Miniature Basic Switch

## High Reliability for Micro Load Applications, Even in Adverse Atmospheres (Dust, High Humidity, Silicon Gas, etc.)

- The reed switch offers exceptional contact reliability in micro load applications.
- Same mounting pitch as for the V Miniature Basic Switch.
- High durability with a bounce time of 1 ms max.

## RoHS Compliant

## Model Number Legend

1. Actuator

None : Pin plunger model
L11 : Short hinge lever
L : Hinge lever
L13 : Simulated roller lever
L22 : Short hinge roller lever
L2 : Hinge roller lever
2. Maximum Operating Force (OF)

None: $0.49 \mathrm{~N}\{50 \mathrm{gf}\}$
E : $0.25 \mathrm{~N}\{25 \mathrm{gf}\}$
(for pin plungers only)
G : $0.98 \mathrm{~N}\{100 \mathrm{gf}\}$
Note. These values are for the pin plunger models.

## List of Models

| Actuator | Maximum <br> Operating <br> Force (OF) | Model |
| :---: | :---: | :---: |
| Pin plunger | $0.25 \mathrm{~N}\{25 \mathrm{gf}\}$ | D2RV-E |
|  | 0.49 N \{50 gf $\}$ | D2RV |
|  | 0.98 N \{100 gf $\}$ | D2RV-G |
| Short hinge lever | 0.49 N \{50 gf $\}$ | D2RV-L11 |
|  | 0.98 N \{100 gf $\}$ | D2RV-L11G |
| Hinge lever | $0.25 \mathrm{~N}\{25 \mathrm{gf}\}$ | D2RV-L |
|  | 0.49 N \{50 gf $\}$ | D2RV-LG |
| Simulated roller lever | $0.25 \mathrm{~N}\{25 \mathrm{gf}\}$ | D2RV-L13 |
|  | $0.49 \mathrm{~N}\{50 \mathrm{gf}\}$ | D2RV-L13G |
| Short hinge roller lever | $0.49 \mathrm{~N}\{50 \mathrm{gf}\}$ | D2RV-L22 |
|  | 0.98 N \{100 gf $\}$ | D2RV-L22G |
| Hinge roller lever | $0.25 \mathrm{~N}\{25 \mathrm{gf}\}$ | D2RV-L2 |
|  | $0.49 \mathrm{~N}\{50 \mathrm{gf}\}$ | D2RV-L2G |

## Contact Form

OSPST-NO

## Ratings

| Switching voltage | 100 VDC (max.) |
| :--- | :--- |
| Switching current | 0.25 ADC (max.) |
| Contact capacity | 10 WDC (max.) |

Note. The above rating values apply under the following test conditions.
(1) Ambient temperature: $20 \pm 2^{\circ} \mathrm{C}$
(2) Ambient humidity: $65 \pm 5 \%$
(3) Operating frequency: 30 operations $/ \mathrm{min}$

## Characteristics

| Permissible operating speed |  | 0.1 mm to $1 \mathrm{~m} / \mathrm{s}$ (for pin plunger models) |
| :---: | :---: | :---: |
| Permissible operating frequency | Mechanical | 200 operations/min |
|  | Electrical | 200 operations/min |
| Insulation resistance |  | $100 \mathrm{M} \Omega$ min. (at 500 VDC with insulation tester) |
| Contact resistance (initial value) |  | $150 \mathrm{~m} \Omega$ max. |
| Dielectric strength * 1 | Between terminals of the same polarity | 200 VDC 1 min |
|  | Between currentcarrying metal parts and ground | $500 \mathrm{VAC} 50 / 60 \mathrm{~Hz}$ for 1 min |
|  | Between each terminal and non-currentcarrying metal parts | $500 \mathrm{VAC} 50 / 60 \mathrm{~Hz}$ for 1 min |
| Vibration resistance*2 | Malfunction | 10 to $55 \mathrm{~Hz}, 1.5 \mathrm{~mm}$ double amplitude |
| Shock resistance | Destruction | $500 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 50 G$\}$ max. |
|  | Malfunction *2 | $200 \mathrm{~m} / \mathrm{s}^{2}$ \{approx. 20G\} max. |
| Durability * 3 | Mechanical | 10,000,000 operations min. (60 operations/min) |
|  | Electrical | 3,000,000 operations min. (30 operations/min) |
| Degree of protection |  | IEC IP40 |
| Ambient operating temperature |  | $-10^{\circ} \mathrm{C}$ to $+60^{\circ} \mathrm{C}$ (at ambient humidity of $60 \%$ max.) (with no icing or condensation) |
| Ambient operating humidity |  | $80 \%$ max. (for $+5^{\circ} \mathrm{C}$ to $+35^{\circ} \mathrm{C}$ ) |
| Weight |  | Approx. 7 g (for pin plunger models) |

Note. The data given above are initial values.
*1. The values for dielectric strength shown are for models with a Separator (refer to "Basic Switch Common Accessories").
*2. For the pin plunger models, the above values apply for use at the free position and total travel position. For the lever models, they apply at the total travel position. Close or open circuit of the contact is 1 ms max.
*3. For testing conditions, consult your OMRON sales representative.

| Movement Differential | MD | Max. | 1.6 mm |
| Operating Position | OP | $19.9 \pm 1.2 \mathrm{~mm}$ |  |

Note 1. Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.
Note 2. The operating characteristics are for operation in the A direction ( $\downarrow$ ).

## Precautions

丸Please refer to "Basic Switches Common Precautions" for correct use.

## Cautions

## OHandling

Do not drop the Switch or apply strong shock. It may result in internal mechanism damages and may deteriorate the characteristics of the inner Reed Switch.

## -Effect of the External Vibration

When a vibration of 1 kHz or higher is applied, note that false switching operations may occur due to resonant frequency, even with a low acceleration.

## -Soldering

- Terminal connections

Complete the soldering at the iron tip temperature between 250 to $350^{\circ} \mathrm{C}$ ( 60 W ) within 5 seconds, and do not apply any external force for 1 minute after soldering.
Apply minimum amount of flux required. It may result in contact failure once the flux penetrates into the internal part of the Switch.

## Correct Use

## -Effect of the External Magnetic Fields

- If two or more switch units are closely installed, mutual interference due to the fringing field will occur, resulting in malfunction. Be sure to keep the gap between the switch units 8 mm or more.
- If you install the switch unit on the iron plate, each operating characteristic will change. Therefore, confirm that the interval between the switch units should be 2 mm or more.
- Do not use the switch in some area where a strong external magnetic field would be applied, otherwise malfunction will be caused.
- Use nonmagnetic brass or stainless steel (SUS304 alloy) screws for installation. Do not use any iron screw.

[^0]:    Note 1. Unless otherwise specified, a tolerance of $\pm 0.4 \mathrm{~mm}$ applies to all dimensions.
    Note 2. The operating characteristics are for operation in the A direction ( $\downarrow$ ).
