No liability will be accepted by the publisher for any consequence of its use. Publication thereof does not convey nor imply any license under patent or other industrial or intellectual property rights.   |   |

**LIFE SUPPORT APPLICATIONS**

These products are not designed for use in life support appliances, devices or systems where malfunction of these products can be reasonably expected to result in personal injury. Philips customers using or selling these products for use in such applications do so at their own risk and agree to fully indemnify Philips for any damages resulting from such improper use or sale.
