

# Caps

While flat surface caps are standard, REAN now offers a slightly raised (domed) top for several series. All caps are available in any of the ten resistor colors with or without a white or black marker line. These caps work in any application to compliment or color code any two-piece push-on, dual-concentric, or collet knob.

Color and line options are listed on the back cover of this brochure.

Part Number		Description	Surface Material	Colors cap/line
Domed	Flat			
<b>T101</b>	<b>T100</b>	Cap for C100 collet knob and P102 10 mm push-on knob.	H	0-9/0 or 9 or X
