### Features and benefits

- | FN 2030 filters are designed for easy and fast chassis mounting
- | The FN 2030 filters are also available as B versions with no Y-capacitors for medical applications as well as A versions with low capacitance for safety critical applications with a requirement for low leakage currents
- | All filters provide an exceptional conducted attenuation performance, based on chokes with high permeable core material and excellent thermal behavior
- | The higher inductivity versus amperage offers increased attenuation performance with same form factor compared to FN 2010 and FN 2020 filter series
- | All FN 2030 filters can be delivered with optional surge pulse protection. FN 2030 filters are also available as two-stage filters (FN 2090 series) for very noisy environment
- | Various terminal options allow you to select the desired connection style

### Typical application

- | Electrical and electronic equipment
- | Consumer goods
- | Household equipment
- | Medical equipment
- | Electronic data processing equipment
- | Office automation and datacom equipment
- | Various noisy applications requiring high filter performance
