HIGH REPEATABILITY, NORMALLY CLOSED, BYPASS RF RELAYS

SERIES RF310 RF313

SERIES DESIGNATION	RELAY TYPE
RF310	Repeatable, RF, N.C. bypass relay
RF313	Sensitive, repeatable, RF, N.C. bypass relay

INTERNAL CONSTRUCTION

PERFORMANCE FEATURES

The ultraminiature RF310 and RF313 relays are designed with an internal bypass (through path), when the coil is de-energized, to provide low insertion loss and VSWR through the bypass and simplicity of design for the user. Relays have improved RF insertion loss repeatability over the frequency range from dc to 3 GHz. Highly suitable for use in attenuator, linear amplifier and other RF circuits. The RF310 and RF313 feature:

- N.C. bypass configuration.
- Repeatable insertion loss.
- Broad bandwidth.
- Metal enclosure for EMI shielding.
- Ground pin option to improve case RF grounding.
- High isolation between control and signal paths.
- High resistance to ESD.

CONSTRUCTION FEATURES

The following unique construction features and manufacturing techniques provide excellent resistance to environmental extremes and overall high reliability.

- Uni-frame motor design provides high magnetic efficiency and mechanical rigidity.
- Minimum mass components and welded construction provide maximum resistance to shock and vibration.
- Advanced cleaning techniques provide maximum assurance of internal cleanliness.
- Gold-plated precious metal alloy contacts ensure reliable switching.
