## 1. Introduction

---

This Grove consists of one 8mm RGB LED. It operates at 5V DC. When SIG pin is logic HIGH, the RGB LED will light up. Perfect for use on Seeduino digital outputs, or also can be controlled by pulse-width modulation. And it uses three adjustable resistor to change the color of the RGB LED.

## 2. Features

---

- Grove compatible
- Color adjustable

### *Application Ideas*

- Toys
- Decoration

### *Cautions*

Be gentle when adjusting the R, G and B adjustable resistances in case of over-turning.

### 3. Specification

---

Item	Typical	Unit
Operate Voltage	5.0	VDC
Working Current	20	mA
Variable Resistor	<1	K $\Omega$

## 4. Usage

---

The three resistances RED, GREEN and BLUE of the module control the R, G and B channels respectively. By adjusting the three adjustable resistances, it can turn out variable color. The thing to notice, however, is that be gentle when turning the adjustable resistances.

The following sketch demonstrates a simple application of controlling its brightness. As the picture on the below indicates, the Variable Color LED is connected to digital port 9 of the [Grove - Basic Shield](#). The hardware installation is gave as follow:

- Copy and paste code below to a new Arduino sketch.

Demo code like:

```
int ledPin = 9;    // LED connected to digital pin 9

void setup() {
  // nothing happens in setup
}

void loop() {
  // fade in from min to max in increments of 5 points:
  for(int fadeValue = 0 ; fadeValue <= 255; fadeValue +=5) {
    // sets the value (range from 0 to 255):
    analogWrite(ledPin, fadeValue);
    // wait for 30 milliseconds to see the dimming effect
    delay(30);
  }

  // fade out from max to min in increments of 5 points:
  for(int fadeValue = 255 ; fadeValue >= 0; fadeValue -=5) {
```

```
// sets the value (range from 0 to 255):  
analogWrite(ledPin, fadeValue);  
// wait for 30 milliseconds to see the dimming effect  
delay(30);  
}  
}
```

- Upload the code, please click [here](#) if you do not know how to upload.

Adjust the three adjustable resistances, I am sure you will like it. Have a try!
