

Introducing Corcom DB Series

The Corcom DB Series is a new family of 60A inlet products for filtered applications up to 150 VDC and non-filtered applications up to 300 VDC. Filtered inlets are available in compact sizes with power filtering options for standard or high-performance applications. A filtered version with feedthrough capacitors is also available for improved performance in the high frequency range. Utilizing TE #4 AWG Elcon “drawer style” contacts, the filtered versions are pre-wired for easy customer termination with #6 AWG hi-flex stranded wire. Non-filtered plugs and receptacles are available with or without pre-terminated, hi-flex wire in standard lengths.
