- NOTES:**
- The temperature of the component (ambient plus temperature rise) must be within the specified operating temperature range.
 - Inductance tested at 100kHz, 10mV_{RMS}
 - Inductance drop = 10% typical at the saturation current
 - ΔT = 15°C rise typical at the heating current
 - The rated current is the lower of the saturation or heating current

- Optional Tape & Reel packaging can be ordered by adding a "T" suffix to the part number (i.e. P0751.102NL becomes P0751.102NLT). Pulse complies to industry standard tape and reel specification EIA481.
- The "NL" suffix indicates a RoHS-compliant part number. Non-NL suffixed parts are not necessarily RoHS compliant, but are electrically and mechanically equivalent to NL versions. If a part number does not have the "NL" suffix, but an RoHS compliant version is required, please contact Pulse for availability.
