

Panasonic ideas for life

Small size, controlled 7.5A inrush current possible

TX RELAYS TH types

RoHS compliant

FEATURES

- 1. Small size, controlled 7.5A inrush current possible
- 2. 2,000 V breakdown voltage between contact and coil

The body block construction of the coil that is sealed at formation offers a high breakdown voltage of 2,000 V between contact and coil, and 1,000 V between open contacts.

3. Outstanding surge resistance.

Surge breakdown voltage between open contacts:

1,500 V 10×160μ sec. (FCC part 68) Surge breakdown voltage between contact and coil:

2,500 V 2×10µ sec. (Bellcore)

4. Nominal operating power: High sensitivity of 140mW

By using the highly efficient polar magnetic circuit "seesaw balance mechanism", a nominal operating power of 140 mW (minimum operating power of 79 mW) has been achieved.

- 5. High contact capacity: 2 A 30 V DC
- 6. Compact size

 $15.0(L) \times 7.4(W) \times 8.2(H)$.591(L) × .291(W) × .323(H)

7. Outstanding vibration and shock resistance.

Functional shock resistance: 750 m/s² Destructive shock resistance:

1.000 m/s²

Functional vibration resistance: 10 to 55 Hz (at double amplitude of

3.3 mm .130 inch)

Destructive vibration resistance:

10 to 55 Hz (at double amplitude of

5 mm .197 inch)

8. Sealed construction allows automatic washing.

A range of surface-mount types is also available

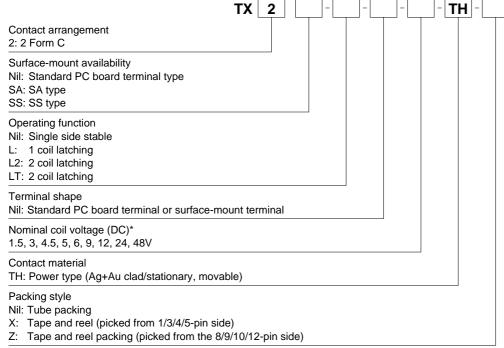

SA: Low-profile surface-mount terminal type

SS: Space saving surface-mount terminal type

TYPICAL APPLICATIONS

- 1. Air-conditioning control (solenoid load)
- 2. Others, High-capacity control etc.

ORDERING INFORMATION

Notes: 1. *48 V coil type: Single side stable only

2. In case of 5 V transistor drive circuit, it is recommended to use 4.5 V type relay.

TYPES

1. Standard PC board terminal

Contact	Nominal coil	Single side stable	Single side stable 1 coil latching 2 coil latching (L2)		2 coil latching (LT)
arrangement	voltage	Part No.	Part No.	Part No.	Part No.
