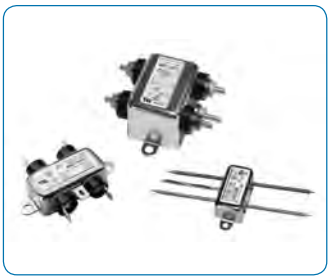
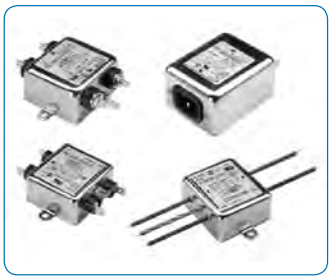
Corcom

EMI/RFI Filter Product Overview

TE Connectivity offers over 300 solutions for EMI/RFI problems associated with susceptibility, as well as compliance with international emissions standards. Corcom filters are available in a wide range of single and 3-phase designs as well as IEC inlet and power entry modules which can combine several functions to reduce cost, space and labor. Solutions are also available for DC applications and applications requiring extremely high performance with feedthrough filters and capacitors for a wide range of applications.

TE connectivity

FILTER TYPE	POWER LINE FILTERS		
SERIES	B Series	K Series	DK Series
			




PERFORMANCE	← General Purpose →		
Approvals	UL / CSA / VDE	UL / CSA / VDE	UL / CSA / VDE
Features	**General purpose RFI Filters for high impedance load / low current** • General purpose • Wide variety of termination options • Meets low leakage current requirements of VDE portable equipment and non-patient medical equipment	**General purpose RFI power line filters for high impedance loads** • Well suited to applications where pulsed, continuous and/or intermittent RFI interference is present • EK models meet the very low leakage current requirements for VDE portable equipment and non-patient care medical equipment • Available with ground line inductor (choke)	**Enhanced differential mode performance K Series RFI line filters** • Higher performance line to line attenuation than the K Series • E version meets the very low leakage current requirements for VDE portable equipment and non-patient care medical equipment • V version features same high performance with more cost-effective design
ELECTRICAL PARAMETERS

Universal filter for applications with low impedance loads including: • Motors • Semiconductor actuators • Home appliances • Gaming machines • Exercise equipment • Security systems • Industrial equipment & controls	Designed for PCB mounting for a wide range of applications including: • Gaming machines • Cash terminals • Office equipment • Small consumer electronics • TV / Audio / Video • Computing & accessories	Specially designed for the white goods / appliance market. Offers wide band RFI suppression for many applications including: • Washing machines / dryers • Dishwashers • Refrigerators & freezers • Coffee Machines • Hand held appliances & tools • Ovens & ranges	RFI filter designed to bring most digital equipment (including those with switching power supplies) into compliance with EN55022, Level A or B and FCC Part 15J, Class B conducted emission limits. Ideal for all applications with limited space including: • Switching Power Supplies • Industrial single phase applications

Termination outputs	.25 [*6.3*] spade terminals or wire leads	DIN type terminals	.25 [*6.3*] spade terminals, wire leads, or terminal bolt & nut
TYPICAL APPLICATIONS			
	Trouble shooter for wide banded RFI suppression of applications with very high RFI emissions including: • Consumer electronics • Single phase industrial applications • Switching power supplies with transient currents • HVAC	Wide band RFI suppression of industrial single phase applications with very high RFI emissions including: • Drives with long motor-cables • Variable speed motor drive applications ** VDE approvals for dual stage models up to 36A only*	Wide band attenuation for applications with very high RFI emissions. This filter series offers excellent attenuation for applications such as: • Consumer electronics • Single phase industrial applications • Drive motors and controllers
