

STW29NK50Z

N-CHANNEL 500 V - 0.105Ω - 31A TO-247 Zener-Protected SuperMESH™ MOSFET

Table 1: General Features

TYPE	V _{DSS}	R _{DS(on)}	I _D	Pw
STW29NK50Z	500 V	< 0.13 Ω	31 A	350 W

- TYPICAL $R_{DS}(on) = 0.105 \Omega$
- EXTREMELY HIGH dv/dt CAPABILITY
- 100% AVALANCHE TESTED
- GATE CHARGE MINIMIZED
- VERY LOW INTRINSIC CAPACITANCES
- VERY GOOD MANUFACTURING REPEATIBILITY

DESCRIPTION

The SuperMESH™ series is obtained through an extreme optimization of ST's well established strip-based PowerMESH™ layout. In addition to pushing on-resistance significantly down, special care is taken to ensure a very good dv/dt capability for the most demanding application. Such series complements ST full range of high vltage MOSFETs including revolutionary MDmesh™ products.

APPLICATIONS

- HIGH CURRENT, HIGH SPEED SWITCHING
- IDEAL FOR OFF-LINE POWER SUPPLIES
- WELDING MACHINES
- LIGHTING

PROTECTION FEATURES OF GATE-TO-SOURCE ZENER DIODES

The built-in 'back to-back Zener diodes have specifically been designed to enhance not only the device's ESD (apat ilit;), but also to make them safely absorb possible voltage transients that may occasionally be applied froin gate to source. In this respect the Zener voltage is appropriate to achieve an efficient and cost-effective intervention to protect the device's integrity. These integrated Zener diodes thus avoid the usage of external components.
