

WILMART™ Protective Relays – 25-000 Series

Function: 81 O/U

- ANSI/IEEE C37.90-1978

The output contacts of frequency relays are energized when the frequency exceeds the adjustable set point. Overfrequency and underfrequency relays are available in 50, 60 and 400Hz. Combination over/underfrequency “band pass” relays are also available. These are energized at rated frequency and de-energized during overfrequency or underfrequency conditions. Frequency Differential relays are energized above the preset frequency. The pick-up and drop-out frequency settings are independently adjustable.

Operation:

The normally open contacts close, and the normally closed contacts open, at nominal frequency. The contacts are de-energize at underfrequency, overfrequency or no input voltage.

Note: Dimensions in inches. Multiply values by 25.4 for dimensions in mm.

PRODUCT SPECIFICATIONS	
Part Number	25-000 Series
Input Voltage (±10%)	120 VAC
Frequency Range (adjustable)	See Part Number Selection
Trip Points	Screwdriver adjustable
Temperature Range	-20°C to +85°C
Temperature Drift	± 1% frequency error over temperature range
Voltage Drift	± 1% frequency error input voltage variation of ± 10%
Contact Ratings	5 Amp resistive at 120 VAC or 28VDC
Output Contacts	One set N.O., One set N.C.

PART NUMBER SELECTION		
Sample Part No.	25-050X	
Type:	25 - Over/Underfrequency	
Frequency Range	Under	Over
050 =	40-50 Hz	50-60 Hz
060 =	50- 60 Hz	60-70Hz
400 =	350- 400 Hz	400-450Hz
Mounting Options		
X = Flange		
blank = Stud		
Consult factory for additional models.		

Notes:

1. The contacts are shown in the de-energized position.
2. Remove screws for access to the underfrequency and overfrequency trip adjustments.
3. Clockwise rotation of the adjustment potentiometer will raise the frequency trip points.
