

Notice for TAIYO YUDEN products

Please read this notice before using the TAIYO YUDEN products.

REMINDERS

- Product information in this catalog is as of October 2014. All of the contents specified herein are subject to change without notice due to technical improvements, etc. Therefore, please check for the latest information carefully before practical application or usage of the Products.

Please note that TAIYO YUDEN CO., LTD. shall not be responsible for any defects in products or equipment incorporating such products, which are caused under the conditions other than those specified in this catalog or individual specification.

- Please contact TAIYO YUDEN CO., LTD. for further details of product specifications as the individual specification is available.
- Please conduct validation and verification of products in actual condition of mounting and operating environment before commercial shipment of the equipment.

- All electronic components or functional modules listed in this catalog are developed, designed and intended for use in general electronics equipment.(for AV, office automation, household, office supply, information service, telecommunications, (such as mobile phone or PC) etc.). Before incorporating the components or devices into any equipment in the field such as transportation,(automotive control, train control, ship control), transportation signal, disaster prevention, medical, public information network (telephone exchange, base station) etc. which may have direct influence to harm or injure a human body, please contact TAIYO YUDEN CO., LTD. for more detail in advance.

Do not incorporate the products into any equipment in fields such as aerospace, aviation, nuclear control, submarine system, military, etc. where higher safety and reliability are especially required.

In addition, even electronic components or functional modules that are used for the general electronic equipment, if the equipment or the electric circuit require high safety or reliability function or performances, a sufficient reliability evaluation check for safety shall be performed before commercial shipment and moreover, due consideration to install a protective circuit is strongly recommended at customer's design stage.

- The contents of this catalog are applicable to the products which are purchased from our sales offices or distributors (so called "TAIYO YUDEN' s official sales channel").
It is only applicable to the products purchased from any of TAIYO YUDEN' s official sales channel.

- Please note that TAIYO YUDEN CO., LTD. shall have no responsibility for any controversies or disputes that may occur in connection with a third party's intellectual property rights and other related rights arising from your usage of products in this catalog. TAIYO YUDEN CO., LTD. grants no license for such rights.

- Caution for export

Certain items in this catalog may require specific procedures for export according to "Foreign Exchange and Foreign Trade Control Law" of Japan, "U.S. Export Administration Regulations", and other applicable regulations. Should you have any question or inquiry on this matter, please contact our sales staff.

$\phi 178 \pm 2.0$ ($\phi 7.01 \pm 0.079$)	$\phi 50 \text{ min.}$ ($\phi 1.97 \text{ min.}$)	$\phi 13.0 \pm 0.2$ ($\phi 0.512 \pm 0.008$)	$\phi 21.0 \pm 0.8$ ($\phi 0.827 \pm 0.031$)	2.0 ± 0.5 (0.079 ± 0.020)	1.0
	t	W			
8mm width tape (0.315 inches width)	2.5max. (0.098max.)	10 ± 1.5 (0.394 ± 0.059)			
12mm width tape (0.472 inches width)	2.5max. (0.098max.)	14 ± 1.5 (0.551 ± 0.059)			

Unit: mm (inch)

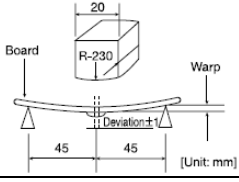

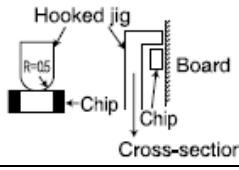

⑥ Top Tape Strength

The top tape requires a peel-off force of 0.1~0.7N in the direction of the arrow as illustrated below.

MULTILAYER CERAMIC DEVICES (FILTERS / DIPLEXERS / BALUNS)

RELIABILITY DATA

1. Operating Temperature Range	
Specified Value	-30~+85°C
2. Storage Temperature Range	
Specified Value	-30~+85°C
Test Methods and Remarks	※Note : -20 to +40°C in taped packaging
3. Resistance to Flexure of Substrate	
Specified Value	No mechanical damage.
Test Methods and Remarks	<p>Warp : 2mm Testing board : Glass epoxy-resin substrate Thickness : 0.8mm</p> 
4. Adhesion of Electrode	
Specified Value	Characteristics : shall satisfy the electrical characteristics. Appearance : No significant abnormality.
Test Methods and Remarks	<p>Applied force : 5N Duration : 10 sec.</p> 
5. Solderability	
Specified Value	75% or more of immersed surface of terminal electrode shall be covered with fresh solder.
Test Methods and Remarks	<p>Solder temperature : 230±5°C Duration : 4±1 sec Preconditioning : Immersion into flux. Immersion and Removal speed : 25mm/sec.</p>
6. Resistance to Solder Heat	
Specified Value	Characteristics : shall satisfy the electrical characteristics. Appearance : No significant abnormality.
Test Methods and Remarks	<p>Preheating : 150°C for 2 min. Solder temperature : 260±5°C Duration : 5±0.5 sec. Preconditioning : Immersion into flux. Immersion and Removal speed : 25mm/sec. Recovery : 2 to 3hrs of recovery under the standard condition after the removal from test chamber.</p>

▶ This catalog contains the typical specification only due to the limitation of space. When you consider the purchase of our products, please check our specification. For details of each product (characteristics graph, reliability information, precautions for use, and so on), see our Web site (<http://www.ty-top.com/>).

7. Thermal Shock																
Specified Value	Characteristics : shall satisfy the electrical characteristics. Appearance : No significant abnormality.															
Test Methods and Remarks	According to JIS C 0025.															
	Conditions for 1 cycle															
	<table border="1"> <thead> <tr> <th>Step</th> <th>Temperature (°C)</th> <th>Duration (min)</th> </tr> </thead> <tbody> <tr> <td>1</td> <td>-40±3</td> <td>30±3</td> </tr> <tr> <td>2</td> <td>Room Temperature</td> <td>Within 3</td> </tr> <tr> <td>3</td> <td>85±2</td> <td>30±3</td> </tr> <tr> <td>4</td> <td>Room Temperature</td> <td>Within 3</td> </tr> </tbody> </table>	Step	Temperature (°C)	Duration (min)	1	-40±3	30±3	2	Room Temperature	Within 3	3	85±2	30±3	4	Room Temperature	Within 3
	Step	Temperature (°C)	Duration (min)													
	1	-40±3	30±3													
2	Room Temperature	Within 3														
3	85±2	30±3														
4	Room Temperature	Within 3														
Number of cycles : 100																
Mounting method : Soldering onto PC board. Recovery : 2 to 3hrs of recovery under the standard condition after the removal from test chamber.																

8. Humidity (steady state)	
Specified Value	Characteristics : shall satisfy the electrical characteristics. Appearance : No significant abnormality.
Test Methods and Remarks	Temperature : +40±2°C Humidity : 90~95%RH Duration : 96hrs Recovery : 2 to 3hrs of recovery under the standard condition after the removal from test chamber.

9. High temperature life test	
Specified Value	Characteristics : shall satisfy the electrical characteristics. Appearance : No significant abnormality.
Test Methods and Remarks	Temperature : +85±2°C Duration : 96hrs Recovery : 2 to 3hrs of recovery under the standard condition after the removal from test chamber.

10. Low temperature life test	
Specified Value	Characteristics : shall satisfy the electrical characteristics. Appearance : No significant abnormality.
Test Methods and Remarks	Temperature : -40±2°C Duration : 96hrs Recovery : 2 to 3hrs of recovery under the standard condition after the removal from test chamber.

Note on standard condition:

“standard condition” referred to herein is defined as follows :
5 to 35°C of temperature, 45 to 85% relative humidity and 86 to 106kPa of air pressure.

When there are questions concerning measurement result :

In order to provide correlation data, the test shall be conducted under condition of 20±2°C of temperature, 60 to 70% relative humidity and 86 to 106kPa of air pressure.

Unless otherwise specified, all the tests are conducted under the “standard condition”.

MULTILAYER CERAMIC DEVICES (FILTERS / DIPLEXERS / BALUNS)

PRECAUTIONS

1. PCB Design

◆ Land pattern design

Land pattern dimension examples

Technical considerations

<p>FI325P Type</p> <p>Unit: mm</p>	<p>FI212B Type</p> <p>Unit: mm</p>	<p>FI212B245025 FI212B190223</p> <p>Unit: mm</p>	<p>FI212L Type</p> <p>Unit: mm</p>
<p>FI168T/D Type</p> <p>Unit: mm</p>	<p>FI168B/L Type</p> <p>Unit: mm</p>	<p>FI168P Type</p> <p>Unit: mm</p>	<p>FI212C Type</p> <p>Unit: mm</p>
<p>FI212P Type</p> <p>Unit: mm</p>	<p>FI212 P3960A4</p> <p>Unit: mm</p>	<p>FI105B/L Type</p> <p>Unit: mm</p>	

2. Soldering

◆ Conditions for Reflow soldering (for reference)

【Reflow Profile】

- ※ Components should be preheated to within 100 to 130°C from soldering temperature.
- ※ Assured to be reflow soldering for 2 times.

Note : The above profiles are the maximum allowable soldering condition, therefore these profiles are not always recommended.

Technical considerations

3. Storage conditions

Precautions	<p>◆Storage</p> <p>1. To maintain the solderability of terminal electrodes and to keep the packaging material in good condition, care must be taken to control temperature and humidity in the storage area. Humidity should especially be kept as low as possible.</p> <ul style="list-style-type: none">• Recommended conditions Ambient temperature : $-20\sim+40^{\circ}\text{C}$ Humidity : Below 70%RH The ambient temperature must be kept below 30°C. Even under ideal storage conditions, the solderability of electrodes decreases gradually, so filters should be mounted within 6 months from the time of delivery.• The packaging material should be kept where no chlorine or sulfur exists in the air.
Technical considerations	<p>◆Storage</p> <p>1. If the parts are stocked in a high temperature and humidity environment, problems such as reduced solderability caused by oxidation of terminal electrodes and deterioration of taping/ packaging materials may take place. For this reason, components should be used within 6 months from the time of delivery. If exceeding the above period, please check the solderability before using the filter.</p>

- Please contact of our offices for further details of specifications.
All of the standard values listed here are subject to change without notice.
Therefore, please check the specifications carefully before use.
